Our host, taking an ivory scoop carved in the shape of a large tea leaf filled the little teapot full of loosely heaped leaves, and then having poured the hot water into the pitcher that it might cool a little poured it into the teapot. That part of the tea making was most puzzling to us of the Occident, who have been taught as the first principle of tea making that the water must be boiling at the minute it touches the leaves, and that unless at boiling point teamade with it is flat and unprofitable. Our Japanese friend explained to us that to the most critical and epicurean tea drink-ers of his country boiling water was an abomination, as it scorched the leaves, drove out the fine fragrance in the first cloud of steam and ex-tracted all the bitterness instead of the first sweat tasts of the young Indigestion and kindred ills. the first sweet taste of the young leaf. "It may be all well enough for the coarse black tea of China to pour boiling water on it," said this most delightful Japanese, "but the delicate leaf of our cultivated tea plant does not need it." And we bowed submissively, and promised never more to apply Chinese pro-cesses to Japanese tea leaves.
