### INFANTILE

Our oldest child, now six years of age, when an infant six months old was attacked with a virulent, malignant skin disease. All you continuary remedies failing, we called our family physician, who attempted to cure it; but it spread with almost incredible randing, until the lower portion of the lit le fellow's person, from the middle of his back down to his knees, was one solid rash, usly, painfal, blotched, and malicious. We had no rest at night, no peace by day. Finally, we were advised to try the Curicua Remedies. In three or four weeks a complete cure was wrought. I leaving the little fellow's person as white and healthy as though he had never been attacked. In any opinion your valuable remedies saved his life, and to-day he is a strong, healthy child, perfectly well, he repetition of the disease having over occurred.

#### Constitutional Catarrh.

Constitutional Catarrh.

No single disease has entailed more suffering or hastened the breaking up of the constitution than Catarrh. The sense of smelt of iaste, of sight, of hearing, the human voice the mind-one or more, and sometimes all, yield to its destructive influence. The poison it distributes throughout the system attacks every vital force, and breaks up the most robust of constitutions. Ignored, because but little understood, by most physicians, impotently assailed by quacks and charlatans, those suffering from it have little hope to be resisted of it this side of the grave. It is time, then, that the popular treatment of this terrible disease by remedies within the roach of all passed into hands at once competent and trustworthy. The new and hitherto untried method adopted by Dr. Sanford in the preparation of his Radical, Cube has wen the hearty approval of thousands. It is instantaneous in affording relief in all head colds, sneering, snuffling and obstructed breathing, and rapidly removes the most oppressive symptoms clearing the head, sweetening the breath, restoring the senses of smell, taste and hearing, and neutralizing the constitutional tendency of the disease towards the langs, liver and kidneys.
