> Sunday Mr. Habersham, engineer houses put

much more snow in the mountains to be melted; and the rivers continue to fall slowly.

The members of No. I will meet to-night at their engine house, corner of Third and Lafayette streets and talk about horses.

The mud was very deep, from the melted snow which had been so deep there all through the winter and spring, and the walking was quite difficult. Mr. Habersham

kindly earried the valises. The steamer Manzanuta will go to Tillamook rock this morning if the sea is not too rough to make a landing there from small boats.

In this manner they proceeded for 12½ miles, and Sunday night arrived at Jewell. Here they found two saddle horses, which had been sent by the directors of the road from here.

Yesterday morning the three travelers started from Jewell, Whipple and waukee beer was yesterday received ers started from Jewell, Whipple and by E. C. Hughes & Co., shows that Habersham on horseback and Reid walking, for although the oldest man, he is of the hardy Scotch stock and very active and energetic. In this way they came 18 miles, which brought

them to Olney.

There the rough part of the journey was over, for they were met by Dr. Alfred Kinney, vice president, and E. C. Holden, secretary of the road, with the steam launch Occident. Embarking on this, they were soon steaming down the Klaskanine, then down Young's river to the bay and to the pier at the end of the trestle. Thence they rode on the cars over the fourteen miles of the railroad to the Ohanna creek near Grimes, returning teen miles of the railroad to the Ohanna creek near Grimes, returning to Skipanon, thence by the Occident to Tanzy Point and New Astoria and to this city, arriving here, as before stated, late last evening.

roads from coming here. The syndicate he represents has offices in New York and Chicago, and to them he will at once report as soon as he reaches Portland, wiring them and also sending complete account by mail with full particualrs. Without violating confidence reposed, THE AS-TORIAN cannot state the full tenor of Mr. Whipple's report, but can say that he is remarkably favorably impressed with the condition of affairs and the prospects of Astoria for the future.

Mr. Reid feels confident that the syndicate will take the bonds of the company, and that he will be able to push the main line through on the proposed route which has been surveyed and is graded for

THE ASTORIAN sincerely hopes that Mr. Reid's expectations will be realized, for the gentleman has sold his interest in the bank at Portland, has invested his own money largely, and is devoting his whole time and energies to the completion of the road.

There is a syndicate of Portland men who own a large tract of land near Butterfield's in Clatsop. One of their number is C. J. McDougall, the well known railroad attorney. He has been down there over Sunday, Late last evening William Beid, president of the Astoria and South home last evening on the steamer

bondholders agent of an English syndicate, arrived here, having had a rough trip overland.

They left Portland last Friday noon with two horses and a buggy, and drove 27 miles to Manning's mill.

Saturday they drove through Beaver and rough trip over the steps toward the erection of a hotel on the beach. It will be a short distance this side of Kinney's grove on the line of the Astoria and South Coast missed.

From an interview with him last evening he expresses great satisfactounty clerk C. J. Trenchard and sheriff H. A. Smith were present. T. G. Boelling was appointed bailiff of the court.

## A DOCTOR'S REBUKE.

Immensely More Mischlef than is Ger erally Suspected.

Dr. King, the eminent medical writ learned disquisition on our national complaint, constipation, says: -

The great quantity of cathartic pills, etc., which are taken by the people of this country are productive of immensely more mischief than is generally suspected. True, the physic unloads the lowels, but its action tends to diminish the tone of the intestines; so that, instead of removing costiveness, it aggravates it, leaving the bowels in a more torpid condition.

Joy's Vegetable Sarsaparilla was designed to fill just such a contingency as the doctor's arraignment anticipates, viz.; instead of be-ing a powerful mineral purgative, it is a mild vegetable laxative, that, owing to its solvent and gentle stimulating properties, is so certain a relief in constipation that it has been given away to hundreds, not to be paid for unless it was of positive benefit. It rewith a natural easy habit, and is so mild that, unlike drastic purgatives, it can be taken indefinitely with perfect safety.

### A Runaway Team.

Yesterday afternoon at 1:45 as W. W. Wherry was loading a veal on his delivery wagon at Wilson & Fisher's wharf, one of the small steamers there blew a shrill whistle, and the team dashed off at a lively gait without the driver. Down Second street the horse ran to Cass street and up to Third where he was stopped without any damage having been done.

A good appetite is essential to good health, and loss of appetite indicates something wrong. Hood's Sarsaparilla creates and sharpens the appetite, assists the digestive organs and regulates the kidneys and liver. Take Hood's Sarsaparilla this season. Sold by all druggists.

### The New Discovery.

You have heard your friends and neigh bors talking about it. You may your-self be one of the many who know from personal experience just how good a thing it is. If you have ever tried it, you are one of its staunch friends, because the wonderful thing about it is, that when once given trial, Dr. King's New Discovery ever after holds a place in the house. If you have never used it and should be afflicted with a cough, cold or any Thront, Lung of Chest trouble, secure a bottle at once and give it a fair trial. #### A Thunderbolts Work.

A stroke of lightning recently produced remarkable effects on a large poplar at Playford, Eng. The two topmost branches were not injured, but the bark was completely stripped from the trunk and the southern half of the body—which was 2½ feet in diameter at the base and 10 inches at the top—was shattered into fragments and scattered over an area of two acres. One solid piece weighing 5½ pounds was carried 126 yards from the base, while bits of less than half an ounce were blown 60 yards against the wind. One-half of the trunk was left standing as a whitened stem 40 left standing as a whitened stem 40 feet high. The thunderclap was ter-rific, the concussion breaking windows

The People's Water Companies.

Water works in the United States and Canada, it appears from a conven-tion just held in Chicago, have trebled in the last ten years, growing from 660 in 1881 to 1,900 to-day. The capital invested is \$500,000,000, their annual reverue is \$50,000,000, their mains a e 20,000 miles long and they have 2,000,000 taps. The vast bulk of these are owned by the people and carried on by municipalities.

A number of fir trees in the vicinity of Salem are found to be dying, and investigation proves the cause to be a little yellow worm called the "girder," that gets in between the wood and bark, principally on the inside of the wood and bark, principally on the in-side of the bark, and eats its way around, causing the same effect to the growth of the tree as the girding done with an ax with an ax.

The bodies of these spiders are very handsomely decorated, being bright gold or scarlet underneath, while the upper part is covered with the most delicate slate-colored fur. So strong are the webs, that birds the size of larks are frequently caught therein, and even the small but powerful scaly lizard falls a victim. A writer in Rare Bits says that he has often sat and watched the yellow monster—measuring ing, when waiting for his prey with his legs stretched out, fully six inches—striding across the middle of the net, and noted middle of the net, and noted the rapid manner in which he winds his stout threads around the unfor-
