culties has long been, and still is, Ayer's Cherry Pectoral. It cures Croup, Whooping Cough, Bronchitis, and Asthma; soothes irritation of the Larynx and Fauces; strengthens the Vocal Organs; allays soreness of the Lungs; prevents Consumption, and, even in advanced stages of that disease, Barbour's Salmon Net Twines. There is no other preparation for diseases of the throat and lungs to be compared with this remedy.

"My wife had a distressing cough, with pains in the side and breast. We tried various medicines, but none did her any good until I got a bottle of Ayer's Cherry Pectoral, which has cured her. A neighbor, Mrs. Glenn, had the measles, and the cough was relieved by the use of Ayer's Cherry Pectoral. I have no hesitation in recommending this

Last spring I was taken with a violent cough, which threatened to terminate my days. Every one pro-nounced me in consumption. I deter-mined to try Ayer's Cherry Pectoral. Its effects were magical. I was immedi-ately relieved and continued to improve until entirely recovered."—Joel Bullard, Guilford Coun. Guilford, Conn.

"Six months ago I had a severe hemorrhage of the lungs, brought on by an incessant cough which deprived me of sleep and rest. I tried various remedies; but obtained no relief until I began to take Ayer's Cherry Pectoral. A few bottles of this medicine cured me." Mrs. E. Coburn, 19 Second st., Lowell,

NEW WAY TO CATCH FISH

Scheme For Establishing A New Industry.

"This is a great country for schemes," remarked Superintendent Horner of the Northern Pacific yes-terday with a humorous twinkle of the eye that indicated another of those wonderful projects for which this gentleman is becoming famous. "You know," he continued, "that seals can be trained to perform almost any-thing required of them. Sea gulls also are susceptible of domestication and training, and in some places they

and training, and in some places they are taught to fish for their owners. The modus operandi is to tie a string around the pouch under here (indicating the throat) and then when they catch a fish and return to their masters it is easily squeezed out. In this way fish weighing ten or twelve pounds are are obtained. Now if seals and gulls can be trained and made useful, why cannot other sea animals as well. You know that when the salmon begin running here in the fall the water is full of them and you can see a hundred of them jumping from the water almost any time. The fishermen get all they can with their nets and a hundred boats can be seen on the water.

Now when the almon come in the whales always follow them into the Sound for they live on these fish. The scheme I was thinking of is this and I think it is practicable, too. Besides it would require scarcely any capital. Why not catch the whales, tame them and teach them to fish, doing with the salmon the way teach

us and agreed for the sum of \$75 each to locate us on a very fine body of timber lands. We arose to the fly, and caught on. He took us out about thirty five miles from here on the Clackamas river, and showed us the finest piece of timber land I ever saw. We paid him \$300 for putting us on what he said was section 18, in township 4 south, range 6 east. We filed upon it and published our notices and began by degrees to see millions in it. Shortly after he located us. DePuter was ar-rested by a crowd whom he took on a wild goose chase to Astoria. This set wild goose chase to Astoria. This set our heads to itching and we concluded that it was just possible that we had been gouged, so last Thursday we employed two surveyors to go out and report upon the land. They found section 18 to be a burnt piece of land, fully three miles from the piece we looked at. The timber we were shown has never been surveyed. When our has never been surveyed. When our
