How a Dying Child Was Saved! CICERO, HAMILTON CO., IND., Sept. 19, 1987 .-The following is a true account of what your 8. S. S. has done for our little daughter, Hazel,

now four years old. When 12 months old a how four years old. Watch It mouts old a lump appeared on her heel, which slowly grew larger. The family physician thought it was caused by a piece of broken glass or needle, but failed to bring anything to light. The child became feebler all the time, seeming to lose the use of her leg, and finally quit walk-ing entirely. The middle finger and thumb of either hand became enlarged, the fish be-coming hard. The hip joints became involv-ed, so that when seventeen months old she could not stand, having lost the use of leg and arm. Partial curvature of the spine also followed. The nervous system was wrecked, muscles contracted, and there was general wasting of flesh and muscle. At eighteen months of age she was placed under the treatment of a prominent physician of Bos-ton, Mass., but at the end of ten months she had declined to such a degree that she was in a dying condition. This was in April, 1986 We took the child away not knowing what to do. In this dreadful dilemma we were over-persunded by friends to try "one bot-tle" of Swirr's Srectire, which we did, and before it had all been taken we saw a change for the better in her symptoms. We kept it up, and have done so to this day, and will keep it up, if the Lord wills, for many days to come, for it has brought our dying Hasel to life, to vigor, to strength and health again. The ashen hue of her cheeks has changed to arosy tint. She is able to walk anywhere, her languor and melancholy have passed away, and she is now a bilthe, cheerful, hap-py romping child. Should you wish to increase your testimonials of proof of the virtue of S. S. S., our names and what we have said is but a portion of what we owe to

you, should you wish to use them.
Kindly yours,
BES. F. SWIFT.
