NO GOOD TIMBER IN ALASKA.

Scrubby Trees Olinging to The Rocks. George W. Hotchkiss, editor of the Lumber Trade Journal of Chicago,

having just returned from an Alas-kan trip on the steamer Elder, in the course of an interview said: "No, Alaska will never be avail-able for a timber supply. It contains little but scrubby sprice, hemlock and cedar. I availed myself of every possible opportunity for forming a correct judgment upon this point both by personal examination and by inquiry, the result of which convinces me that although at a cursory glance the country appears to be one vast forest, the great mass of the timber growth is practically worthless, and

for commercial purposes wholly so."
"Of course a steamer's deck is a
poor place to judge of the timber resources of a country; but enough could be seen to enable an expert to form a fairly correct opinion when continued with such personal exam-ination as is possible by going into the woods at the various landings. "As an almost universal fact the

country stands on end, the mountains rising from the water's edge precipitously. In but few instances are there to be seen any low lands, and these are seldom more than from a few rods to a mile before the steep ascent of a high mountain is encour tered. The vast number of small dead trees sprinkled through the green foliage betoken a thin lightness of soil over the rocks, which effectually forbade the idea of any very large and mature growth, while the rocky promontories of nearly every hill slope were sufficient to convince any lumberman that it would be im possible to use teams among the timber, if valuable timber could be found.

"After leaving Seymour narrows, at the head of the Gulf of Georgia, there was but little appearance in-dicative of timber of commercial value. My attention was called at several points to what the inhabitants called 'first-class timber,' but ! must confess to my disappointment in saying that I did not see a first class tree during my journey after leaving the head of Vancouver island. At Wrangel I saw what was considered first-class spruce in the yard of a new mill there building, but it was not the first class of Puget sound or of the east. If the world of the future is to depend upon Alaska for its timber supply, it must rest content with a grade of timber which is not now considered merchantable in average lumber markets. That there are a few good trees scattered among the scrubs cannot be doubted, but I could learn nowhere of any claim that there was more than a few hundred acres in a place of what the in habitants call 'good timber.' "

To old persons and those who fear to derange their stomachs Simmons Liver Regulator presents itself as a most admirable remedy. Owing to its mild action it can be taken by the weak and debilitated at all times and under any circumstances with perfect safety. One of the most venerable of the U. S. Senate, the late A. H. Stephens, of Ga., said "Simmons Liver Regulator is mild and suits me better than more active remesuits me better than more active reme

Be loyal to death to those who have befriended you.
