Wonders of the Sea.

Oceans occupy three-fourths of the earth's surface. At the depth of 3,500 feet the waves are not felt. The temperature is the same, varying only a trifle, from the poles to the burning sun of the equator. A mile down the water has a pres

Taking the average depth of the oceans of the world to be three miles, there would be a layer of salt 230 feet thick over the entire bed should the The water of the ocean is colder at

His Long Experience as a Showman and Minstrel

Interesting Stories and Incidents.-Thirty Years on the Stage

Thinking the readers of THE MORNING ASTORIAN would like to know the many and varied experiences of show life, a reporter called on Mr. Arlington (or as he is more familiarly known "Billy" Arlington) at his rooms in the Occident yesterday and found the "Merry Minstrel" willing to give the public any information that would be interesting.

A DREAM.

About five years ago, the town of Canton, in the eastern part of Ken-tucky, was thrown into great excitement by the discovery that a horrible murder had been committed. I say horrible advisedly; for no one but a fiend could have perpetrated such a revolting deed.

As far as I could learn, the particu As far as I could learn, the particulars (I only arrived at the place a week subsequent to the discovery) were as follows: One Simeon Carruthers, a well-to-do farmer, was found literally hacked to pieces in his own yard, and with his own ax. The local authorities could discover nothing except the motive, which was theft. A coroner's jury found that death re-sulted from injuries inflicted by some person or persons unknown. The governor offered a reward of \$500 for the apprehension of the murderer. By profession I was a detective,

and as business was dult in our line at the main office, I secured leave of absence, and traveled down to Canton to see if I could earn the reward. I had learned absolutely nothing after having been in the town for three weeks, and was about to give it up when I came across a triffing clew; but, as I had before discovered in my

professional career, it always paid to follow up the slightest thread. I was in the town as probable purchaser of Simeon Carruthers' estate and that gave me the best excuse to loiter about the farm and house. I have neglected to state that his next son, Bobby Newcomb, Cool Burgess, of kin was a nephew who lived in and Harrigan and Hart were at times Maryland, and had come to Kentucky and a half bales, cotton mills have doubled in number, and that section produces five times as much pig-iron as it did ten years ago.

The Kennebec river ice crop last year amounted to nearly 800,000 tons. This year it will be double. It costs from 18 to 25 cents a ton to gather it, and sells for cash at \$3 a ton, or \$4 paid for contracts to deliver on time.

fanciful.

I dreamed that I had sat up late over some accounts, and fell asleep in my chair. Suddenly I awoke to find a man standing beside me. I noticed him closely. He was a large fellow, weighing not less than two hundred pounds. I noticed particularly that the third finger of his left hand was missing, and a sear ran account to bridge of his nose; his other features were indistinct.

I made up my mind instantly that his purpose was robbery, as I had drawn a large sum of money from the bank in large sum of money from the large sum of money from the bank in large sum of money from the large sum of mon

Upon further investigation I found that Carruthers had been in Louisville four days prior to his death and drawn all his cash from the bank-about \$2,300. This

ordinary assassin.

To make a long story short, I discovered that the paying-teller had noticed, directly behind Mr. Carruthers when he drew his money, a man who, the moment Carruthers turned whose lights are fled, whose garlands dend.

And all but him departed.

The great minstrel will give one of his inimitable performances, ably assisted, at Ross' opera house to-morrow night.

The moment Carruthers turned aside to count it, presented a \$10 bill with the request to have it changed. The noticeable feature of this man was an ugly scar across the bridge of his nose. "Verily," thought I, "if I can catch the man of the scarred nose he will swing."

But after getting thus far in the case all my luck seemed to desert me. For weeks I vainly searched for that man. I was in despair and at last gave up all hope of ever ferreting out the case, concluding to go to St. Louis on a job

Having plenty of time on my hands, I made my way leisurely to Cincinnati, move all eraptions from the skin, chafing, etc., and greatly refresh and soothe.

cards with a few choice spirits when
the boat stopped at a small landing,
and several passengers came on board.
One of them almost immediately

joined in the game. I did not notice

"All for nothing!"
The instant his hat went back I recognized my man, for there was the sear; and as his hands went down, the left one showed a-missing finger. It was only the work of a moment to secure him by handcuffs. He made no resistance, but, of course, my sum-mary method of dealing aroused the other men. They calmed down quick-ity however, when I showed them my ly, however, when I showed them my badge and told them I had arrested a

murderer.

At the sound of this ugly word the man sprang fiercely to his feet and demanded to know who called him that. I answered him quietly, and, to make assurance doubly sure, told him the story of the murder as I imagined it to have been done. At the cod of two residue he was a self-conend of my recital he was a self-con-victed man. Great beads of perspira-tion stood out on his hands and forehead, and his first question was:

"Did you see me?" That was sufficient evidence, supported by the testimony of the three men who had heard the question. He afterward made a confession which tallied so closely with the dream of Mr. Carruthers that it has made me a firm believer in visions.

The money which was won of the murderer was the same he had stolen, and we therefore returned it to the
