LOOK OUT FOR FIRE.

Theater Owners, Managers and Whom i May Concern: May Concern:

This is to certify that I have equipped the Window theater in this city with the Lindgren stationary chemical fire engines. After examining all ether systems of fire protection, and after repeated tests of the Lindgren stationary chemical fire engine, and upon the recommendation of the insurance under-writers, I have no hesitation in pronouncing it the cheapest and most powerful, as well as perfect, fire protection for theaters ever invented. In my opinion every theater and opera house in the United States, as well as Europe, should be equipped with these chemical fire venience, and thus save the loss of life and thousands of dollars in property.

Respectfully.

Taronas, Wash., Sept. 12, 1889,

To Whom it May Ceneers;

This is to certify that I, George A, Burbank, witnessed the catibilition of the Lindares chomical engine test to-day, and as I have witnessed a great many such chemical tests in New York City, Boston, Mass., and other large cities in the East, I hereby state that if was the quickest and most satisfactory test, and was also probaunced so by two of our councilmen and all the citizens present, and I will also state that the time of applying the chemical was left entirely to me and I did not give the word until the fire was well starred, for in other tests I have witnessed they have always put the chemical on the minute the fire was started and and water would answer just as well, as there was nothing but the flame started and the wood not charred, and I take great pleasure in recommending the 'Lindgren' as far superior to any other 'Chemical' engine on the market.
