STYLIE About You! Ever so many years ago when butlers were still an unknown quantity, and the duds of that day knew naught of cigarettes and making love, there was no such a thing as style, or what style there was one could easily condense into a bandana handkerchief, consequently the storekeepers of that day had an easy time of it. A few dozens of sandals and some fig leaves were their only stock in trade, and they never bothered their ancient heads about advertising the latest styles of fig leaves.

THE DEPARTURES FOR THE ALASKA canneries, of steamers and other vessels bearing large quantities of materials and great numbers of men, from here for the next two weeks will be very large. At least 2,000 sailors and fishermen besides thousands of cannerymen, will be required for the Alaska business, and now that the surplus of coast sailors has been worked off the steamers and other vessels engaged in ordinary traffic, are beginning to experience the inconvenience of a scarcity of men. The whole water front is affected by the loading and preparations for departure of these Alaska craft, but there is no belief expressed that this condition of affairs will cause any further advance in sailor's wages.—S. F. Alta, 21.
