

# The Daily Astorian.

ASTORIA, OREGON:  
THURSDAY, OCTOBER 22, 1888

Wild geese were flying numerously south last evening.

Tony Nollner has discovered that virtue is its own reward.

W. A. Edgerton has been appointed postmaster at Clatskanie.

The Anglo-American cannery is advertised in the *Oregonian* for sale.

The Ger. bk. *Molke* came down yesterday, *Okohama* towing, Strang pilot.

Main street, north from Chenamus, is receiving a much needed improvement.

Pet fawns in various yards around town are attractive features of the landscape.

The learned pundits of the *Oregonian* and *Standard* are airing their latin. *Asit inettit*.

C. L. Parker has bought the stock in the store lately occupied by Pral Bros., paying \$1,100 therefor.

The Tillamook salmon packing season closed last Monday. About 10,000 cases were put up at Hobsonville.

Heyneman's Punch cigar, the best five-cent cigar in the market, at J. W. Bottom's Virginia cigar and tobacco store.

Jno. Elegan, at the Occident, has an elegant boy that he is very proud of. The youngster is only two days old, but he'll get over that.

The statement of the Oregon Short Line railway for August shows gross earnings of \$70,967, an increase of \$28,176 compared with August, 1884.

The *Colonia* leaves out to-day. She has 400 Chinese aboard and will gather in a few hours. They came without welcome and will leave without regret.

The *Wide West* came down yesterday shortly after two; the *Telephone* will show up this afternoon. Those two boats furnish river transportation that is hard to beat.

S. Schlusser & Co., who have for nine years occupied the White House corner, will move about the first of the month to the building recently occupied by M. D. Kant.

Mrs. A. E. Osgood of this city has prepared a memorial of Gen. Grant, which has been photographed by Crow. The work upon it is elaborate and occupied six weeks' time.

The British bark *Edward Perry*, hence for Queenstown, is reported as arrived at the Sally islands on the 16th, with the loss of her spars and other damage sustained in a gale on the voyage.

It is thought that Gov. Moody has thought himself of being Senator Slater's successor. The worst part of that programme would be that it would result in making R. P. Earhart the chief executive of the state.

A Greek named Pero was brought to the hospital at one o'clock yesterday morning from Skamokawa. He had been struck on the head by a falling tree and was insensible. Later in the day he was reported considerably better.

The Baker City *Tribune* man has been shown "a specimen of free gold" from Pine valley, that assays "over \$50,000 a ton." Pshaw; that's nothing; we were shown a piece of gold yesterday that would assay over \$100,000 to the ton, and there's plenty more where it came from.

The British ship *Griseholme*, 1,222 of Liverpool, Campbell master, 175 days from Liverpool, is outside with a pilot aboard. Her extraordinarily long voyage gave rise to fears for her safety which are now happily dispelled. The American ship *Ohio S. Southard* is now out 194 days from New York and is anxiously looked for.

The *Molke* cleared for Queenstown yesterday with 44,254 bus. wheat, worth \$31,525; the *City of Brestes* for Queenstown also, with 29,718 bus. wheat valued at \$70,440, and the *T. F. Oakes* for Bristol, with 108,287 bus. wheat cleared foreign for the first three weeks of October; the flour shipments thus far have been very small.

Talking of the improvement of the Columbia river bar, the *Oregonian* says: "It is gratifying to know that the improvement is started right. If nature continues to second the efforts of the engineers from year to year, it will be easier to get appropriations. It would help along greatly if the state would show its faith in the work and its need of it by appropriating a round sum to be donated to it."

The *State* arrived in at eight yesterday morning; the *Geo. W. Elder* sailed for San Francisco at 8:30. She took 7,666 bus. wheat, 8,610 bus. barley, 1,500 bus. oats, 7,285 bus. flaxseed, 418 bus. chop barley and 3,477 lbs. flour. The *Columbia* will leave at 8:30 this morning. She takes 2,329 cases salmon as follows: Cutting Packing Co., 1,000 cases; Fishermen's, 150; Aberdeen, 150; S. Elmore, 445; Warren, 380; Wm. Hume, 4; Tillamook, 200.

The Fishing Boat Rare. All the captains and those who are interested in the fishing boat race to come off Saturday next are to meet at the Telephone saloon to-night, at 8 p. m. sharp, when the judges will be appointed by vote, and the course and sails to be used will be decided upon. Pools will be sold there Friday night. This is the boss race.

Fresh Goodwin Butter And a full assortment of staple and fancy groceries always on hand at D. L. Beck & Son's.

Parties wishing spars or piling of any size or length can be supplied by leaving orders with J. H. D. Gray.

