The City Ordinance Against Onium Smoking Declared Invalid.

The habeas corpus case of Ah Poy to test the constitutionality of the city ordinance in reference to smoking opium, which was argued before judge Taylor in the circuit court on Wednes-

day, was decided yesterday.

Following is judge Taylor's decision:
In the circuit court of the State of Oregon for Clatsop County exparte Ah Poy on habeas corpus.

On May 17th, 1800, Ah Poy was carrieted in the police court of the it, of Astoria, upon a charge of vishaving ordinance No. 901 of said city, by being in a house where oping was being snoked, and was adjudged to pay a fine of thirty dollars, and in default of the payment thereof to be imprisoned in the jail of said city, not

with the steamship Oregon, on the morning of December 28, 1889.

Her next duty will be to raise the British ship Barnerd Castle, which sunk near Race Rock, Victoria, B. C. about three years ago. Capt. White-law has gone up there now to make the necessary arrangements, and until he is heard from, the steamer will remain here.

Her muchinery is very heavy and powerful for it is used for many other purposes than simply driving the screw propeller. There are six pumps, four of which are eight-inch, one is twelve-inch and one has a delivery sight-ten inches in dismeter careable. ery eighteen inches in diameter capable of discharging forty tons of water per minute. These are used in pumping out sunken vessels thus permitting them to be raised.

There is also a dynamo machine by which electric light is furnished to two large are lights, which can be placed anywhere on the steamer to light up the surrounding waters when they are working on a wreck. The same ma-chine also furnishes small electric lights for all parts of the steamer, and a recently invented electric light which can be submerged and carried around under water by the diver, when he is investigating a sunken vessel or looking for lost articles of value

The steamer is also a regular marine fire engine, for she carries several thousand feet of hose, and to her powerful ship's pump, eight different lines of hose can be attached, for the extinguishing of fires on adjoining vessels, or buildings near a dock where they can be reached.

There is a hand machine operating an air pump to supply fresh air to divers when beneath the water, and also a steam air pump for the same purpose, capable of supplying fresh air continuously to six divers at once. There is also a portable forge on board, so that they can do their own blacksmith work at short notice.

In the way of chains, ropes, cables hawsers, blocks and tackle, and a pow erful winch, the steamer is fully equipped for hoisting and handling enormous weights, anything as heavy as thirty tons, or even heavier. She carries a crew of eighteen men, several of whom are expert divers, and all thereafth familiar with their needs. thoroughly familiar with their peculiar line of work.

asked to settle the question as to what sarsa-parillas were in fact purely vegetable. We present their report. "We have saide oureful chemical analyses of several well known brands of sarsaparilla, and have found them all with the single exception of Joy's to contain todide of polassium. As a result we are enabled to prohas proven that all ordinary face eruptions are caused by indigestion and singuish circulation, which call for vegetable alteratives, instead of mineral blood purifiers like iodide of potassium. Joy's Vegetable Earmparilla is the first to discard the old notions and proceed under the modern theory. Its cures are the talk of the hour.

Boncicault's "After Dark" was brought out last night at the People's Theatre before an audience that packed the house to the ceiling. Only once before has that theatre held such a tremendously large audience. Virtue in distress was well represented by Wm. A. Brady as "Old Tom," and Laura Biggar as "Eliza." The former presented a very eleverly drawn character sketch, and was heartily ap-planded for his earnest and effective work. E. L. Walton's "Dicey Morris" acted well. The scenery by Harley Merry deserves special praise. ## Office on Third Street,

No matter what trade or profession you choose you will easily detect the men of original ideas; the men who push themselves and the town they live in ahead; men who are a credit to their profession and the community they live in: but you are also sure to find the imitators, those who are at the rear end of the procession, men who never have an original, bright thought or do an original, bright act. If let alone they will exist on what liberal, unsuspecting people permit themselves to be robbed of; but no sooner does the original, enterprising man make a move, and the imitating tail-ender tries to benefit
