A German chemist has ascertained By Curricura. PSORIASIS, Eczema, Tetter, Ringworm, Lichen, Pruritus, Scald Head, Milk Crust, Dandruff, Barbers', Bakers', Grocers', and Washerwoman's lich, and every species of Itching, Burning, Scaly, Pimply Humors of the Skin and Scalp, with loss of Hair, are positively cured by CUTICRA, the great Skin Cure, and CUTICURA SOAP, an exquisite Skin Beautifier, externally, CUTICURA R5-soLVENT, the New Blood Purifier internal-ly, when physicians and all other remedies fail. that poisons-such as prussic acid, corrosive sublimate and sulphureted hydrogen-destroy the germinating powers of seeds.

The Japanese Government proposes making adequate provision for instruction in medical science by dividing the country into six sec-tions, in each of which will be established a college for the training of future physicians and surgeons.

PSORIASIS, OR SCALY SKIN. I, John J. Case, D. D. S., having practised dentistry in this county for thirty-five years and being well known to thousands here-abouts, with a view to help any who are af-flicted as 1 have been for the past twelve years, testify that the CURICURA REMEDIES curred me of Psoriasis, or Scaly Skin, in eight days after the doctors whom I had consult-ed save me no help or encoursement. Dr. G. Rolhfs considers woolen clothing to be unhealthy for wear in the tropics. He finds support for this theory in the fact that sheep from cool countries soon lose their I gave me no help or encouragement. NEWTON. N. J. JOHN J. CASE. Your COTICURA REMEDIES performed a wonderful cure last summer on one of our customers, an old gentleman of seventy years of age, who suffered with a fearfully distres-ing eruption on his head and face, and who had tried all remedies and doctors to no pur-pose. J. F. SMITH & CO. TEXAREANA, ARE. Unclean hands seem to be an un-avoidable evil. Mr. Forster, an Italian investigator, has shown that after the most thorough washings and brushings with soap and water and rinsings with carbol acid and disinfectants of various kinds, the MORE WONDERFUL YET. H. F. Carpenter, Henderson, N. Y. cured of Psoraisis or Leprosy, of twenty years' stand, by CUTTCUR REMEMBER. The most wonderful cure on record. A dustpanial of scales fell from him daily. Physiciaus and his friends thought he must die. It is often a matter of surprise that drunken men sustain little or no injury from falls which might have been expected to result fatally. The reason of this immunity is that the nerve centers are so paralyzed in the drunken man as not to be af-fected by the shock of the fall, which, in a sober man, would have acted upon them so violently as to stop the heart, arrest the circulation, and cause instant death.

CENTENARIANS .- A list of persons who have exceeded the age of 100 years has been compiled in France. It is surprisingly large, as may be judged from the fact that during the years 1824 to 1837 France contained between 111 and 175 centenarians, while there were no less than 1238 in Russia in 1837. The published

list includes the famous Thomas Parr, who died at the age of 152 years, and a Frenchman named Priou, who died in 1838 in his 158th year. One of the oldest persons now living—possibly the oldest—is Madame Girard, who was born in France, March 16, 1761, and is there-

fore nearly 125 years old. She is active, and her sight and hearing are good, but her memory is greatly impaired.

YELLOW FEVER VACCINATION .some experimental yellow fever inoculations by Dr. Carlos Finlay, of Havana, have been made in a somewhat curious manner, a mosquito be-ing caused first to sting a yellow fever patient and then the healthy subject. A mild form of the disease resulted, which became more severe when two mosquitoes were employed to convey the poison. Of eleven cases of this inoculation, six were efficacious, one doubtful, and four

OBANG INTELLIGENCE .- "We will not say anything about the place the orang has in the long chain of evo-lution," observes Hornaday; "but while abstract argument leads hither and thither, according as this or that writer is most ably gifted for the same, there is still one argument or influence to which every true naturalist is amenable and which no one will ignore who has studied from nature any group of typical forms. Let such an one-if, indeed, one exists to-day-who is prejudiced against the Darwinian views, go to Borneo. Let him there watch from day to day this strangely human form in all its various phases of ex-istence. Let him see the orang climb, walk, build its nest, eat, drink, and fight like a human rough. Let him see the female suckle her young and carry it astride her hip precisely as do the coolie women of Hindostan. Let him witness their Hindostan. Let nim witness their human-like emotions of affection, satisfaction, pain and rage-let him see all this, and then he may feel how much more potent has been this lesson than all he has read in pages of abstract ratiocination."
