

The Daily Astorian.

ASTORIA, OREGON: TUESDAY, JULY 10, 1888.

ISSUED EVERY MORNING. (Monday excepted.)

J. P. HALLORAN & COMPANY, Publishers and Proprietors.

ASTORIAN BUILDING, - - - CASS STREET.

Terms of Subscription. Served by Carrier, per week, 15 cts.

Free of postage to subscribers.

The ASTORIAN guarantees to its subscribers the largest circulation of any newspaper published on the Columbia river.

Council meeting to-night. Tin plate is quoted at \$5.25 a box.

Legs are bringing \$5.50 a thousand. There was a partial eclipse of the sun yesterday.

Astoria is shipping eastward three car-loads of salmon a day. Having in is progress at Skipanon, and the crop is a good one.

Canneries and fishermen report a better run of salmon yesterday. The Walluski is taking on railroad iron for Ilwaco at the O. R. & N. dock.

R. R. Marion is filling up the custom house square a height of three feet with earth. The new O. R. & N. steamer T. J. Potter is expected to make her first appearance here to-day.

In order to sell all his straw hats in season, Herman Wise offers them at almost half price. Get one and keep cool!

The Alliance left for Gray's harbor at eleven Sunday morning. The Gen. Miles leaves for Gray's harbor this morning.

The Olive S. Southard is lumber laden and in the stream. Captain Walker, her commander, grows younger every day.

Columbia river salmon shipments by rail eastward to the 1st inst. aggregate 107,646 cases; to San Francisco, 4,436; to England, 0.

A salmon cannery is building at the narrows on the Willapa river, being one of the very few sites that have not been taken before.

The biggest thing in the O. R. & N. dock at present is an enormous hosiery wheel, which is for the derrick at Tillamook rock light house.

Below West's on the road to Seaside, cows are not allowed to run at large. This is published as an inducement to immigration to that section.

The Dalles Times-Mountaineer, of the 7th says: The run of salmon is quite lively this month. The Tenino Packing Co. is shipping large quantities.

On the Sound at the present time the summer run of salmon is about setting in and the fishermen are making preparations to put up a large supply.

There will be a total eclipse of the moon July 23d, when the satellite will make an almost central passage across the line formed by the earth's shadow.

At a meeting of the stockholders of the Mt. Hood Packing company last Saturday, F. R. Stokes, J. R. Gilstrap, P. A. Stokes, J. J. Stokes, and Jno. P. Hines were elected directors.

The Manzanilla went up to the buoy depot yesterday, took on a lot of material, went to Fort Canby yesterday afternoon and goes to Shoalwater bay and Gray's harbor this morning.

Harrison and Morton badges have arrived. They consist of a narrow satin ribbon, white, on which is printed the stars and stripes in red, and the words "Harrison and Morton," in blue.

Next Thursday the ladies of Grace Church will have a grand excursion on the S. G. Reed to Cathlamet. Tickets may be procured at Griffin & Reed's, J.C. Dements, or J. W. Coun's.

The members of the church and ladies aid society of the Presbyterian church are invited to meet at the residence of Mrs. John Holson on this afternoon at 2:30 o'clock, as important business is to be transacted.

The ladies of the several churches are requested to meet in the parlors of the Y. M. C. A. building on this Tuesday afternoon at 4 o'clock, for the purpose of arranging for a social to be given under the auspices of and for the benefit of the Y. M. C. A.

And soon will come the regular presidential year joke about the man that bet and won and the other man that bet and lost the wager, that there was and is a city in the United States of 227,000 population in which Cleveland will not get a single vote.

Some of Portland's crack shots participated in the recent Seattle tournaments. Their friends at home expected favorable reports, and were surprised, on the 6th to get the following brief and expressive dispatch: SEATTLE, July 6.—Soup. Home Sat. P. M.

The late Henry Mattson deposited a certificate of insurance on his life, issued by the "Occidental self improvement association of California," with

some unknown person to be put in a safe. If the party having this certificate will kindly deliver it to Dr. Jay Tuttle he will confer a favor on the widow.

Messrs. Robb & Parker have bought out the insurance and real estate business of J. O. Bozorth, who will remove to Portland. They will occupy his former office on Genevieve street as soon as arrangements are completed.

