

The Daily Astorian.

ASTORIA, OREGON: FRIDAY, OCTOBER 7, 1887

The News says that the project to pay a stranger the sum of \$250,000 to build a hotel in Portland is collapsed.

The Milwaukee & St. Paul road is to run Union Pacific trains direct to Chicago without change, virtually cementing the alliance between the two roads.

The New York Herald is now printed and published simultaneously on two continents. It appears every morning in Paris and is sold there for 2 cents, its New York price.

The statement is made in San Francisco that the Chicago & Northwestern line is to be constructed on from Fort Caspar, Wyoming territory, to Ogden. At present the line has no western outlet, and a present terminus at Ogden would be of value. A permanent ocean terminus at Astoria would be of greater value.

Last Wednesday Gov. Penney received a letter from secretary Endicott, stating that a requisition of the state for arms and equipments to the value of \$2,700 had been allowed. This is Oregon's quota established by law. The special requisition for arms sufficient to equip the military of the state was not granted. The arms allowed are 163 in number.

Since Proctor Knott spoke of Duluth as "the zenith city of the unsalted seas," there has been a decline in tall talk. Senator Ingalls, however, is reviving the soaring style, and says that the next constitutional centenary will find us extended "from the waters of the frozen zone to the warm waves of the tropic sea." The oratory of the Nebraska senator differs from Astoria's proposed railroad, inasmuch as the orator is apparently poorly provided with terminal facilities.

YESTERDAY'S SAN FRANCISCO Call says: The division of territory between the Union Pacific and Northern Pacific, which was a part of the errand of Thomas J. Potter to New York recently, will insure to the O. R. & N. Co. a clear field in eastern Oregon, free from rivalry from the Northern Pacific, and the Union Pacific an opportunity to develop its Oregon Short Line at leisure. Interesting developments in the railroad field are promised for the near future.

A CENTURY ago there were only 40,000 Catholics in this country, with 25 priests and no bishops. Now the church has an American cardinal, 12 archbishops, 61 bishops, 7,658 priests and a membership of 8,000,000. The American cardinal, the most eminent Mr. Gibbons, will be in Portland tonight. He is a brother of Gen. John Gibbon, commander of the department of the Columbia. The general dropped the "n" some time ago and spells his name "Gibbon."

It is reported that another immensely powerful syndicate is in progress of formation, and this time for operations in Canada. The names mentioned in this connection are senator Payne, senators Burke and Ritchie, of Ohio, Erastus Wyman and A. B. Boardman of New York, and James McLaren of Ottawa. The object of the combination is to secure the control of all the known valuable iron deposits in Canada, now said to be the richest iron country in the world. The capital is to be \$10,000,000, more than two-thirds of which is already pledged. The syndicate, it is said, will own 100 properties in different parts of Canada.

NEWSPAPER reporters do some funny things sometimes to get the true business and reach satisfactory conclusions. There was an anarchist meeting in New York the other night and a World reporter wanted to report the meeting, so two nights before he joined the gang and was sworn in as a member of the order over a big bucket of beer. As a member in good standing he attended the meeting and disappearing at an early stage of the proceedings behind some old scenery he got it all down in shorthand, and the next morning the World gave the whole business away, signs, pass words, grips, etc., and now the New York anarchists have had to fix up a new system, and are looking for their long lost brother, that fly New York reporter.

To show the remarkable vigilance of the German government in its exertions of military service from its subjects, it is said that Germany never loses sight of any of them; that the subject in all his wanderings is still kept on the list with his last place of residence. When war comes he is immediately summoned home, and should he fail to obey, is branded as a deserter and punished as soon as hands can be laid upon him. Germany, as well as the other powers, claims and exercises

the right to take possession, without a moment's notice, of the entire railway system within its territory, and conduct it under military surveillance exclusively. The government has now a record of every car belonging to every railroad within its borders. These cars are all numbered in plain letters. Every regiment in the service is assigned to a certain number of cars, specifically designated, and, in the event of a rapid movement, the commanding officer of a regiment knows without any inquiry into what cars he is to pack his men. This is the perfection of preparation. Railroads in Germany do not run over the vast stretches of territory they do in the United States, and, consequently, rolling stock is not, as with us, scattered hundreds of miles apart. There is probably not a railroad in all Germany whose entire equipment could not be concentrated in one day.

Heart Disease!! Read the hospital reports, read the mortuary reports, read the medical publications, read the daily newspapers, and learn how wide-spread is heart disease, how difficult of detection it is to most people, how many and how sudden are the deaths it causes. Then read Dr. Flint's treatise on Heart Disease, and learn what it is, what causes it, what diseases it gives rise to, what its symptoms are, and how it may be attacked. If you find that you have heart disease, ask your druggist for a bottle of Dr. FLINT'S HEART REMEDY. The treatise may be had on application to J. J. MACK & CO., Nos. 9 and 11 Front street, S. F.

It is yet too early to take much interest in the new fashions of making up the common fabrics. Skirts are to be longer, barely clearing the ground; there are indications of a revival of narrow pleatings. Draperies on some of the new models are much shorter, while upon others they are very long, reaching quite to the bottom of the lower skirt. Sleeves are in a transitional state, as many ladies will not adopt the full sleeve, and others quite prefer it; there is every indication that both styles will be in favor, as the American woman will have what is most becoming to her, and the majority of women like plain sleeves for that reason. Nearly all ladies with shapely arms prefer the close sleeve. The full sleeve is more desirable for ladies who are less favored by nature in that particular.

The Verdict Unanimous. W. D. Sult, Druggist, Bippus, Ind., testifies: "I can recommend Electric Bitters as the very best remedy. Every bottle sold has given relief in every case. One man took six bottles, and was cured of Rheumatism of 30 years' standing." Abraham Hare, druggist, Belleville, Ohio, affirms: "The best selling medicine I have ever handled in my 20 years' experience, is Electric Bitters." Thousands of others have added their testimony, so that the verdict is unanimous that Electric Bitters do cure diseases of the Liver, Kidneys or Blood. Only a half dollar a bottle at W. E. Dement & Co.'s Drug Store.
