THE SILVER BILL. THEY WANT-THE EARTH

A Concensus of Opinion From Those Who Know. Special to THE ASTORIAN.

Washington, June 14.—At three o'clock on Monday afternoon the silver bill comes up for final disposition. A California Associated Press correspondent has had an interview with a number of senators to-day on the silvers. ver question and prospects for passing of the "Windom bill," and from a con census of opinion obtained, the corre-spondent believes that the house cancus measures will pass the senate on Monday with the "bullion clause"

Senator Stewart has been actively canvassing among the senators and believes the above will be the result. He was not aware of a petition being circulated among senators pledging them to the support of the administration measure but says it was probable and that of course he would not have been approached on the matter. He thinks however there are not twentyseven senators who have signed any such pledge and furthermore that not ten senators in that body would sign such a pledge.

The house bill will be amended by

the senate and passed before 6 o'clock on Monday," said he. "How will it be amended, do you

"The bullion clause will be elimin ated and certificates will be made legal tender, despite the report of the finance committee, and if this is done i will be a fairly good bill," said he.

OPINIONS FROM BISMARCK.

Thinks the Kaiser Will Make a M take If He Allies Russia.

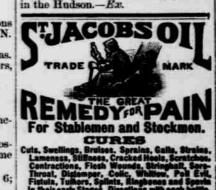

of the three central powers who have done so much in years past to preserve

the peace of Europe.

As for the triple alliance itself, if not disturbed by outside engagements, he believed it would stand firm. Ap-Italy would not withdraw from the alliance, although there might be se have been discovered moving some variation in her attitude should a change be made in the cabinet.

> ADVANTAGES OF TELEGRAPHY. A Reporter's Experience in a Rail

Il o'clock, had to drive a considerable distance from the station, and it was 1 a.m. when he returned to the depot. The last train had gone and the telegraph office closed a long time before. A watchman or track walker at the depot said that the operator lived a mile and a half away, and that he was ill anyhow, and that there was no possibility of sending anything by wire that night. When the watchman had obligingly taken a waik up the track the writer tried the office window, found the catch rather loose, and with the thin blade of a pocket knife soon removed the fastening. To open the window crawl in and connect the wires in the switchboard was the work of a moswitchboard was the work of a mo-ment. "N. Y." was called and raised, and the loop to the newspaper office asked for. Twelvehundred words were asked for. Twelve hundred words were sent in before 2 o'clock, without copy, it being necessary for lack of time to compose the story as it was telegraphed on the key. This was done in the dark for fear the watchman would see a light and come back and shoot the reporter for burglary. "O. K." having been received, the reporter went outside, closed the window and spent the remainder of the night gazing at the moon and throwing pebbles in the Hudson.—Ex.

AMERICAN INSANITY.

The Causes, as Given by Learne Authorities.

pe ial to The Astorian. New York, June 14. The Mail and Express prints a series of responses to the questions concerning insanity Take If He Allies Russia.

AN OPINION OF SIGNOR CRISPI.

Special by The California Associated Press.
London, June 14.—Another interview with prince Bismarck is given to the world. The prince talks for the first time about the triple alliance. His conversation will attract worldwide attention.

He having by allies Russia.

In this country, all from acknowledged authorities on the subject. Among those responding are superintendent flooding, of the government hospital at Trenton, N. J.; superintendent Talcott, of the asylum at Middleton; superintendent Bishop, of Reno, New; superintendent Bishop, of Reno, New; superintendent Clark, of Toronto, Canada; and superintendent Draper, of Brattleboro, Vt.

They all say that insanity is inin this country, all from acknowledged

wide attention.

He begins by alluding to the rumors about the Russa-German alliance, and says emperor William will make a count the world, it is marely keeping out the world, it is marely keeping trace with other vices of the human mistake in seeking an alliance with pace with other vices of the human Russia, for it might impair the union family." It is on the increase in the United States. The authorities dissent from the proposition that half of the world is insane.

The forms of insanity most notice able among American people, is atated by authorities as follows: by Godding, prehension had been expressed about paresis, most noticeable increasing in Italy, but so long as signor Crispi repopulous centers; Ward, demented; mained at the head of the government Talcott, melancholia; Fletcher, paresis; acute mania.

VERDICT CAUSES SURPRISE. The Inconsistent Findings o

A Reporter's Experience in a Railroad Station Late at Night.

The reporter who has been an operator has a decided advantage in getting his copy to the office by telegraph. A year or two ago one who had a knowledge of telegraphy was sent to Dobbs Ferry late at night on an important affair. He arrived there at 11 o'clock, had to drive a considerable distance from the station, and it was 1 A. M. when he returned to the depot. The last train had gone and the telegraph office closed a long time before. A watchman or track walker at the heavet said that the overster. pecial to THE AS ORIAN. prise was very great at the extraordi-nary difference of the fludings of the jury in the two cases.

A FLOODED CITY.

A Cloud Hurst and Rain Causes Great Damage.

ROCKFORD, Ills., June 14.—A cloud burst last night with rain all night and to-day, has flooded the city. Several persons have been drowned, and the damage to property is over \$500,000. The scenes last night were terrible and heartrending.

