An exchange, speaking from experience, says there are persons in every community who like to see a newspaper attack public abuses, denounce monopoly, expose corruption, attack their enemies and praise their friends, all at its own expense. These same people often borrow the paper to see what it has to say on such topics. When it comes to backing up an independent and outspoken journal with ideral patronage, however, these gentlemen are generally non come at ibus

MR. SMITH'S STATEMENT.

Regarding the Benton Street Sewer.

Astoria, Or., July 14, 1890. EDITOR ASTORIAN: In your issue of this morning appeared the following:

The effort to have the city pay for ungaid portions of the Benton street sewer is unjust and should not be en-tertained by the council. If the city proposes to pay for any of it, it must in justice pay for all of it, and refund the money to those who have paid.

THE ASTORIAN labors under a mis apprehension in this matter. The city is not asked to pay the "unpaid portion of the sewer." It is claimed by those who have not paid, that there is no legal sewer in Benton street, which seems to be about the fact in the case. No ordinance ever having been passed covering the whole street, yet there is a sewer in the street, MARINE NEWS AND NOTES.

put there at my expense. The parties who seem to be disposed to take advantage of legal technicalities, rived yesterday at Port Townsend and refuse to pay, will be accommodated by having a legal sewer put in the street by the city, and that will make it "just," you know. The irregular-ities on the street named were permitted by all parties concerned, in order to relieve the schoolhouse of an intolerable nuisance, that was making the children sick, and it is not just the thing to ask me to lose three or

C. Kindred and wife to sections has begun, and in most sec-tions will be in full sway next week. The hay crop is far better than expected. The weather was very bene-ficial to the fall and spring wheat crops, also to the corn. The fall wheat has generally filled very well, the berry large and plump. The spring wheat, which on July 1st, was thought to be worthless, is growing nicely and will yield almost an average crop in most sections. Root crops are all in a most promising condition. Hops continue to thrive and their yield will be above the average. The apples are being injured by the collin moth. Sale to his brother Robert. Consideration, \$10,000.

THIRTY YEARS' PRACTICE

Mn. Epiron: At the risk of indorsing a proprietary preparation, I have a few words in favor of a new laxative principle. But first, how I came to discover it. A patient asked about taking Joy's Vegetable Sarsaparilla. As sarsaparilles usually contain mercury or iodides I objected, and asked for the formula, which finding purely vegetable, and so mild as to be to my mind almost ipert, I consented. Imagine my astonishment when perfect laxative action was reported. It has two great points. First, being purely vegetable, it is (unlike mercury) not cumulative in the system, being easily carried off by the digestive processes; and second, it is effective with a less quantity of the enthartic principle than has hitherto been attainable. It in this respect ranks as a discovery, and approaches the ideal, viz. the least medicine consistent with the greatest good. It harmonizes natural laxative action and perfect safety, and should interest both the public and the profession.
