Housekeepers should be careful as sneak thieves are around. Look out for them. We have had knowledge of overcoats and silk umbrellas having been stolen from private residences in town during the past three days. Housekeepers will do well to keep their front doors locked or remove everything worth having from the hall.

It is explained by the assignees of Wm. T. Coleman & Co. that a settlement with their creditors on the basis of 40 cents on each dollar of indebtedness will soon be made. A large majority of the creditors have signed a conditional agreement accepting the terms offered. There has been a great loss of time in reaching the creditors, who are scattered all over the world.

The secretary of the interior last Tuesday rendered eighty decisions allowing applications to enter as homestead land within the indemnity limits of the Northern Pacific railway, in the eastern part of Washington territory and in the western part of Idaho. These decisions follow that in the case of Guilford Miller, and nearly all the locations are in his immediate neighborhood.

The bell tower surmounting the city hall at Walla Walla has been removed, and the fire bell will be hung outside, to see if it can be heard in case of alarm. If the experiment does not succeed, the tower will be built 20 feet higher. The bell tower in this city was experimented with in the same manner and with improvement. The only trouble is it should have been raised forty feet instead of twenty so to carry it above the highest buildings.

It is a mistaken notion that some people have that they can get better bargains of traveling agents than they can of merchants who are doing a permanent business here with us. Merchants who have stores here and get their supplies in large quantities by freight, can afford to sell goods cheaper than traveling agents, who make a big commission out of their sales and have their traveling expenses to pay. Trade at home and help build up your town.

A WHITECHAPEL MURDERER FOILED. LONDON, Nov. 21.—Great excitement was occasioned this morning when it was reported that another woman was murdered and mutilated in Whitechapel. The police formed a cordon around the premises. An enormous crowd rushed to the vicinity in which the crime was committed when it was learned that another murder had been attempted on a low woman by a man who accompanied her to a lodging house, but in this instance his work had been frustrated. According to the woman's story, he seized her and struck her once on the throat with a knife. She struggled and succeeded in freeing herself from his grasp, screamed for help. Her cries alarmed the man and he fled without attempting further violence. Some of the neighbors, who heard the woman's screams, followed the would-be murderer, when he disappeared. The woman says she is fully able to recognize the man, and gave a description of him to the police.

BASE BALL. NEW YORK, Nov. 21.—The base ball convention convened this morning. The work of the joint committees yesterday was approved without opposition, except on the question of high and low ball, which western men have not taken to. It is now conceded that the Cleveland will succeed the Detroit club.

An effort was made to drop the error column from the score, but a protest was made by newspaper reporters and the proposition was voted down. Cleveland was admitted to succeed to Detroit. Recess was then taken.

Their Business Booming. Probably no one thing has caused such a general revival of trade at Jno. C. Dement's Drug Store as their giving away to their customers of so many free trial bottles of Dr. King's New Discovery for Consumption. Their trade is simply enormous in this very valuable article from the fact that it always cures and never disappoints. Coughs, Colds, Asthma, Bronchitis, Croup, and all throat and lung diseases quickly cured. You can test it before buying by getting a trial bottle free, large size \$1. Every bottle warranted.

THE COST OF LOVE.

How Cupid Can Make Sad Havoc in a Dry Goods Store.

"One of the worst things we have to contend with in our business, as far as our unmarried male and female employees are concerned," said a dry goods man, "is love. When a young lady, say in the hosiery department, falls in love with a nice young man in the dress goods department, or any other department, for that matter, there is trouble ahead for the employer. If the young man should happen to return the young lady's affection the trouble is doubled. How does this make any difference to us? In nine cases out of ten the tender passion unfits its victims for work in the same dry goods store. This is especially so in the case of the young ladies. Once they get in love with a young man at another counter their minds instead of being at their own counter, are continually at the young man's counter. The result of this is that the love smitten maid is absent minded and inattentive to business. I have seen many a bright young woman who was very valuable to us become utterly worthless behind her counter simply because she got to thinking more of a good looking young man at some other counter than she did of our business.

"It's the same way with the young men, too. When they get too far gone they are only one thing left for us to do, and that is to discharge them and fill their places. I confess I always regret to take this step, and I never do it unless in self defense. But when the trouble reaches a certain stage there is no alternative. Of course we go about it in a roundabout way, and never give the real cause for dispensing with their services. We explain that business is dull or something of that sort, and never let on that the little passion they nurse so tenderly has sacrificed their positions in the store.—N. Y. Times.

An Explanation.

What is this "nervous trouble" with which so many seem now to be afflicted? If you will remember a few years ago the word Malaria was comparatively unknown,—to-day it is as common as any word in the English language, yet this word covers only the meaning of another word used by our forefathers in times past. So it is with nervous diseases, as they and Malaria are intended to cover what our grandfathers called Biliousness, and all are caused by troubles that arise from a diseased condition of the Liver which in performing its functions finds it cannot dispose of the bile through the ordinary channel is compelled to pass it off through the system, causing nervous troubles, Malaria, Bilious Fever, etc. You who are suffering can well appreciate a cure. We recommend Green's August Flower. Its cures are marvelous.

Our Light Houses.

The large iron shutter intended to protect the lantern at Tillamook light from damage during the heavy winter gales which occasionally throw surf clean over it, is about completed at the Willamette Iron works. It is mounted on brass castors, and a circular iron track is provided, on which the shutter can be easily and quickly rolled around to the shore side of the lantern in fine weather. The shutter was to have been completed to-day to be shipped on the Monzenita, but as that steamer's throttle is in the shop for repairs, she is not likely to sail for a day or two.

On the wharf at the iron works are a large number of heavy castings for the light house at Cape Mearns. The castings are sections of the octagonal tower of the light. There are three series of them which will reach from the masonry to the base of the lantern. There will have to be a good road made from Tillamook spit to the summit of Cape Mearns in order that these heavy castings may be got up there.—Oregonian 21.

For First Place.

A great amount of political engineering will be done by friends of candidates to secure for their man the first place on the ticket, and the best man will probably secure the coveted place. Then if endorsed by the majority of the people, the election is assured.