A Heavy Deal Stopped. CHICAGO, June 14.—An injunction was to-day issued by the master in chancery, restraining the Union Stock Yards Co., of Chicago, from issuing \$10,000,000 in bonds, in connec-

with the sale to a Britith syndi AN ENGLISH SYNDICATE

Frying to Control the Tobac Market. cial to THE ASTORIAN

Special to The ASTORIAN

LOUISVILLE, June 14.—An English syndicate is negotiating for the purchase of all the tobacco warehouses in this city and Cincinnati. Ex Congressman Albert Willis is attorney for the syndicate and Julius Barkhouse is agent. They left a few days ago for England to perfect their plans. Two million dollars is said to be the price asked for the good will in this city, without any real estate. With the Louisville and Cincinnati market in the control of the syndicate it could control the tobacco markets of the world, Louisville alone last year selling 300,000 hogsheads of tobacco.

General Agents,

A GREAT CORPORATION,

With Comprehensive Purposes pecial to THE ASTORIAN.

TRENTON, N. J., June 14.-The North American company, supposed to be affiliated with the Oregon Trans-continental company, filed articles of incorporation here to-day, with capital stock of \$50,000,000, divided into 500 Special by The California Associated Passas.

New York, June 14.—The shipment of \$1,000,000 in gold yesterday to Europe, is thus explained. Lately the california Associated Passas. there has been a considerable demand for gold, from South American and furged for gold, from South American and fundamental connections with important financial operations, including loans. The purchases of silver in London bore their fruit and the demand for money there is steadily increasing.

The official discount rate of the bank of England is three per cent, but for short loans, the bank is now charging four per cent. Quotations for call loans have risen to three and a half and four per cent within a few days. Any further flow of gold from for call loans have risen to three and a half and four per cent within a few days. Any farther flow of gold from the London center, would cause a rise in the bank rate, and possibly create disturbance. The additional sum in gold is loaded for a Greek loan, and Berlin took occasion to obtain from New York, gold by paying a little extra. This is a full explanation of the transaction. for corporations, firms and manyous als, states and municipalities in the issue of stocks, bonds, securities, ob-ligations and the management and property of all kinds disposition of property of all kinds. Provision is made for making guaranees of any kind, and to transact any mercantile and agency

It proposes to carry on business in the states and territories of the United States, in

on business in the states and territories of the United States, in Mexico or in the states of Central and South America and i Canada. The principal offices of the company will be in British North America, Great Britain, Ireland, Germany, other countries of Europe and elsewhere.

TROUBLE ABOUT LAND.

FORT DODGE, Ia., June 14.-The Des Moines river land case was de-cided by judge Shires to day. The opinion filed dismissed the case of the government against the River Land company, and confirms the company's title to every odd section of land for five miles on either side of the river. In Iowa much of the land has been sold to the settlers by the company on warranty deeds, and they will not be disturbed. Seven hundred settlers who, through neistake, got patents from the office, and who occupy 200,000 acres, must move off. Resistance and trouble is expected.

TILLAMOOK ROCK.

A Natural Foundation for a Light

DIFFICULTIES IN BUILDING.

rises nearly 100 feet from the ocean It is Tillamook rock. Nature it there as the foundation for a light is very steep. On the highest point, after much work, a spot was leveled sufficient for a lighthouse fifty feet square. The entire surface out of

town lot. When the wind blows and waves beat upon that rock the spray over the top and runs down the over the top and runs down the sea side in a torrent. Only when the sea is smooth is it possible for a boat to reach the rock. In October, 1879, four reach the rock.

workmen, with hammers, drills, both, provisions, fuel, a stove and some canvas, were landed on Tillamook. A few days afterward five men and a small derrick were put upon the rock. The foreman of the party was drowned in trying to make the landing.

These nine men suffered for days the discomfort of shipwrecked sailors. When the rain was not falling the spray was dashing over them. They drilled holes in the rock, fastened ring bolts and tied canvass to the bolts. In this way they managed to save In this way they managed to save themselves from being blown away. The next step was to quarry out a lit-tle nook in the side which afforded most protection from the wind and waves. In this spot they built a shanty and bolted it to the face of the

flight of steps up the steep side, at the same time leveling off the top to get room for the foundations of the lighthouse. Part of the time they worked on staging hung from the top of the rock with the waves dashing berock and the wind carried the spray over so that a continuous flood poured down the canvas-covered shanty in which the quarrymen were huddled. This lasted for several days. It swept the supplies into the ocean and gave the shanty and its inmates a close call. At the end of sixteen days the half-starved men communicated their con-dition to the main shore. It was im-ressible for any boat to come to the possible for any boat to come to rock in the sea that was running, a line was cast loose from the rock and a ship picked it up. This line was lastened to the top of the rock and to the mast of the ship. Over it supplies were transferred to the little colony.

By May the quarrymen had out down the sharp point of the rock to a height of eighty-eight feet from the sea level and had made a level spot for the lighthouse. Three masons.

Wherever Malaria Krista.

The bilious are its certain prey. In intermittent and remittent fever, dumb ague and ague eake, the liver is always seriously affected, and the blood contaminated with bile. One of the chief reasons why Hostetter's S omach Bitters is such a sure defense against chilis and fever and every form of malarial disease, is, that it does away with liability to the disease, by reforming irregularity of the biliary organ in advance of the arrival of the season when the disease is prevalent. There is no finer fortifying preparative for those about visiting or emigrating to a locality where the miasma-taist exists. There is no certain immunity-from disease in an endemic or epidemic form, to be secured by the use of the average tonics and anti-spasmodics. But where quining falls the Bitters succeeds both in preventing and curing. Moreover, it removes overy vestage of dyspepsin, and overcomes constipation, rhenmatism, inactivity of the kidneys and bladder, and tranquitizes and strengthens the nervous system.