Subscribers to the Peoples Illustrated Atlas are notified that next Wednesday is the day appointed to collect balances due.

## STATE AND TERRITORIAL.

P. B. Johnson is now sole owner of the Walla Walla *Union*, E. L. Herriott having retired from the firm.

The Baker City court house was burned last Tuesday night and many valuable records burned, including the circuit court records. The cause of the fire is unknown.

Though every ear on the O. R. & N. is in service, thousands of bushels of wheat are piled up, awaiting shipment at various stations along the line in eastern Washington.

The charge against Capt. Wilson, of the *Olympian*, of landing a small-pox patient at Victoria, was dismissed by the magistrate, the captain not knowing a patient was on board.

U. S. Marshal George, of Washington territory, on Tuesday arrested Al. Little, a Northern Pacific fire contractor, charging him with despoiling government land. The marshal also seized 15,000 ties and 4,000 cords of wood.

News from Granite creek states that Bear creek, a recent discovery, is regarded as a fizzle as a gold bearing region. Granite creek continues to pay largely, as high as \$400 a day to a single claim. The beaches prospect largely from the surface down.

The *Union* suggests that a convention be held in Walla Walla on the 10th of November, composed of representative men from all parts of the inland empire to memorialize congress for the speedy improvement of the navigation of the Columbia and Snake rivers.

A protest has been filed against the appointment of Daniel Stewart, recently appointed to the postmaster-ship at Walla Walla, on the ground that he is too old, and that his hands will certainly refuse, practically, to conduct the office. Vias has stated that the protest will receive his attention and consideration.

The water question is the leading municipal question in Portland. The *Oregonian* says: "Our city tax is now nine mills, and it produces only enough to carry on the municipal government during eight months of the year. At the present rate of expenditure a tax of thirteen mills will be required to carry on the government the year round."

E. L. Bonner, manager of the Montana Improvement company, has obtained a rehearing, and believes that when the question of a rehearing is further considered by the department the suits against the company will be abandoned. He says there is ample legal authority for all the timber cutting done by his company, and is confident of success in defending the charges made against it. He claims the laws sanction timber cutting for mineral and domestic uses, and says the copper mining interests of Montana depend upon timber cut by his company for working their mines.

### A CRYING EVIL.

The eight counties of Clatsop, Columbia, Washington, Clackamas, Wasco, Crook, Morrow and Gilliam compose the fifth judicial district. It is too big by half, and the officers of court find it impossible to attend properly and promptly to the public business. Judge Taylor was compelled to adjourn court at The Dalles in the midst of its term last week, and before several cases could be heard, to go to another county where he was compelled by law to appear at a particular date. The inconvenience is great to litigants who find the "law's delays" in the natural course of court proceedings, provoking and costly enough without this special and wholly unnecessary hardship. The district ought to be divided, the four western counties of Clackamas, Washington, Clatsop and Columbia to form one district and the four eastern counties of Wasco, Crook, Gilliam and Morrow another. There is enough business in each of these districts to employ a special court. As it is now, the district is so widely scattered that it is an impossibility for the prosecuting attorney to attend personally to his duties. He is compelled to work largely through deputies and often to the disadvantage of the public. There is still another very important consideration: To be in a hurry is inconsistent with the judicial character; but Judge Taylor is often obliged to rush business along in an unseemly and improper style. He does the best he can, and, under the circumstances, does well, but if he had more time he could do better. At its coming session the legislature would do well to divide the district and create another court.—*Oregonian*, 21

## TICKS OF THE TELEGRAPH.

Sherman, Foraker and Logan will take part in the New York and Virginia elections.

Russia has made preparations to land 50,000 troops at Varna, a seaport town in Bulgaria, in twenty-four hours in case of war.

Prince Alexander has summoned the whole of the national militia of Bulgaria and eastern Roumelia into immediate service in defense of the country.

Lord Salisbury has informed the Porte that England will send an energetic remonstrance to Servia and Greece against their formidable armaments and advise them to keep quiet.

It is thought in Virginia that Mahone is almost certain to be returned to the U. S. senate. He is said to have control of the Virginia legislature. It is thought that Fitz Hugh Lee will be elected governor.

The prospects of a railroad from Winnipeg to Hudson bay, for the shipment of Manitoba wheat to England, are somewhat indefinitely postponed, owing to a report brought back by the steamer *Alect* of the difficulties of navigation of Hudson strait, which was not clear of ice this year until August 22.

More light is being thrown on the election frauds in Hamilton county, Ohio, on the occasion of the recent election. Matters were rather loosely carried on. In one precinct in Cincinnati the judges returned a newspaper election return blank with their signatures attached, but did not sign the tally sheet.

