

The Daily Astorian.

ASTORIA, OREGON: TUESDAY, AUGUST 2, 1887.

The Astoria Iron Co.'s wharf is about finished.

The Sardonys is discharging coal at Gray's dock.

City treasurer Hustler gives notice regarding city taxes.

No. One's engine will be ready to have steam up this week.

The Villalta has about 12,500 cases aboard and expects to clear about the 15th inst.

The Gen. Miles is taking on miscellaneous cargo, and expects to start for Coos bay to-day.

The McArthur is taking on coal and supplies, and will go to Shoal-water bay about Thursday.

The Rosie Olsen is loading cannery supplies for Yaquina and the Sinslaw. She expects to get away to-day.

The steam schooner Mitchell is loading with supplies for the Sinslaw and Yaquina and will probably get to sea to-day.

Several of the canneries closed down yesterday. The rest might as well, for there are no fish running to amount to anything.

Jo. Leathers is building a steam vessel for L. N. Henness, for use on Shoalwater bay, that, when completed will cost about \$1,200.

There will be a lawn party at the residence of Mrs. Higgins this afternoon from two to five, for the benefit of the Baptist Sunday school.

County assessor Sorensen wants all county assessment blanks still in the hands of different parties, returned to him at his office in the court house this week.

The old buildings on the corner of Cass and Chenamus streets are being torn away and foundations will shortly be laid for a new building more worthy of that prominent location.

Clatsop Lodge, number 113, United order of honor is now fully organized. The regular meetings of the lodge will be on Wednesday evenings, in the lodge room over Carnahan & Co.'s store.

The ladies of the Episcopal church will give a basket picnic, to Klaskanine on Friday the 5th. The steamer Electric will leave Wilson & Fisher's wharf at 9:30 in the morning. Tickets will be fifty cents; children, 25 cents.

O. Y. Peterson and H. Gruber have leased the sloop Venture from the Ilwaco Trading Co., and have her hauled up at Arndt & Ferchen's. They will refit the vessel and go out deep sea fishing with her about the 1st of next month.

Yesterday's Oregonian was a 12-page paper, eight pages being a Spokane Falls and Wardner edition. It was a big edition of a big paper and a credit to the enterprising publishers of the Oregonian. Spokane is well written up in it, and the silver district of the Coeur d'Alene mines receives deservedly extended notice.

Mayor Trullinger has contracted to deliver 7,500,000 feet of lumber, chiefly for building purposes in San Francisco. This will require an average daily cut of 25 M. for one year. Loading of vessels will begin about the 15th of the month. The Wallneck logging road is a success, putting in some days as high as 69 M. feet.

The Clatsop Mill Co. is building a steamer on the beach in front of the Astoria Iron Works that is one of the largest of the kind constructed here. She will be 68 1/2 feet in length, 16 1/2 feet beam, will draw about five feet eight inches of water. Joe Leathers, who built the Favorite and the Electric, is building her. She will cost, complete, about \$7,000.

The Scandinavian Benevolent Association had a pleasant picnic and excursion to Knappa on board the Mountain Queen last Sunday. The committee of arrangements deserve credit for their efforts to make the day a complete success. The Western Amateur band accompanied the excursionists and added greatly to the enjoyment of the occasion. The party returned a little after seven o'clock, with pleasant memories of the day.

The 100-yard footrace between Ed. Bea and Skinner, for \$500 a side, was witnessed by a good-sized crowd at Portland last Sunday afternoon. Pete Grant and Tom Linville were judges. The race was run in about 10 1/2 seconds. They both got to the string so close together that the referee declared it a tie, and all bets were "off." There is considerable kicking about the decision, many claiming that Bea won the race by about eighteen inches. Linville is positive that Bea won the race and ought to have the money; Grant is equally positive that the race was a tie: Cap. Sorensen, the referee, declared it to be a tie.

Residence for Rent or Sale. The Carl Adler property, including a fine dwelling house, will be for rent or sale after September 1st.

