

The Daily Astorian

VOL. XXXIV, NO. 136.

ASTORIA, OREGON, MONDAY, JUNE 9, 1890.

PRICE FIVE CENTS

BARBOUR'S Irish Flax Threads HAVE NO EQUAL!

Special by The California Associated Press. WASHINGTON, June 8.—The Sunday Herald to-day says: Next week will be a lively one at Tucson, Ariz., when the court martial for trying Capt. Miltmore, Q. M. Dept., will assemble. There are several others besides Miltmore who are on the anxious bench, and it would not be surprising if the secretary were not kept busy ere long, writing reprimands to some officers for their queer business methods. They will be lucky to escape thus easily.

SILVER AGAIN.

Senator Jones' Opinion in the Matter. Special to THE ASTORIAN.] WASHINGTON, June 8.—A California associated press representative talked with senator Jones, of Nevada, to-day about silver matters. Since his recent brilliant speech in the senate on the silver question, Mr. Jones has occupied a very enviable position among Washington statesmen.

"Senator Jones, do you like the silver bill passed by the house Saturday?" inquired the California associated press correspondent to-night.

"You mean how do I dislike it?" laughed the senator. "Well, it is by no means what we wanted and will mean a common currency of silver bullion. We wanted silver coinage, and this is what we got from the house. When the bill comes over on the senate side, we will pass a free coinage bill or nothing. We will not favor any compromise measure. In conference between both houses on the matter, I am hopeful that the house will accede to the demand of the country for silver coinage. We will impress upon them very forcibly, the fact that if we are to have any silver legislation at all this season, it must be something very nearly approaching the free coinage of silver."

"What would be the effect of the enactment of the bill?" asked the reporter.

"Why, it simply provides for the storage of silver bullion, and the issuance of certificates thereon without bringing any additional metallic money into circulation. Some say that it is better than no bill at all, but I am inclined to believe that matters would be as well or better, under the present law on this subject."

Band of Robbers Captured.

Special to THE ASTORIAN.] KNOXVILLE, Tenn., June 8.—The band of robbers captured several members known as Labor Knights, who have banded together for the purpose of a systematic robbery. Robberies have been going on during the past year in the vicinity of Strawberry Plains to the amount of thousands of dollars.

MAIL TRAIN ROBBED.

Special to THE ASTORIAN.] MANDAN, N. D., June 8.—A mail train on the Northern Pacific was boarded by two highwaymen at midnight, who forced the engineer, at the point of a pistol, to stop the train twenty miles west of here. Express messenger Angewine heard some shots fired, and suspecting somebody was trying to secure the money took all the valuables, and ran back to New Salem, two miles distant. The robbers entered the express car, but secured nothing. The mail car was entered next, and only a few letters rifled, when the robbers took to the woods, the passengers escaping unharmed. A sheriff and posse are in hot pursuit.

"Bix Six," a Birmingham, Ala., colored man, earned \$5 by butting a 3-year-old bull to death. After the bull had been butted five times it fell to the ground, and in five minutes was dead. The negro was not injured.

ADVICE TO BROTHERS.

Mrs. Winslow's **ROGON BLOOD PURIFIER** should always be used for children teething. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for diarrhoea. Twenty-five cents a bottle.

S'JACOBS OIL CURES PERMANENTLY RHEUMATISM.

Suffered for nearly 30 years. Got well by using S' Jacobs Oil. My case was rheumatism of many years standing, contracted during the war; tried most everything without relief. S' Jacobs Oil finally cured me. W. H. HERRON. At Druggists and Dealers. THE CHARLES A. VOELKER CO., Baltimore, Md.

SILVER SENATOR JONES

Says the Senate Will Have Free Coinage Bill.

OR ELSE NO SILVER BILL AT ALL

Special by The California Associated Press. WASHINGTON, June 8.—The Sunday Herald to-day says: Next week will be a lively one at Tucson, Ariz., when the court martial for trying Capt. Miltmore, Q. M. Dept., will assemble. There are several others besides Miltmore who are on the anxious bench, and it would not be surprising if the secretary were not kept busy ere long, writing reprimands to some officers for their queer business methods. They will be lucky to escape thus easily.

SILVER AGAIN.

Senator Jones' Opinion in the Matter.

Special to THE ASTORIAN.] WASHINGTON, June 8.—A California associated press representative talked with senator Jones, of Nevada, to-day about silver matters. Since his recent brilliant speech in the senate on the silver question, Mr. Jones has occupied a very enviable position among Washington statesmen.