The council of Candia, the largest city in Crete, has voted in favor of union with Greece, but the populace refuse to revolt against the Turkish government before Greece declares war. The Greeks are wild with enthusiasm. Thirty thousand men of the reserves have been enrolled during the past five days and thousands are arriving from all parts of Greece. The people are clamoring for war.

It is stated in New York that German-Americans in Germany have been notified that hereafter their residence must be limited to a few weeks or months, and that if they, in any particular, during even that short period, become troublesome, they will be subject to receive a notice at any time to leave the country. It is claimed that the attitude which the German government has taken is in direct violation of the spirit, if not the letter, of the Bancroft treaty.

The British ship *Clericum*, from Newcastle for San Francisco with a cargo of coal, took fire spontaneously on August 19th at 3 o'clock in the afternoon, latitude 12° 12' and 59' south, when a fearful explosion blew off the hatchways. John Campbell, a seaman, was never seen afterward. The barkentine *Zetta* hove in sight, and made every effort to subdue the flames without effect, and finally it became so hot that the water in the tanks actually boiled, and the flames shot up through the decks. The vessel was abandoned by all hands, who boarded the *Zetta*. The ship sank at 9:45 the next morning.

The long continued arbitrary policy of King Christian in refusing to dismiss the Estrup cabinet, and levying illegal unconstitutional taxes, because parliament refused to vote the budget, has led to a number of serious riots and imposing demonstrations in Copenhagen. The people seem determined that their representatives in parliament shall have some voice in the affairs of the government and have become so threatening in their demands that the king has ordered the garrison of Copenhagen to be largely reinforced. The popular manifestations are not confined to Copenhagen alone, but are general throughout Denmark. It is expected that a state of siege will be declared, and it is feared a revolt will ensue if the king persists in refusing concessions asked by parliament. A number of political arrests have been made, tending to further incense the people, and bloodshed is anticipated.

### Wild Cherry and Tar.

## TWO MILES A MINUTE.

Speed of Canvas-Back and Other Ducks.

"I've held my watch on about every kind of wild duck there is," said an old time hunter, "and I can tell just about to the sixty-third part of a dot, how much space any one of 'em can get over in an hour. There's no railroad train on the continent that can hold a candle to one side of the slowest duck that flies."

"The canvas-back can distance the whole duck family, if it lays itself out to do it. When the canvas-back is out taking things easy, enjoying a little run around the block, as it were, it jogs through the air at the rate of eighty miles an hour. If it has business somewhere and has to get there, it puts two miles behind it every minute it keeps its wings flapping and does it as easy as you or I could step three miles an hour. If you don't believe it, just fire square at the leader in a string of canvas-backs that are out on a business cruise sometime when you get the chance. Duck shot travels pretty quick, but if your charges bring down any one of these ducks at all, I'll blow you off to a pair of the best there is in the market, with trimmings and all, if it isn't the fifth or sixth one back from the leader that drops. If you have the faintest idea that you will bring the leader down, you must aim at space not less than ten feet ahead of him. Then he'll run plump against your shot. When he drops you will find him a quarter of a mile or so on. The mallard duck is a slow coach. It's all he wants to do to go a mile a minute, but he can do it when necessary. His ordinary every day style of getting along over the country gets him from place to place at the rate of forty miles an hour. The black duck is about an even match for the mallard, and the pintail, widgion and wood duck can't do much better. The redhead can sail along with ease and cover his ninety miles an hour as long as he feels inclined to. The blue winged teal and its handsome cousin, the green winged teal, could fly side by side for a hundred miles and make the distance neck and neck, for one can fly just as fast as the other, and to go 100 miles is no hard task, for either of them. The gadwale—you don't know what a gadwale is, I'll bet I thought not. Well it is a duck that doesn't get east very often, but is well known in the west. It is something like a mallard, only harder to shoot, because it is not so unsuspecting as the mallard. The gadwale is something of a daisy on the fly, and will win money for you every time if you bet it can make its ninety miles an hour."

"Maybe you wouldn't think that a goose could almost double, discount the fastest train that runs on our railroads, but it can every time. It has a big heavy body to carry, but it manages to glide from one feeding ground to another with a suddenness that is a caution to wing shots. To see a cloud of honkers moving along, so high that they seem to be scraping their backs against the sky, you'd never believe they were traveling between eighty and one hundred miles an hour, but they are. The wild goose never has any time to fool away, and his gait is always a business one."

"The broadbill duck is the only wild fowl that can push the canvas-back on the wing. Let a broadbill and a canvasback each do his best for an hour, and the broadbill would only come out about ten miles behind. A hundred and ten miles an hour can be done by the broadbill, and he, consequently, makes a mark for a shotgun that a greenhorn wouldn't hit once in twenty-five years."
