LOOK OUT FOR FIRE.

To Theater Owners, Managers and Whom it May Concern: May Concern:

This is to certify that I have equipped the Windsor theater in this city with the Lindgren stationary chemical fire engines. After examining all other systems of fire protection, and after repeated tests of the Lindgren stationary chemical fire engine, and upon the recommendation of the insurance under-writters. I have no hesitation in pronouncing it the cheapest and most powerful, as well as perfect, fire protection for theaters ever invented. In my opinion every theater and opera house in the United States, as well as Europe, should be equipped with those chemical fire engines, and thus save the loss of life and thousands of dollars in property.

(Signed)

If I. GOLDY.

Owner Windsor Theater, Chicago, Ills.

See What a Practical Fireman Says. " Tacoma, Wash., Sept. 18, 1889, To Whom it May Concern : North Pacific

To Whom it May Concern:

This is to certify that I, George A, Burbank, witnessed the exhibition of the Lindgren chemical engine test to-day, and as I have witnessed a great many such chemical tests in New York City, Boston, Mass., and other large cities in the East, I hereby state that it was the quickest and most satisfactory test, and was also pronounced so by two of our councilmon and all the citizens present, and I will also state that the time of applying the chemical was left entirely to me and I did not give the word until the fire was well started, for in other tests I have witnessed they have always put the chemical on the minute the fire was started and water would answer just as well, as there was nothing but the flame started and the wood not charred, and I take great pleasure in recommending the "Lindgren" as far superior to any other "Chemical" engine on the market.

Signad) GEORGE A BURBANK

ren" as far superior to any other ngine on the market, (Signed) GEORGE A. BURBANK, Secretary Paid Fire Department, Director of the Northwestern Fire Association.
Was last year Secretary of the Northwest-ern Fireman's Association.

The above engines are made in one, three and five-gallon sizes for hand use; sixty-gallon single tank on two wheels, two eighty-gallon tanks on four wheels, slxty, one hundred, three hundred and five hundred-gallon stationary; other sizes made to order. For further particulars, call on or

Where the Wild Fowl Go.

Until the acquisition of Alaska by the United States it was a wonder where certain wild fowl went when they migrated from temporate climes on the approach of summer, as well as snow birds and other small species of the feathered tribe. It was after ward found that their babitat in summer was the waters of Alaska, the Yukon river and the lakes of that hyperborean region. A reporter lately interviewed C.J. Green, of Norton Sound, Alaska, and he confirms the the statement of Dall and others. People wonder where the wild fowl come from," said he. "They see the sandhill crane, wild goose, heron, and other fowl every spring and fall. pursue their unwearied way, but like the wind, they do not know whence they come or whither they go. Up on Golovine bay, on the north shore of Norton sound, is the breeding place of these towls. All the birds in creation, seemingly go to that country to breed. Geese, ducks, swans, and thousands upon thousands of sandhill cranes, are swarming there all the time. They lay their eggs in the blue-stem grass in the lowlands, and if you go up the river a little way from the bay the noise of the wild fowl is almost deafening. Myriads of robins and swallows are there, too, as well as millions of magnificent grouse, wearing red combs and feather moccasins. This grouse turns as white as snow in winter. You can kill dozen, of jucy teal ducks or grouse as fat as butter balls, in a few moments. The wild fowl and bears live on salmon berries and huckleberries, with which all the hills are literally covered.