"You mean how do I dislike it?"

laughed the senator. "Well, it is by no means what we wanted and will mean a common currency of silver bullion. We wanted silver coinage, and this is what we got from the house. When the bill comes over on the senate side, we will pass a free coinage bill or nothing. We will not favor any compromise measure. In conference between both houses on the matter, I am hopeful that the house will accede to the demand of the country for silver coinage. We will impress upon them very forcibly, the fact that if we are to have any silver legislation at all this season, it must be something very nearly approaching the free coinage of silver."

A MURDEROUS WIFE'S MISTAKE

She Quaffed the Poisoned Draught She Mixed for Noy

DIED IN AGONY ON THE FLOOR.

Special by California Associated Press. GUTHRIE, I. T., June 8.—The Sac and Fox national council signed last night a contract with the Indian commission for the sale of the reservation. The terms are a 100-acre allotment to each Indian, and for the residue of the land at \$1.25 per acre. The number of Indians at present is 528, and the amount of land allotments taken is 325,000 acres, and the total paid by the government is \$485,000.

Guthrie is overjoyed.

The old boom element has reappeared and hundreds of tents are scattered along the borders of the reservation under negotiation. The Sac Indians are satisfied already, by choosing their allotments. The Iowas are doing likewise. The Potawatomies will trade next week, making a total of over 2,000,000 acres open for white settlement in the Indian territory. The trade must be ratified by congress.

IMPORTANT COURT MARTIAL.

Will Probably be in Session Two Months.

Special to THE ASTORIAN.] TUCSON, June 8.—A court martial to try Captain A. C. Miltmore, formerly quartermaster of this city, will meet here to-morrow. The court is one of the largest and most important that has been convened during times of peace, and it is expected that it will be in session two or more months.

Another Cyclone.

Special to THE ASTORIAN.] LITTLE ROCK, Ark., June 8.—Boonsboro is badly damaged by a cyclone. The building house and canning factory are wrecked, and a number of buildings damaged. Fortunately no lives were lost.

SEVEN MEN DROWNED.

and Termination of a Fishing Party.

Special to THE ASTORIAN.] BOSTON, June 8.—While en route early this morning for a fishing excursion down the harbor, a party of eight young men from South Boston were captured in a squall a mile off City point, and all but one were drowned. The victims were Lawrence Turann, aged 25; John Sullivan, 23; Albert Lombard, 23; Edgar Maloney, 22; Theo. Troy, 18; Jas. Taffs, 25; and Jas. Hunsford, 18. Jas. Quinnan, aged 20, was rescued in an unconscious condition, an hour later, clinging to the overturned boat.

Flooding Mill Burned.

Special to THE ASTORIAN.] LAKE CITY, Minn., June 8.—An incendiary fire destroyed the Boston flouring mill this morning. Loss \$75,000, insurance \$23,000.

More Ocean Smugglers.

Special to THE ASTORIAN.] NEW YORK, June 8.—Barkeepers Latham and Storke and storekeeper Marlock, of the steamer City of Chicago, additional members of a well-known gang of ocean smugglers, were arrested this morning.

AMBUSH AND MURDER.

A Destructive Band of Desperadoes.

Special to THE ASTORIAN.] CHEYENNE, June 8.—James Barton and Wm. Johnson, two prominent ranchmen of Anita county, were ambushed yesterday by two desperadoes known as Black and Tan, and Lincoln. The former shot down Barton, but the latter missed his target and Johnson escaped by hard riding. The cowboys and settlers are in full cry after the assassin and his comrade, and there can be no surmise as to the fate of the pair, if overtaken.

This murder has precipitated a wave of extermination against the lawless gang, which has terrorized the Green River country for nearly a year. The desperadoes have stolen hundreds of horses and cattle, and have so far worsted the citizens in all encounters. They have a cave in the mountains and live like bandits of the Mexican border. Their base of operations is in a wild section near the junction of Utah, Colorado & Wyoming lines.

Killed in a Court Room.

Special to THE ASTORIAN.] LOUISVILLE, Ky., June 8.—Lawrence Brown yesterday shot and killed Jas. Metcalfe in the Casey county court room, while the latter was on trial for the murder of Brown's brother.

JUST BROTHERHOOD.

An Intended Murderer Punished.

Special to THE ASTORIAN.] BOSTON, June 8.—Never was retribution more swift, than that which overtook the would-be murderer of Michael F. Ney, aged 50, a veteran of the late war. He lived with his wife aged 45, in Nashville street, poor but in comfortable circumstances, as both were hard workers. Lately the husband has been much dissipated, and threatened his wife's life, and she in a rage, determined to take his life. He was on his knees, prostrate before her, and taking advantage of this, she got strychnine and making two glasses of lemonade, poisoned his. Not liking the taste, he put his down, accidentally changing the relative position of the two tumblers, and when he picked up his he got hers, and she died in agony, and in twenty minutes she died in agony, being found in convulsions on the floor.