Several Cleveland campaign buttons are being worn; they are small, of dark metal, bear the initials "G. C.," the date "88" and the inscription "public office is a public trust." Some people think a public office is a private snap, but these buttons say different.

There is a resident of this city, a man who has lived here for a good many years who is a relation of both Harrison and Morton, the Republican candidates for president and vice-president. Who is he? Well, his name will appear in this column on the 7th of November, 1888.

When the Astoria delegation reached Seattle they began brushing the flies off, which lighted on them. Some wonder was expressed by Seattleites there should be any flies on Astorians, till some one casually mentioned that in Astoria the cows rambled around the streets. That, of course, explained it.

Harry Kelly, of the Portland fire department, testified in court last Friday, that his wife had a habit of hitting him with a big piece of wood, and sometimes thrashing him with a horsewhip, but he didn't mind it, as it pleased her, and didn't hurt him. It was just a way she had, and she didn't mean anything by it.

At a meeting of the Clatsop road and construction company last evening at which C. H. Page was chairman and C. R. Thomson was secretary, the directors elected at the last meeting duly qualified, and the by laws of the company were read by sections and adopted. The directors will meet at three this afternoon.

In the justice court yesterday Geo. Peale was arraigned, charged with assault and battery on John Laska, at Desdemona Sands, where both men were fishing; it appearing that the boats fouled and a tussel was the consequence. Peale was discharged. Donald MacBane, on a charge of assault and battery on one Nelson, will have a hearing at two this afternoon.

Three and four years ago the bulk of the inquiries received by the eastern mail at this office, were from city residents asking about the probability of getting employment here clerking, book-keeping, etc. For the last year the majority of those asking information want to know about the price of land, how much vacant land is around Astoria, etc., which is a promising sign.

Robert Holt, father of L. W. Holt of this city, died at his residence in Oakland, Cal., last Saturday, in the 64th year of his age. Deceased was an honored member of Beaver Lodge No. 35, I. O. O. F., and was well known to many old residents, having lived at Fort Stevens for many years. His son was with him when he died, having been summoned to his bedside about ten days ago.

Except in large cities the post office department will not pay for advertising the dead letter list. This is unfair to the inhabitants of smaller towns and villages. An unilateral letter is just as important to its rightful owner in Astoria as though he or she were a resident of San Francisco and to withhold publicity in one place that is given to it in another is unjust and unworthy of our government.

"Many a true word is spoken in jest." A few days ago THE ASTORIAN said that up north the folks were canning their hay. It was just so. There are cans and cans. John West is canning his hay. He cuts the grass of the field, which to-day is and to-morrow is cut down and that afternoon cut up and hauled to a big circular can called a silo, and put in under heavy pressure, and next winter Mr. West will feed this green succulent grass to steers and such. This is the ensilage process, and if that isn't canning hay, what is it?

There were some whistling boys on the dock yesterday, and alongside the dock lay the Manzanilla with the big boss whistling buoy, weighing tons upon tons on board. It is painted a bright red, and has in big white letters fair to see the words GRAY'S HARBOR painted all around its voluptuous waist. It will bob in the bubbling brine of Gray's harbor, and any one who is able to read the English language when in big print, can make out which is Gray's harbor and which is Shoalwater bay after he sees this buoy. The whistling buoy at the mouth of the Columbia is painted black and white.

When the Geo. W. Elder came in last Sunday morning, among the passengers were a Chinaman and his wife, residents of this city, who were allowed to land, and four Chinese, Lamping Hee, 20 years old, Ungah Ho, 21 years, Ungat Hing, 8 years and Lamping Jo 10 years; these four went bitterly, but had no certificates and their tears did not influence the inspectors, who refused them admission. They were from Nannimo, B. C., and went on the steamer yesterday to Portland. The Elder brought 1,200 cases salmon from the Aberdeen Packing company of Alaska. When she left the cannery there were 3,000 cases packed there.

On the San Francisco steamer last Sunday came a propeller for the Manzanilla. This is none of your little two-for-a-bit propellers, but is one of those you read about in the back part of the spelling book. It is

made principally of brass; it was cast at Mare Island. It weighs 4,803 pounds. It cost \$2,182.04. It has in it brass from the brasswork of the old Hartford that held admiral Farragut lashed in its rigging at the capture of Mobile; it has copper from the sheathing plates of "Old Ironsides," the frigate Constitution; it has tin from the mines of Cornwall, and a gold ring that the foundry foreman dropped in the melting pot for luck; it has an entire brass engine that was set up and worked for many years in a steamer on the southern California coast, and other bric-a-brac.

