#### DYSPEPSIA.

S that misery experienced when we suddenly become aware that we possess a diabolical arrangement called a stomach. The stomach is the reservoir from which every fibre and tissue must be nourished, and any truth with it is soon felt throughout the whole system. Among a dozen dyspeptics no two will have the same predominants wastems. Dyspepticsofactive mental power and a bitious temperament are subject to Sick Headache; those, fleshy and phicanal chave Constipation, while the thin and nervous are abandoned togloomy forebodings. Some dyspeptics are wonderfully forgetful; others have great irritability of temper.

Whatever form Dyspepsia may take, one thing is certain,

The underlying cause is in the LIVER, and one thing more is equally certain, no one will remain a dyspeptic who will

Colonel John Ely, formerly of Pike county, Mo., now a North Dakota stockman, was a Democratic member of the Dakota legislature three or four years ago. He fell desperately ill during the session and was having a rather rough time, with only such attention as Tom Edison and other well-meaning but maskilled friends well-meaning but unskilled friends could give him. Edison walked in one day and asked: "Well, John, how are you getting

"Poorly, mighty poorly, Tom. I'm afraid I'm going to die," said Ely.
"I don't know but you will," replied Edison. "You look awful bad.

"I know it. I know it," said Ely. And in a few moments he added: "Tom, there's one thing I want you to do for me if I die." "What is that?" asked Edison, in a

sympathetic tone, getting ready to receive a deathbed commission. "Tom," said Ely, "if I die. I want you to see that I'm buried in a Norvegian burying ground." "Wha-wha-what's that for?"

"Because," said Ely, without a break in his solemn manner, "because the devil will never think of looking for a Democrat among the Norwe-

"When it comes to freight," says the agent of the French steamship line in New York city, these racers do not pay. After the Cufic sails there's no transatlantic freight left here to speak of, anyhow. The Cufic burns, they say, only 135-tons of coal daily, and she makes the passage in ten days or so. You can imagine the profit there is in a boat like that. Then the Adriatic of the same line North Pacific gets along with 85 tons, and makes the passage plenty fast enough for freight. She's a regular gold mine beside these new racers." The agent says, a terrible amount of room must be sacrificed to coal on the racing ships."
