A Speech By Parnell.
LONDON, July 20.—Parnell and many of his colleagues were entertained this evening at a banquet by the National Liberal Club. The health of the queen was proposed by Dillon, and the guests all rose and drank the toast.
Parnell eulogized Gladstone, and wondered how long Englishmen would be contented to see the government march up hill and down again. English liberals might be assured that their exertions would not be wasted. Although in Ireland extreme misery had been suffered during the past eighteen months, crime has diminished, and the people turned to constitutional methods of adjusting grievances instead of physical force. If the liberals failed to carry out their part of the programme, their great reward would be that they had banished violence, outrage and revenge and brought the nationalities to depend on lawful methods of redress. The diminution of crime proved the gratitude of Ireland toward the liberals, and he hoped that when the oppressors trampled upon the evicted they would retaliate slowly. They should remember that the tory government should not last forever.

The Hawaiian Problem.
NEW YORK, July 20.—The Graphic to-day expresses the opinion that there was more in King Kalakaua's threat to place himself under the protection of the British war ships than appears on the surface. It says: "Queen Kapiolani easily raised a large loan in England, thereby giving that country a second mortgage on Hawaii. The United States, however, cannot afford to let any European power entrench itself there. Hawaii comes within the scope of the Monroe doctrine as much as any bit of American soil. If under the protectorate of England, or Germany, or Russia, Honolulu would be a perpetual be a constant menace to Uncle Sam's commerce on the Pacific coast. The old world powers must keep their hands off."
Jury in a California Prison.

SAN FRANCISCO, July 20.—The Examiner this morning publishes a two-column article under the sensational title of "Blood Curdling Tales from Folsom Prison." The article says that the shower-bath system of tying a man naked in the position of a crucifix and playing a hose on him is of daily occurrence at the prison, and that frequently the victim, choked by a stream of cold water, would fall senseless as soon as untied. In a black hole would follow and sometimes the prisoner would never again see the light of day. Fifteen prisoners in as many cells had never seen a human being, save the keeper who passed their food to them at stated periods.
Work on the O. P. Extension.

ALBANY, Or., July 20.—The tracklayers are busy laying rails on the portion of the road between Albany and the Santiam river. This work is vigorously pushed in order to permit the running of construction trains with material to the front. Work on the Santiam bridge has commenced, the piling on the west side being nearly all driven. Work will be commenced on the forty mile extension next week. Chinese laborers will not be employed on this work, if a sufficient number of white men can be obtained.

A New York public school teacher, whose salary is \$700, was recently fined 1 cent for being late two minutes.
The Old Folks at Home,
Or elsewhere, need a tonic now and then to sustain them under growing infirmities. No safer or more thorough invigorant for age and the delicate can be found than Hostetter's Stomach Bitters, a reasonable medicine in those ailments of commonest occurrence—liver complaint, indigestion and bowel disorders; a pure botanic safeguard against malaria, and a reliable means of counteringacting rheumatism. To the convalescent, it is a valuable aid in the recovery of strength, and to the debilitated, nervous invalid it yields tranquil slumber and renewed appetite. To Utilize Coal Dust.
A San Francisco mechanic has recently invented a new process for manufacturing artificial fuel. The chief basis of the new fuel is "slack," or dust from coal mines or yards. This substance, which is so often thrown away, is sifted and mixed into a paste with a chemical mixture containing ingredients which neutralize the suffocating odor of sulphur and coal, which form one of the disagreeable qualities of natural coal. The paste mass is then pressed into bricks. The new fuel has been analyzed by the state assayer, and a comparative test made between 238 pounds of artificial fuel and 238 pounds of a mixture of Coos bay and Seattle coal. It was found that the coal burnt out in one hour and forty-eight minutes, leaving twelve and one-half pounds of ashes and twenty-six pounds of clinkers, while the patent fuel lasted two hours and forty-five minutes, leaving twelve and one-half pounds of ashes and twenty-six pounds of clinkers. The trouble with the new fuel is to find a machine that will press the material at small cost. The inventor claims to have just invented such a machine, but had not had time to give it a practical trial.

Surf bathing is said to be the cause of more cases of deafness than any other one thing. A breaking wave is very likely to drive water forcibly into the ear and injure it, as there is generally sand in the water. By filling the ears with pellets of wool, however, harm may be avoided. Cotton will not do, because it becomes sodden.

Scarlet Fever.
Darby's Prophylactic Fluid is unequalled in the treatment of Scarlet Fever. Used as a gargle it prevents the throat from becoming diphtheritic, allays inflammation and subdues the pain. Used to sponge the body it allays the itching inflammation of the skin and destroys infection.
Exposed in the sick-room it will prevent the spread of contagion, and keep the atmosphere wholesome.

It is reported that Mme. Etelka Gerster, the great singer, has pensioned her husband, Sig. Gardini, and that they live apart. We hope there was no fraud about granting the signor's pension, and that it dates from the beginning of his disability.