RISANOFF AND BASTRIKOFF

Killed Off By Starved and Madened Miners.

AND THE COSACKS BEATEN OFF.

Special by The California Associated Press. LONDON, June 8.—The steamer City of Rome while going at half speed in a heavy fog, struck an unknown vessel off Eastnet this morning. The bow of the steamer was badly stove in and the forward compartments began to fill. The vessel, however, reached Liverpool without further mishap. There was a slight panic among the passengers, but with no serious results.

DESPERATE MINERS.

They Prefer to Die Fighting Than by Starvation.

Special to THE ASTORIAN.] ST. PETERSBURG, June 8.—Siberian miners report revolts in the gold mines belonging to the Russian millionaires, Basilvicki & Kartaschoff. The miners, goaded to rebellion by starvation wages and maltreatment, killed superintendents Risanoff and Bastrikoff and demolished a large number of buildings. A troop of Cossacks were beaten off by the men, and two regiments have been ordered to the scene.

A FAMILY QUARREL.

Will Result in the Death of One.

Special to THE ASTORIAN.] MONTREAL, June 8.—Eugene Cowles, son of Edwin Cowles, late proprietor of the *Clawson Leader*, is dying in the hospital here, probably fatally shot. The shooting is the end of a sensational abduction by Cowles, of his daughter Florence from his wife, the daughter of Hale, a Cleveland banker. The wife and pursuing party located him here. He attempted to shoot his wife, but her brother threw himself between them, and she shot him in the neck. The entire party were arrested. The child was found in a convent, and the nuns refused to give her up.

Darby's Prophylactic Fluid.

Use it in every sick-room. Will keep the atmosphere pure and wholesome; removing all bad odors from any source. Will destroy all Disease Germs, infection from all Fevers, and all contagious diseases. The eminent physician J. Marion Sims, M. D., New York, says: "I am convinced that Prof. Darby's Prophylactic Fluid is a most valuable disinfectant."

Fine Table Wine.

Delivered at 60 cents a gallon, to any part of the city. A fine line of pure California wines at low prices, at A. W. Utzinger's Cosmopolitan saloon.

A MONUMENT TO MASONRY.

Laying the Corner Stone of a Magnificent Structure.

ACCIDENT NARROWLY ESCAPED.

Special by The California Associated Press. SEATTLE, June 8.—Morris Adams, aged 22, soliciting advertiser of an evening paper, was drowned this afternoon in Elliott bay, just opposite this city. Adams and five companions were out in a small boat and encountered a squall. The boat was capsized and all were thrown into the water. Water to heavy hail and filling with water the boat sank, and left the men to their fate. Adams could not swim and was drowned. His companions struggled until the arrival of a rescuing party with another boat. He was unmarried.

CORNER STONE LAID.

Narrow Escape From an Accident.

Special to THE ASTORIAN.] BOISE CITY, Idaho, June 8.—The corner stone of the Masonic temple was laid to-day. About 200 citizens from Boise were present, including the Masonic fraternity of this city. Delegations of many lodges from various towns in the territory were present and assisted in the ceremonies. Gov. George L. Shoup, Grand Master of the grand lodge of Idaho, was master of ceremonies. The temple will be a magnificent structure, 50 by 100 feet, and be an ornament to the young city and a credit to the enterprise of its citizens. At the moment of the raising of the stone to its place, the rope by which it was suspended broke. Had this occurred a few seconds sooner, a frightful accident would have happened, as the governor and his assistants had just retired after placing the arches in the crypt.

A Saver Drowned.

Special to THE ASTORIAN.] HELENA, Mont., June 8.—J. M. Page who has a surveying contract with the government, received a telegram to-night that Geo. Freeman, a young Englishman, one of his chummen and engineers, was drowned in Milk river. The surveying party was camped at a point on the river, about nine miles from Helena. The bottom of the river is quicksand, and it is supposed he attempted to cross the stream, and was caught in the sand.

NEWSPAPER BURNED OUT.

Special to THE ASTORIAN.] FRESCO, June 9, 12:0 A. M.—A fire started to-night in the hallway of the *Express* building, which was completely gutted. The fire is still burning, and at this time (12:0 A. M.) it is a question whether the fire or the firemen will be masters of the situation. The firemen are now making a hard fight to save the Grand Central hotel and the *Republican* office.

All the patent medicines advertised.

In this paper, together with the choicest perfumery, and toilet articles, etc., can be bought at the lowest prices, at J. W. Conn's drug store, opposite Occident hotel, Astoria.

