#, to 3 P. M.

A pretty good joke is told of one of the young lady teachers in the Baker On Monday a small urchin school. entered the school room, with an ex-quisitely dirty face and hands. The teacher bade him go and wash himself. In a few minutes the boy re-turned with his hands nicely washed and wiped. His face also had been washed, but only the lower portion had been wiped dry, the rest of his face dripping with water. He was told to return and wipe his face, said: "But teacher, I can't." Naturally surprised, the teacher asked why he could not follow her instruction, in asmuch as he had succeeded in washing his face and hands and wiping ing his face and hands and wiping them so nicely, as far as he had gone. The small boy answered, while the big tears ran down his cheeks; "My shirt ain't long enough." The answer was followed by silence, succeeded by a supressed titter. The young lady was so embarassed that she can't look at a bolt of sheeting without blushing up to her ears.—

LOOK OUT FOR FIRE.

To Theater Owners. Managers and Whom it May Concern:

This is to certify that I have equipped the Windsor theater in this city with the Lindgren stationary chemical fire engines. After examining all other systems of fire protection, and after repeated tests of the Lindgren stationary chemical fire engine, and upon the recommendation of the insurance under-writers, I have no hesitation in pronouncing it the cheapest and most powerful, as well as perfect, fire protection for theaters ever invented. In my opinion every theater and opera house in the United States, as well as Europe, should be equipped with these chemical fire engines, and thus save the loss of life and thousands of dollars in property.

To Whom it May Concern:

This is to cartify that I, George A, Burbank, witnessed the exhibition of the Lindaren chemical engine test to-day, and as I have witnessed a great many such chemical tests in New York City, Boston, Mass, and other large cities in the East, I hereby state that it was the quickest and most satisfactory test, and was also pronounced so by two of our countilmon and all the citizens present, and will also state that the time of supplying the chemical was left entirely to me and I did not give the word until the fire was well started, for in other tests I have witnessed they have always put the chemical on the minute the fire was started and water would answer just as well, as there was nothing but the flame started and the wood not charred, and I take great pleasure in recommending the "Lindgren" as far superior to any other "Chemical" emine on the market.
