FRESH CLATSOP EGGS

Can be had of L. M. Shaffer at Water St., and Sherry & Co.'s market opposite Occident Hotel. I don't claim they are fresh as some do who have but a few chickens and it takes them a month to get a shipment, but because I have the largest Chicken ranch this side of Portland, run by experienced hands, pick up the eggs every day and bring them to town a week. And don't you forget that every egg bought from the above parties is guaranteed by them to be fresh. S. K. STANLEY.

Blow Up the Fifth Time.

NEW YORK, March 8.—The dynamite works of Mrs. Mary A. Dittmer, at Daychester, Long Island, blew up for the fifth time at 1 o'clock this morning, killing one man and leveling the building to the ground. The last previous explosion was on September 30th last, at which time four Italians employed in the packing house were blown to atoms. Not a vestige of the building was left this morning except some black splinters about three or four inches long. The site of the building is marked by a hole about ten feet deep and twenty feet in diameter. The detonation was heard twenty-five miles, and the shock was felt in all the surrounding villages. People ran out of their houses thinking it was an earthquake. Windows were broken nearly one mile away. The unfortunate young man's body could not be found, but Coroner Rice gathered up some teeth, the skull and a foot and put them into a package and that was viewed by the jury.

DR. S. HARMON

Of St. Petersburg, Russia. Oculist. The Duplex Eye Illuminator. By this machine I am able to detect the slightest disease of the eye. I have also an invention by which I am able to measure the focus of the eye; then I make glasses to suit each eye accordingly. I have a large supply of Brazilian Pebble Lenses for all eyes, in different stages, which can be secured only by an Oculist. Also have the Medicated Lens, which, in some cases, including cannot express the benefit the human race derive from them. For instance, a large eye, and a large pupil, cannot use the pebble, as they give too much light. The Medicated having thin lens, a great benefit to a weak or diseased eye. I have no spectacles like those of ordinary manufacture. My goods are all made to order, accordingly as each eye requires. I claim to be a Practical Oculist, and will prove to the public that need my services that I am exactly what I claim to be. The difference between a common oculist and myself is that I use glasses made to order, and I use an electric light. Office—Room 11, Occident Hotel, Astoria.