One of the Nebraska cities aims to

entirely to the Chicago divorce industry. The steps of the process are given as follows: First, filing the decree, the defendant's answer fifteen minutes later; then the referee has fifty minutes; and in one hour and forty minutes the decree is rendered. In two hours from the start the party is married again, and ready to take another divorce. There is no reliable shorter process, even in Chicago.

RECEIVING CALLERS.

There was some inconvenience in this predicament of dressing rooms, especially if any one called in the daytime before our toilets were completed or in the night time after any of us had retired. We never heard the outside front door bell ring but its sound little sonorous "Oh, put me in my little cot, mother!" but since affording accommodations for my visiting relatives by spending a few nights out in the back hall on a bed, with a tent roof for a tick, I have refrained from petitioning my mother to do any such thing. It seems natural to those not accustomed to dressing rooms to take off and put on their clothes in the bedroom, consequently we used to dress and undress in the bedroom. Any one by simply walking once through our flat in the dead of night could have fallen over enough wearing apparel to have set him up in the clothing business.

People coming up stairs to see us

always heard a loud crashing and the sounds of flying feet, but after they knocked upon the cherry stained panels all was still. We used to stop just where we happened to be when the knock came.

OTHER FEATURES.

One cold winter's evening I stepped in a small clothes press, which opened into the parlor, and I was obliged to exist there for two hours and a half while my youngest sister talked to a man about the likelihood of finding true varieties of orchids at Portage Falls. One time, when my basque was hanging on the door knob in the kitchen, when I was in the front room, and two collars in seal sacks were awaiting me in the parlor, I had to hail our grocery man's errand boy as he was going with a sack of flour and send him around into the kitchen with an order for my basque. I thought delivering basques would come rather natural to one used to carrying sacks. He brought it around to the front of the house all right, and I fished it up with a

HIGH LIFE.

The Trials of a Young Lady Who Lived in a Flat.

THE OMNIPRESENT FOLDING BED.

I know considerable about high life. I have lived in the second or third stories of desirable flats or modern houses since I was put into short dresses. I have viewed the world from exalted heights, especially when I hung clothes in the garret on wash days, and I am prepared to say that although some people pay extra to live on the first floor front, they miss the very richness of existence. Cream always rises to the top.

I have just moved out of apartments on the second story of a very narrow house, and think the architect who planned the building must have done it with one eye. Its width adequately accommodated the width of an apartment of ordinary size, so, instead of the rooms branching off from one another in their usual convenient fashion, they had formed a procession in a line from the front elevation to the coal house. If you were in the kitchen you had to go through every room in order to get to the front room. You couldn't wander about that house—you could only go through it. The family of which I am a proud and valued member, however, instead of Families in flats never are. You will realize the truth of this if you will come to live on the floor underneath one of them.

THE OMNIPRESENT FOLDING BED.

One of the results of large families living in small flats is the folding bed. They lean against the wall, trying to look like a book case or cabinet organ, but I can always tell them. When I see a piece of furniture looming up like a monument factory, with a kind of nothing-in-particular air about it, then I know that it is a bed in disguise.

Our parlor was situated about midway down the line of rooms so as to be the center of the house. Two of us girls had a folding bed in the dining room, and the other two in the dining room and ordinary department was the station for a bed, and when we had company to stay all night we used to spread canvas out in the back hall. I used to hang a sweet little note on the wall, "Oh, put me in my little cot, mother!" but since affording accommodations for my visiting relatives by spending a few nights out in the back hall on a bed, with a tent roof for a tick, I have refrained from petitioning my mother to do any such thing.

It seems natural to those not accustomed to dressing rooms to take off and put on their clothes in the bedroom, consequently we used to dress and undress in the bedroom. Any one by simply walking once through our flat in the dead of night could have fallen over enough wearing apparel to have set him up in the clothing business.

LOCATING NOONDAY ROCK.

Seals Assist in Placing a Buoy Over a Dangerous Obstruction.

An interesting experiment was made a few days ago in placing a buoy over Noonday Rock, which is about four and one-half miles north and a little west of the North Farallon Islands. The old buoy went adrift during the storms in the spring, and was picked up several miles down the coast. Noonday Rock lies about eighteen feet below the surface of the water, and is dangerous to incoming vessels that get out of their course in fogs or by drifting in the current that run very swift along the coast at certain seasons of the year. When the buoy broke away from its moorings it left no trace of the rock, but it was well known that the Farallon Islands, the rock and Point Reyes formed a right angle, the rock being the point where two imaginary lines would meet to form the angle. The difficulty was to find the rock without surveying and sounding, which would have been a difficult and costly task.