Death of a Former Old Astorian.

A good many old residents of Astoria will read with interest of the death of Capt. William Tichenor, who died at the residence of his daughter, Mrs. E. W. McGraw, in San Francisco, last Wednesday. He was born in Newark, N. J., in 1813, and came to this coast in '49. In 1851 he was master of the full-rigged brig Emily Farnham, plying between here and San Francisco. Afterwards he was in command of the steamer Sea Gull, which he lost on Humboldt bar in January, '52, when he was placed in charge of the ship Anson, which will be remembered as sailing between here and San Francisco. In 1854 he was a Columbia bar pilot and was for awhile on the Puytoia. Twenty years ago he quit the sea and moved away from this vicinity, living for a long time in southern Oregon and of late years in San Francisco.

Unnecessary Misery. Probably as much misery comes from habitual constipation as from any derangement of the functions of the body, and it is difficult to cure, for the reason that no one likes to take the medicines usually prescribed. HAMBURG FIGS were prepared to obviate this difficulty, and they will be found pleasant to the taste of women and children. 25 cents. At all druggists. J. J. Mack & Co., proprietors, S. F.

LATEST FROM MILLER'S SANDS.

Sunday's ASTORIAN contained a brief resume of hostilities at Miller's sands to date. When Chas. Woods returned on his boat to that classic battle ground, early Sunday morning he camped on the field, so to speak, that is he anchored his steamer, and he and his crew consisting of John Hooker, the engineer, went to sleep. They were awakened shortly after sunrise by shouts from the opposing faction, who appeared in force armed for the fray. Rifle shots struck the smokestack, the woodwork and entered the engine room, and when the engineer went out to take up the anchor he received two rifle balls in his right arm splintering the bone. When the smoke of conflict had cleared away, Woods started down to Astoria again, bearing the wounded engineer, who was taken to the hospital and given surgical aid. When the doctor went there yesterday morning to afford him further necessary relief he found his man gone, taken back to the scene of conflict as a necessary witness, it being Woods' intention to have his antagonists arrested and hauled up before justice of the peace Walker at Cathlamet. Nat being able to get a warrant in Astoria for their apprehension he will try Washington territory law. At the hospital lies a man named Douglas, said to belong to the attacking party; the lower part of his leg is fearfully shattered by a Winchester rifle ball, and the doctors say his only salvation is to have the leg cut off. This he refuses to allow, and so his case stands.

A late arrival from the seat of war who came down yesterday afternoon as witness in a Chinese case, says that there was more shooting going on between the belligerents yesterday. Some one will get hurt up there yet if they keep hanging away at each other as they have for the last three days. It is reported that sheriff Albert of Wahkiakum county sent two deputy sheriffs and a posse yesterday evening to arrest the marauders this morning, and as they are said to have declared that they ain't going to be arrested, it is probable that that section will furnish some more items in the next few days.

The mean daily dew point, 51.2; mean daily relative humidity, 77.4; prevailing direction of wind, southwest; total movement of wind, 5,284 miles; rainfall for month, 72-100 of one inch. (The rainfall for July, '86, was 2.58 inches; in '85, .04 of an inch; in '84, 1.29 inches.) There were 7 clear days, 12 fair days and 12 cloudy days.

Give Them a Chance!

That is to say, your lungs. Also your breathing machinery. Very wonderful machinery it is. Not only the larger air-passages, but the thousands of little tubes and cavities leading from them.

When these are clogged and choked with matter which ought not to be there, your lungs cannot half do their work. And what they do, they cannot do well.

Call it cold, cough, croup, pneumonia, catarrh, consumption or any of the family of throat and nose and head and lung obstructions, all are bad. All ought to be got rid of. There is just one sure way to get rid of them, that is to take Boschee's German Syrup, which any druggist will sell you at 75 cents a bottle. Even if everything else has failed you, you may depend upon this for certain.

A Gloomy Day Among the Mariners.
