I. L. OSGOOD'S.

Mr. I. L. Osgood, having purchased a 5 per cent interest in all the machinery and all the materials now on hand, cordially announces the fact and extends to manufacturers, dealers and mechanics of all descriptions, a hearty welcome to his new establishment.

Special.

The Osgood Manufacturing Company of Astoria and New York, has been organized and the manufacturing of Novelty and Fancy Goods commenced.

A Hundred years ago Ireland was, and, when considered by taxation imposed by England, more than the land itself, said to be a 'pris on the country.' The same state of things is now again marked by a spirit of discontent, more intense, inasmuch as it is active and popular, and involves the masses more deeply.

"It will only be a way of voice and a way of argument, but it is the most effective argument conceivable."

A well-known American statesman has summed up the great cause of American rights, in its best sense, as "the' right of the people to rule themselves."
