

The Daily Astorian.

ASTORIA, OREGON: SATURDAY, NOVEMBER 30, 1890.

The S. F. Alta is still lying about poor old dead and gone John Rouch. Same old lies, too.

The Albany and Astoria railroad has \$2,000,000 behind it, and in front of it, and is a sure thing.

The mud is a foot deep in the streets of Tacoma. On Astoria's streets, there is no mud in winter, and no dust in summer.

A BAKER CITY man has got himself into trouble by marrying two wives. Lots of men have got themselves into trouble by marrying one.

The father of Gibbs, the murderer of young McDevitt, is worth \$60,000. That settles it. If the old man will put up enough, Gibbs will never hang.

The editor of a Madrid newspaper has been created a marquis by the Queen of Spain. If he was already a knight editor this is only in the line of promotion.

A CHICAGO girl was cured of rheumatism the other day in a miraculous manner. When discovered she was standing on the parlor table. A mouse can sometimes do more than Christian science.

Is the coming congress, the Pacific coast will have seventeen representatives, with voices and votes. In the last session, there were but fourteen. The additional three come from the new state of Washington.

On October 31, 1889, there were in existence in the United States 3,319 national banks, the largest number in operation since the inauguration of the system. These associations possess an aggregate capital of \$629,174,265.

The biggest bore in the world, has at last been located. It is at Schladebach, a small German village, near Liepsic. It is 5,755 feet deep. The man that comes in and wants to see the Bangtown Bore, or the Tipton Tooter, will now have to take a truck seat.

The disastrous fires at Lynn and Boston, Mass., this week, recall the terrible conflagration in Washington last summer. The total annihilation of so much property is a serious loss. This has been a terrible year for fires and general disaster in all parts of the country.

Some scientifically inclined Port Haron boys fastened one end of a copper wire to an electric light wire and the other end to the tin cup at the public drinking fountain. The result was that some shocking drinks were hoisted in that day and the police are now looking for the boys.

CONGRESSMAN WILSON, of Washington, is preparing a bill to reduce the land office fees of Washington, Oregon, California and other western states to conform with those further east. He thinks the fees are altogether too high and should be reduced and made uniform throughout the United States.

A FIRM of fish-dealers trading between New York, Berlin and Hamburg has been experimenting in a new mode of shipping fish. The fish are caught in Alaska, frozen and forwarded to Germany via New York, packed in certain liquids. The first lot has arrived in good condition. The fish are canned in Germany, thus saving the duty on canned goods.

TELEPHONE EAR. A New Disease That is Attracting Some Medical Attention.

You have a telephone ear. You may not know it, but you have all the same. It is the left ear, for it is on record that only a very small percentage of men and women use the right ear at the telephone.

As a matter of fact, the telephone has suddenly come into prominence as a medical proposition, and unless the scientists are mistaken the bulk of men and women who use the telephone within a few years may expect to find themselves rather hard of hearing in the left ear. This is because when using the telephone every muscle and nerve of the ear is strained to catch the faintest sound from the person speaking at the other end.

An eminent eye and ear specialist, was asked the other day if he had heard of any cases of deafness from the telephone.

"It is rather difficult to state exactly," he replied, "I have seen where the repeated sound of any instrument or the repetition of any sound has caused deafness. Telegraph operators are in danger of injuring their sense of hearing. Boiler makers often suffer from deafness. In the construction of boilers it is necessary for one man to be inside the boiler and the other outside, and the incessant noise caused by the riveting of the boiler always causes either deafness or an affection of the ear. As to the telephone, it no doubt has the same effect. It is natural and reasonable to suppose that a person listening for a sound, and not knowing the amount when it will come, may injure the membrane of the ear, and in time this might affect the hearing power."

A SERIOUS BLUNDER. A Lady Nearly Prostrated by a Patent Medicine.

A lady well-known in the Western Addition has been a great sufferer for years with indigestion and dyspepsia. Struck with the testimonial praising Joy's Vegetable Sarsaparilla, she sent for a bottle. The druggist, not having it, talked them into taking another sarsaparilla. As the leading sarsaparilla was the natural blood purifier, the effect of the emptying of iodide of potash into a stomach already distressingly delicate was disastrous, almost prostrating her before the mistake was rectified. She then called upon Mrs. Fowler, of 227 Ellis street, whose name was among those cured by Joy's Vegetable Sarsaparilla.

