

A TERRIBLE VOLCANO IN JAPAN.

Heavy Losses of the Cattlemen in California and Nevada.

INTERESTING PORTLAND NEWS.

SAN FRANCISCO, Feb. 12.—J. C. Nathan, of Eureka, Nevada, is in the city. He states that in traversing eighty odd miles of a narrow gauge railroad from Eureka to Palisade, which is on the line of the Central Pacific, he saw the carcasses of about two hundred dead cattle. He says he had heard of the loss of thousands of animals, occasioned by the deep snow and consequent scarcity of feed, and that he considered that the statements will be authenticated. It is believed that the losses of the cattlemen would be over 75 per cent. in the state.

Simon Wenham, a cattle owner from Cortez valley in eastern Nevada, also expressed himself in the same manner. Among other cattlemen now here are Levi Hamilton, of Reno, and Wm. H. Heabart, of Granite creek. They agree in the opinion that the losses are very heavy.

D. M. Wightman, cattleman of Wadsworth, Nevada, who has just arrived here says that the weather has moderated during the last few days, and warm west and south winds have been taking off the snow rapidly. It is pretty deep yet in eastern and northern Nevada, but about Elko and other valleys in the central part of the state it is going fast. He says that the cattle nearly all over the state, with the exception at the beginning of the winter, and feed and water were both scarce, and this is the reason of the heavy losses. He does not think, however, that the loss will reach 50 per cent, and says that sheep owners have suffered a good deal more than cattle men. He estimates the loss of the former at 75 per cent.

"Gov. Murray is receiving congratulations of all of this city who are in sympathy with anti-Mormonism."

An Unusual Volcanic Eruption in Japan.

SAN FRANCISCO, Feb. 12.—The steamer *Helle* arrived from Hong Kong and Yokohama, late last night.

Japanese advices give the following details of a terrible volcanic eruption which occurred recently in Japan: Mount Zou, near the town of Fukuyama, Bingo district, commenced to rumble at eight o'clock on the evening of January 16. This continued for two hours, followed by a short cessation, during which period the inhabitants of the neighboring villages rushed away from their homes in great confusion. Soon the top of the mountain lifted off; the air was equal to a dynamite explosion, sand and stones were belched forth, falling in the neighborhood of Fukuyama, where smoke and fire were also blown by the wind. At the entrance to the town the ground was covered with sand and earth to a depth of over a foot. No previous eruption of Mount Zou is recorded.

Only one man lost his life, but some stock was killed and fifty-five houses were destroyed. The losses estimated to be nearly \$3,000,000.
