What an interesting volume, says the New York Star, the life of A. Miner Griswold would make! He is the last of the first generation of American humorists, having come into prominence under the quaint title of "The Fat Contributor," when Artemns Ward had just sprung into fame. At that time Bret Harte, John Hay, Mark Iwain, Max Adler and Petroleam V. Nasby were unknown. Un-tike most writers of fun, Griswold seems never to have jost his grip, and ses as much work to day as he did thirty old years ugo. Saved by Her Hair.

A curious freak of lightning during a recent storm was played on a woman named Ellen Barnes, a laundress, living in the suburbs of Petersburg, Pa. She had stepped to the door and stood holding it ajar, watching the storm, when she was struck by lightning and knocked senseless. A neighbor saw the woman and ran to her assistance, and succeeded in resuscitating her after some time. Though unable to speak for hours, she was apparently unhart by the Every time you cut off a piece of beefshock, but a part of her hair steak and pass it to your wife, I want was turned a dazzling white by the electricity and killed to the very ing that beef with her teeth, nor with roots. The Longest Day.

It is quite important when speaking of the longest day in the year to say what part of the world we are talking about, as will be seen by reading the following list, which tells of the longest days in several places. How un-fortunate are the children in Tornea, Finland, where Christmas day is less

than three hours in length: At Stockhold, Sweden, it is eighteen and one-half hours in length. At Spitzbergen the longest day three and one-half months. At London, England, and Bremen,

Prussia, the longest day has sixteen and one-half hours. At Hamburg, in Germany, and Dantzig, in Prussia, the longest day has seventeen hours.

At Wardbury, Norway, the longest day lasts from May 21 to July 22,

without interruption. At St. Petersburg, Russia, and Tobolsk, Siberia, the longest day is sole surviver of the seventh generation nineteen hours and the shortest five of John Endicott's descendants.

At Tornea, Finland, June 21st brings a day nearly twenty-two hours long, and Christmas one less than three hours in length. At New York the longest day is about fifteen hours, and at Montreal, Canada, it is sixteen hours.
