Two Children In Six Months. A dispatch from Onancock, Va., July 29, reports that a remarkable case of parturition has just come to light there. Ellen Hall, a young colored woman residing in that town, gave birth several days ago to a male child, making the second child she has borne in the last six months.

On the 16th of last January she gave birth to a male child in Baltimore, where she was then living with her husband, William Hall, a colored drayman. Finding that her condition did not change after she had given birth to her child, she was induced to consult a physician, who, after an examination, informed her that they would have another child in the course of four or five months in the meantime she left Baltimore and went to Onancock to reside temporarily with her parents, who are among the most respected colored people in that community.

Five months and four days from the birth of her first child she gave birth to another finely developed boy. Both the children are alive and doing well, and the doctors say that the woman carried both nine months before delivery. All the physicians there have investigated the case, and unite in pronouncing it the most remarkable one that has ever come within their observation.