Clatsop Lodge No. 113 U. O. of H., was organized on July 11th 1887, with a charter membership of 71 members. It is a beneficial order. The assessments are levied on members whenever it is required, and the amount is according to the age of the member, the insurance being from \$500 to \$3,000. The average cost for the past year has been as follows: The average age of members is 31 years old; the average cost of each assessment has been 94 cents. The number of assessments levied for the year were 16, so from the above it will be seen that the average cost to members has been for the year ending July 10th 1888, for the average amount of insurance of \$1,400, \$15.04. There is also a sick benefit fund belonging to this lodge which guarantees each member \$10 per week in case of sickness.

It has been legally settled in Texas that the moon has an immense influence in enlarging the brand on cattle. A lawsuit was pending relative to the ownership of a large herd of cattle, and the solution depending upon the proof of the brand which was found on comparison to be three times the size of the branding iron which the claimant used. Thirteen witnesses were introduced, all of them experts in branding and herding cattle. They all swore that when cattle were branded in the dark of the moon the brand will never grow, no matter how large the animal may grow, get larger than the dimensions of the iron used. On the other hand, when either cattle or calves are branded in the light of the moon, the scar will spread, and the lighter the moon, the lighter will be the spread. And the suit, involving several thousand dollars worth of cattle, was settled on the testimony. So whatever may be the rule in Oregon, the question is legally settled that it is the moon that does it in Texas.

PERSONAL MENTION. J. J. Stokes has returned from Tillamook.

J. P. Austin of Seaside, was in the city yesterday.

A. G. Thurman, Democratic nominee for vice-president, says he will visit Oregon this fall.

To be Moved From Tongue Point.

On motion of senator Dolph the senate to-day passed bills to establish lighthouses at Astoria and at the Umpqua river. At Astoria there is to be a wharf as well as a lighthouse, the wharf to be under the control of the lighthouse board, and for the project the sum of \$15,000 is appropriated. The lighthouse at the mouth of Umpqua river is to be established on the headlands in that vicinity, and is to be first-class in every particular. The sum of \$80,000 is appropriated for the purchase of a site and building of the structure. In recommending the Astoria lighthouse and wharf the lighthouse board say: At present the lighthouse wharf and buoy depot are at Tongue Point, three miles above Astoria. It is a bad location, as it is an exposed point, and there is often so much sea that vessels cannot lie at the end of the wharf. The water is shoaling rapidly at this point. It is very inconvenient on account of the shoal water and currents for vessels to go to the wharf, and it therefore costs from twenty to thirty cents more per ton to get coal landed at this wharf than it would if it were located at Astoria. It is also quite inconvenient in case of repairs to buoys or to the tender, as it is three miles from a machine shop. If the wharf and depot were at Astoria the crew of the tender could frequently be employed in cleaning buoys and similar work, while small repairs were being made to its engine or boiler. There is no telegraphic communication nearer than three miles from the buoy depot, and it is not possible to learn the condition of the bar at the mouth of the river. At Astoria it is generally possible to learn whenever it is too rough to work outside. As a rule the emergencies of the service require that the tender should lie at Astoria instead of at Tongue Point, consequently she must lie at a private wharf instead of at a government wharf. Before long the wharf at Tongue Point will need expensive repairs, and will have to be extended on account of the shoaling of water, if it is retained there. It will therefore be less expensive to relocate the wharf at Astoria than it will be to rebuild and extend it at Tongue Point." - Washington Corr. Oregonian.

Board of Equalization. Notice is hereby given that the committee on ways and means of the common council will meet at the office of the auditor and police judge as a board of equalization on Tuesday July 10th 1888 at 10 o'clock A. M.

W. L. Robb, Chairman.

A fine cup of coffee, at the Telephone Restaurant.

Sunny Rooms. With or without board at the Holden House. Rooms from \$6 a month upward. Library, etc.

PARKE PLUCKED. Oregon's Enemy Rejected By The President.

(SPECIAL TO THE ASTORIAN.)

