Some very interesting tests of woods native to Washington and Oregon, and others native to other timber sections of the country, were made recently at the Northern Pacific car shops at Tacoma. The purpose was demonstrate the relative strength of the woods.

There were present at the tests Master Mechanics Warner and Phipps, of the shop, Engineers Lund and Haines and architect C. B. Tal-The timber was subjected to an ac

tual breaking, on sticks 2x4 inches and four feet long, to centers, being one-fourth as long, thick, and wide as an actual stringer as used by the railroad company in its trestle bridges. The test is important as there seems to have but little information on that subject, and the impression has been that ordinary oak was stronger than fir. The tests show, however, that yellow fir is actually one-third stronger than eastern oak, and more than-half stronger than eastern white pine. The breaking weight, placed squarely in the middle

of each stick, was as follows: No. 1. Old piece of yellow fir from yard, having decayed ends, six years in the weather, 3063 pounds. No. 2. New soft piece fine-grain yellow fir, similar to the best flooring

timber, 3062 pounds. No. 3. Old piece yellow fir, coarse grain and hard, broke short at 4,320 pounds.

No. 4. New piece from butt of tree, broke with a stringy fracture at 3,635 pounds. No. 5. New piece Michigan white pine, soft and clear, broke short at a weight of 1,610 pounds.

No. 6. New piece Michigan oak broke nearly short off at a weight of

2,428 pounds.
All of the pieces of wood were subjected to the same clear span of 3 feet 9 inches, and the weight applied exactly in the middle.

As to the deflections the following notes were made: Nos. 1 and 2, half an inch, No. 3, three-eighths of an inch, No. 5, one-fourth of an iuch, No. 6, one and one-eighth of an inch.

GUARD AGAINST THE STRIKE, And always have a bottle of Acker's English Remedy in the house. You cannot gish Remedy in the house. You cannot tell how soon Croup may strike your little one, or a cold or cough may fasten itself upon you. One dose is a preventive and a few doses a positive cure. All Throat and Lung troubles yield to its treatment. A sample bottle is given you free and the Remedy guaranteed by J. W. Conn, Druggist.

Some one suggests that if clergy-men would divide their sermons into two parts, and have a hymn or an anthem sung between the parts, it would be a good thing.

A DUTY TO YOURSELF.

It is surprising that people will use a common, ordinary pill when they can secure a valuable English one for the same money. Dr. Acker's English pills are a positive cure for sick-headache and all liver troubles. They are small, sweet, easly taken and do not gripe. J. W. Conn, Druggist.

Connecticut makes the most clocks

Hemorrhage.

LOOK OUT FOR FIRE.

To Theater Owners, Managers and Whom May Concern: May Concern:

This is to certify that I have equipped the Windsor theater in this city with the Lindgren stationary chemical fire engines. After examining all other systems of fire protection, and atter repeated tests of the Lindgren stationary chemical fire engine, and upon the recommendation of the insurance under-writers, I have no hesitation in pronouncing it the cheapest and most powerful, as well as perfect, fire protection for theaters ever invented. In my opinion every theater ard opera house in the United States, as well as Europe, should be equipped with these chemical fire engines, and thus save the loss of life and thousands of dollars in property.

(Signed) H. I. GOLDY.

Owner Windsor Theater, Chicago, Ills.

See What a Practical Fireman Says. Tucoma, Wash., Sept. 19, 1889,

To Whom it May Concern:

This is to certify that I. George A. Burbank, witnessed the exhibition of the Lindgren chemical engine test to-day, and as I have witnessed a great many such chemical tests in New York City. Boston, Mass., and other large cities in the East, I hereby state that it was the quickest and most satisfactory test, and was also pronounced so by two of our councilmen and all the citizens present, and I will also state that the time of applying the chemical was left entirely to me and I did not give the word until the fire was well started, for in other tests I have witnessed they have always put the chemical on the minute the fire was started and water would answer just as well, as there was nothing but the flame started and the wood not charred, and I take great pleasure in recommending the "Lindgren" as far superior to any other "Chemical" engine os the market,

Secretary Paid Fire Department,