Mrs. Fowler said it was true that it had cured her. Again reassured, the vegetable compound was sent for and gotten. The gentle action of its vegetable stimulants upon the liver, kidneys and digestive organs, and its warm stomach tonic, were the very things needed, and she began improving and was her old self within a fortnight. This sounds like fiction, but the names can be given if necessary.—San Francisco Examiner.

ADVICE TO MOTHERS. Mrs. Winslow's SOOTHING SYRUP should always be used for children teething. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for diarrhoea. Twenty-five cents a bottle.

Weinhard's Beer. And Free Lunch at the Telephone Saloon, 5 cents.

The Cause of The Big Boston Fire.

Electric Light Wires Set the City on Fire.

Boston, Nov. 29.—The burned district to-day presents a scene of desolation. A portion of the fire department spent the entire night and this forenoon quenching the remnants of the big blaze, while weary officers are still guarding the ruins. Incoming trains are packed with sight-seers. The walls of some of the gutted buildings are in a very dangerous condition. Gangs of men have already begun tearing away the debris. Nearly all the burned-out merchants have made arrangements to occupy other stores at once. Among the spectators at the ruins to-day were 500 girls employed in the T. Y. Crowley book bindery, many of whom are the main support of families and who have no means of subsistence. Two more firemen are reported missing. They are believed to be in the ruins of the Brown and Durrely building.

HOW IT WAS CAUSED. NEW YORK, Nov. 29.—A Boston dispatch says that yesterday's fire was caused by the crossing of an electric light wire and the wire of the Electric Time company. All clocks on the Electric Time company's line stopped at 6:48, the wires being burned out at their connections with the clocks, causing incipient blazes at many places, including the city hall.

A TRAGIC OCCURRENCE. LYNN, Mass., Nov. 29.—William F. Sartelle, a performer in a dime museum, last night was performing a trick with a rifle which he apparently loads with a leaden bullet. At his request some one shoots at him, he appearing to catch the bullet in his mouth.

It failed to substitute a paste board bullet, and William Flanigan, who fired the gun, shot Sartelle dead.

MADE A BAD JOB OF IT. GUELPH, Ontario, Nov. 29.—W. H. Harvey, who in March last murdered his wife and two daughters, was hanged this morning. The execution was one of the worst pieces of bungling ever witnessed. The weight which lifted the body was not heavy enough, and the scaffold was not high enough to give sufficient room for the condemned man's neck and his struggles and contortions as he slowly strangled to death were frightful.

To add to the horrors of the scene the knot slipped and the guilotine in the man's throat, as his life was being choked out could be heard outside the jail walls.

FROM THE WESTERN METROPOLIS. PORTLAND, Or., Nov. 29.—This morning a young man employed by the Mount Tabor Motor company, essayed to switch a passenger car on Mount Tabor heights, but the brakes refused to work and the car got away from him, running down the hill about forty rods, into and through the engine house, knocking two sides of the building out.

THE "SASQUOY." The new steamer Sasquoy will doubtless be taken out of the yard to-morrow afternoon, on her trial trip. Such is the present calculation and the programme will be carried out unless something unexpected should occur.

Captain J. W. Tromp, port master of the Oregon Railway and Navigation company, will preside at the wheel, and Hon. George W. Wood, for the company, will pull the throttle. The course will be down to the mouth of the river and return. The officials of the company are highly pleased with the steamer as she now runs. Her furnishings are elegant in every respect and her exterior arrangements and decorations are quite elaborate. The arrangement of her state rooms and general passenger accommodations is excellent. After her formal acceptance the next step will be to take her around to the Sound and return home. It has not been decided when the trip will be made, but it is definitely known who will take her, but in all probability it will be Captain Geo. Wood the master who became famous in this locality on the Alaskan when she was wrecked.

A Woman's Discovery. "Another wonderful discovery has been made and that too by a lady in this county. Disease fastened its clutches upon her and for seven years she withstood its severest tests, but her vital organs were undermined and death seemed imminent. For three months she coughed incessantly and could not sleep. She bought of us a bottle of Dr. King's New Discovery for Consumption, and was so much relieved on taking first dose that she slept all night and with one bottle has been miraculously cured. Her name is Mrs. Luther Lutz." Thus writes W. C. Herrie & Co., of Shelbyville, N. C.—Get a free trial bottle at J. W. Conn's Drug Store.
