DISCUSSION CLOSING TUESDAY.

### GEN BUTTERWORTH BELIEVES

He Believes in a Modified Form of Tariff.

Special to THE ASTORIAN.

WASHINGTON, May 13.—This morning the house resumed discussion on the tariff bill. Butterworth (Republican) spoke at considerable length. The Democrats frequently applauded his remarks, and at the expiration of his time asked unanimous consent that he might continue. He said that there was great danger that protection might be so distributed that certain industries would prove highly successful at the expense of others. (Democratic applause) He criticized the tariff articles of agriculture imported from Canada. Our manufacturers do sell cheaper to people of other countries than to the people of the United States. (Great applause on the Democratic side.)

He doubted the propriety of high duty on tin plate while country favored reduction of duty on sugar. He should not favor contrary system. He favored a moderate reduction of the sugar tariff. He closed by reiterating his earnest belief in the general protective system.

Word was also received that the Ohio and Mississippi quoted the same rate. Last night Cincinnati and St. Louis, though no explanation of the reduction could be learned.

Early in the day, the Burlington met \$10 from Kansas City to Chicago, but later countermanded the notice. All agree that the season of \$1 rates is the only way out of the difficulty.

### William Nye.

His Quaint Acquaintance With Astoria.

REMINDED OF HEIDELBERG.

Astoria sits enthroned at the mouth of the mighty Columbia. She is a good town and reminds me some of Heidelberg. We played there against the Salvation army and Smith's bile beans. The Salvation army on the coast this spring is doing rather a rocky business. They are mostly carrying on a guerrilla warfare in their business. They seem to be on neutral ground, giving most of their attention to supplies. Instead of doing a general devil-defying street act and trying to scare old Satan by means of a tambourine and two homely women, why don't they take to washing occasionally, including their own?

When they know the great adversary of souls as well as I do they will not try to scare him with cross-eyed women or hire him and his hosts by beating the tambourines, the sackcloth and the landlord. Humanity, charity, soft soap and unselfishness will do more toward giving Satan "that tired feeling" than all the loud and onion flavored hosannas of misguided men and leading the women to seek to harass the hosts of hell with a bass drum while their own children, with empty stomachs and unalloyed noses, weep at home.

But I was speaking of Astoria. I bought a peculiar lot there with pockets in it and brackets for holding farm implements. Astoria was settled in 1811 by Mr. Astor, whose family are said to be people of means. His descendants live in New York, and are among our best people. The Astors and the Nyes are quite thick. They often borrow dishes of us when they have company come in suddenly on them. While our ancestors were catching "mushrats." The elder Astor was prospered, however, more than the elder Nye, for when petroleum began to squirt through the ground our folks had to hire out to Captain Kidd, while the Astors did well in the fur, pelt and green hide business.

Astoria is really a good city and shows much thrift and enterprise. The Astor family would do a very commendable act by establishing a library or some permanent institution there worthy of themselves and the thriving town. There are 9,000 people in Astoria. The canned salmon is caught all along here and the low soil of the steamer wharves from the rich green velvet moss which upholders the high steep bank, while ever and anon the wail of the sawmill calls forth the sympathetic tears of the highly saturated sky, and the beautiful hills in their fir-timmed garments give back an answering sigh.

While I was there the president issued his annual message, warning the seal poachers to go right away from the coast. By law he has to do this every year or lose his pay. I wish I could get a chance to write a message for the president, one year, or still better, prepare the speech of the queen for parliament. Just one would do me. I presume it would also do everybody else. But it would possess its merits. I would write a speech for the queen which, if she could memorize it and get some good elocutionist to fix some suitable gestures for it, would attract the attention of the world.

Instead of giving the long whiskered and rather trite facts about being at peace with the various foreign dynasties that I have married into, I would give a whole lot of bright family gossip such as must come to the ear of an old lady in such a position of trust and confidence as she occupies, and I would write in little society notes and a department called "The Man About Town." By law he has to do this every president, too, is open to criticism. Local hits on Washington would make the document far more juicy and generally read. Instead of going on to write six or seven columns of nonpareil advice and suggestions to everybody as to what to do during the coming session, I would boil it down to five lines by saying:

"Gentlemen, you may go home and do your electioneering if you please, instead of coming to Washington to do it. Leave your address with me and I will see that your salaries are sent to you."

The salmon industry is not so profitable now as it used to be. The cost of salmon to cost 25 cents now costs \$1.25 to the cannery, so it is a question with them whether they can or not. Yet I suppose that after a certain manner, a man might do well in a salmon cannery.

All styles of business, however, on the river and Sound seem to be doing well. If we do not mention the canneries, there are the pinneries, tanneries, fisheries, eateries, drinkeries and town lotteries. I do not know how the real estate men in Astoria are, but certainly their lots, many of them at least, lead an upright life.

I just heard of a young man in Portland who came up with us on the steamer *California* along with other things. He bragged a good deal in social circles after he got home, about how good a sailor he was, and made

### RETURN OF THE "MANZANITA."

A Successful Cruise Down the Southern Coast.

Last evening at 6:30 o'clock the light house steamer *Manzanita*, Capt. Richardson, returned from a trip down the coast, where she has been employed in setting new buoys, changing and resetting others. Capt. W. W. Rhodes went on the steamer and inspected the light house station in that portion of his department, leaving at Yaquina Bay last Friday morning and returning to Portland by rail.

Mr. Brownlie, superintendent of construction of this district, also was on board and attended to his official duties, leaving the vessel on Wednesday at Yaquina bay and going overland to Portland.

On Friday morning, the 31 instant, and proceeded south to Tillamook rock light house, where they landed keeper Hunt and the mail, remaining about an hour, then steaming southward down the coast arrived off Cape Blanco at 8 o'clock, on the morning of Saturday, the 31 instant, when Capt. Rhodes and Mr. Brownlie went on board, visited and inspected the station. On Wednesday morning set a large whistling buoy off Yaquina bay and in the afternoon entered the bay. There they changed six buoys and in consequence of the low water could not get out until Tuesday morning the 31st instant, when they left Yaquina Bay, crossed over the bar, and as before stated arrived here in the evening.

As they came out, they were followed by the steamer *Michler*, Capt. Winant, and the steamer *Favorita*, Capt. Buckley, both bound for Puget sound. During the cruise of the *Manzanita* they have set six large buoys in the ocean off the coast, changed and reset eight Coox Bay and six in Yaquina Bay, making twenty in all, besides visiting all the light-house stations, leaving mail and supplies, and would have been back several days sooner, save for the unavoidable delay at Yaquina in consequence of the small depth of the water on the bar.
