 THE HUMAN FAMILY.

THE human family living to-day on earth consists of about 1,450,000,000 individuals; not less, probably more. These are distributed over the earth so that now there is no considerable part where man is not found. In Asia, where he was first planted, there are now approximately about 800,000,000, densely crowded; on an average, 120 to the square mile. In Europe there are 320,000,000, averaging 100 to the square mile; not so crowded, but everywhere dense, and at points over-populated. In Africa there are 210,000,000. In America, North and South, there are 110,000,000, relatively thinly scattered, and recent. In the islands, large and small, probably 10,000,000. The extremes of the white and black are as 5 to 3; the remaining 700,000,000 intermediate brown and tawny. Of the race 500,000,000 are well clothed—that is, wear garments of some kind to cover their nakedness; 700,000,000 are semi-clothed, covering inferior parts of the body; 250,000,000 are practically naked. Of the race, 500,000,000 live in houses partly furnished with the appointments of civilization; 700,000,000 in huts or caves with no furnishings; 200,000,000 have nothing that can be called a home, are barbarous and savage. The range is from the topmost round—the Anglo-Saxon civilization, which is the highest known—down to naked savagery. The portion of the race lying below the line of human condition is at the very least, three-fifths of the whole, or 900,000,000.

THE Argentine Republic is getting hold of Europe as a market for meat products. The latest advices from Buenos Ayres state that two vessels were then loading there 60,000 sheep carcasses for England; that a European syndicate with a capital of \$3,000,000 is about to establish a grand produce market on the banks of the Riachuelo river, and that it would not be long ere that country supplied 10,000 tons of meat weekly for Europe.

Sugar and wool are being shipped from San Francisco to St. Paul and Boston, via Canadian Pacific railway. On sugar is charged \$2.24 per hundred pounds.

CONSIDERABLE interest in militia companies is exhibited all over the state, and in eastern, southern and central Oregon, companies are being organized.

THE interstate commerce law seems to offer no obstacle to the passing of cyclones from Kansas to Missouri and Texas.

the roads will charge while the revocation is in force. Just before the law went into effect the rates were very low; when on the 5th inst., the rates advanced two and three hundred per cent., and now comes another change. The only thing certain about the business so far is its uncertainty.

THE San Francisco "corner" on wheat attracts considerable attention. It directly affects Columbia river shipping. The ships in the stream opposite the city, and in the river are practically tied up, in want of cargoes, while every San Francisco steamer is taking full cargoes of wheat out of the river to California. The receipts there from Oregon, during the last four weeks, aggregate nearly 10,000 tons. The combination is a strong one and its operations are extensive.