KANASAS CITY, July 9.—The most disastrous storm that has ever visited Kansas City for years raged during last night until twelve o'clock. During the height of the storm 18th street for seven blocks became a turbulent river which flooded all the houses to the depth of two feet, and at 23rd, and Vine and 15th streets the culvert was inadequate to carry off the immense volume of water which backed up carrying away two houses, the inmates of which were rescued only with difficulty. Those who saw the storm said that it was undoubtedly a cloud-burst. Reports of death and destruction are numerous, but at this hour no fatalities have been verified. It is said that a family of four persons named Williams, were washed away and drowned. The loss will aggregate many thousand dollars.

A NARROW ESCAPE. DARMSTADT, July 9.—As Prince Alexander of Battenburg, late ruler of Bulgaria, was driving from Heidelberg into Shattack valley yesterday, his horse shied and the carriage was hurled down the side of the mountain. Prince Alexander was thrown out and fell a distance of forty feet when he grasped some shrubs, and by their aid escaped with slight injuries. The horse was terribly mangled and killed and the carriage was dashed to pieces.

GRAIN REPORTS. SAN FRANCISCO, July 9.—The annual report of the San Francisco produce exchange gives the following amounts of flour and grain remaining in the state of California July 1, 1888: Flour, 72,000 barrels; wheat, 3,882,000 cents; barley, 2,063,000 cents; oats, 62,000 cents. This is considerable of an increase over the amount on hand July 1, 1887, which was, flour, 50,000 barrels; wheat, 2,790,000 cents; barley, 798,500 cents; oats, 42,000 cents.

WANTS HIS SON. BELGRADE, July 9.—King Milan has formally invoked the aid of the authorities of the Prussian province of Hesse-Nassau to force his wife, who is now stopping at Wiesbaden, to surrender to him their son, the crown prince, who is 11 years old.

PRESIDENTIAL NOMINATIONS. WASHINGTON, July 9.—The president to-day sent to the senate the nomination of Col. Thomas L. Casey, of the corps of engineers, to be chief of engineers with the rank of brigadier-general. The president nominated Elliot Sanford of New York, to be chief justice of the supreme court of Utah; Jno. W. Judd of Tennessee, to be associate justice of the supreme court of Utah; Hugh W. Weir of Pennsylvania, to be chief justice, and Chas. H. Berry of Minnesota, to be associate justice of the supreme court of Dakota, and John H. Keatley of Iowa, to be United States judge for the district of Alaska.

A GROWING LIST. PITTSBURG, July 9.—The Structural Iron company of New Albany signed the amalgamated scale this morning, making nineteen persons so far which have granted the demands of workmen.

BIZ. NEW YORK, July 9.—The visible grain supply for July 7 as compiled by the produce exchange is as follows: Wheat, 23,031,727 bushels; corn, 10,170,395 bushels; oats, 4,449,509 bushels; rye, 173,581 bushels; barley, 154,113 bushels.

THE RESULT OF THE INQUEST. PORTLAND, July 9.—To-day Drs. Taylor and McKenzie made a post mortem examination on the body of Mary Schneller the young German woman who died suddenly Saturday afternoon in Dr. Murray's office. The testimony of the surgeons proved beyond a doubt that the girl's death was due to an abortion. The coroners jury returned a verdict to the effect that Mary Schneller came to her death from criminal malpractice at the hands of some unknown person.

An Explanation. What is this "nervous trouble" with which many seem now to be afflicted? If you will remember a few years ago the word Malaria was comparatively unknown,—to-day it is as common as any word in the English language, yet this word covers only the meaning of another word used by our forefathers in times past. So it is with nervous diseases, as they and Malaria are intended to cover what our grandfathers called Billiousness, and all are caused by troubles that arise from a diseased condition of the Liver which in performing its functions finding it cannot dispose of the bile through the ordinary channel is compelled to pass it off through the system, causing nervous troubles, Malaria, Billious Fever, etc. You who are suffering can well appreciate a cure. We recommend Green's August Flower. Its cures are marvelous.

Mary had a little jam; She locked it up to grow, And every where that Mary went The key was sure to go. She lost it in the grass one day, While fleeing from a cow; Her brother Johnny picked it up— He is an angel now.

Gambrian Beer And Free Lunch at the Telephone Saloon, 5 cents.

The latest style of Gents' Boots and shoes at P. J. GOODMAN'S.

The best Oysters in any style, at the Telephone Restaurant.
