The Incandescent Lighting System as Being Instituted. TO BE IN OPERATION SEPT. 1ST. The Electric Light company were at work yesterday at the intersection of Cass and Third streets removing the old distorted poles that have temporarily supported their wires, and putting up the new fine large poles that are neatly trimmed and painted.

What an Expert Thinks of Their Value as Fuel. The following is from the Nehalem Journal of the 15th inst., and is of interest: Last week the Journal scribe was pleased to see H. Banfield scribe into town as though he had plenty of leisure, and in a short time had the pleasure of listening to a long and learned discourse on the present merits and future prospects of the Nehalem coal fields.

A Half Million Dollars Scooped in At One Haal. Wm. Reid in the Saddle. ASTORIA, Aug. 15, 1890. On April 10, 1890, ten days before Mr. Huntington's arrival, five of the directors of the Astoria and South Coast Railroad company, acting as the board, entered into a contract for the completion of the Seaside division to the Grimes house. It was a tripartite agreement; J. H. Smith, the first party; the Astoria and South Coast Railroad company, the second party; and the Pacific Construction company (really Wm. Reid), the third party.

School in district number one will commence at the Court street school on Monday, September first. A new, neat and substantial sidewalk adorns the west line of Folk street, between First and Second.

The Electric Light company were at work yesterday at the intersection of Cass and Third streets removing the old distorted poles that have temporarily supported their wires, and putting up the new fine large poles that are neatly trimmed and painted. The new poles are 10x10 inches at the top, where is a cross-piece five feet in length on which will be strung the several wires of the arc and incandescent systems.

The value of Nehalem coal as fuel is much greater than has been stated by other parties who have given the matter some little attention. Comparison with coals from Washington, southern Oregon and California, is decidedly in favor of Columbia county product. The last vein discovered by expert Banfield is a nine foot seam, of a flinty texture and contains a still larger percentage of fixed carbon than the best specimens shown by the coal which has been exposed to the action of the atmosphere for an indefinite length of time, still presents a smooth surface and a hard flint-like resistance to the hammer.

Let us see, then, how this scheme was laid and carried out. I am but a common granger, but I believe I could have done better myself. Even old Farmer Jones, up in Marion, who has been put under guardianship, didn't do so badly. He fooled away only \$10,000, while our directors have made a seeming gift to Reid of over half a million. The original agreement with the Pacific Company, dated the 22, 1888, was to issue to it \$10,000 in stock per mile, upon the completion by that company of the first ten miles on the road to Hillsboro, and to pay it \$22, 500 per mile out of the sale of bonds for one mile constructed by it on that road.

A SCROFULOUS BOY. Running Sores Covered His Body and Head. Sore Affected. Cured by CUTICURA Remedies. When six months old, the left hand of our little child began to swell, and had every appearance of a large boil. We poulticed it, but all to no purpose. About five months after it became a running sore. Soon other sores formed. He then had a severe attack of measles, and as his blood became more and more impure, the sores broke out on his face, neck, chest and arms. He was a great deal. This was his condition at the time we were informed of the CUTICURA REMEDIES, using all freely. One after another and under the care of him, forming in each case of these five depots just before healing, which would finally grow loose and were taken out; then they would heal rapidly. One of these ugly boils formations I preserved. After taking a cure, and is now, at the age of six years, a strong and healthy child. MRS. E. S. DRIGGS, 612 E. Clay St., Bloomington, Ill. May 9, 1888. My grandson remains perfectly well. No signs of Scrofula and no sores. MRS. E. S. DRIGGS, Bloomington, Ill. Feb. 7, 1890.

Robert Crawford, a pioneer rancher and stockman of the Nehalem, arrived in this city today. He brought thirty head of beef cattle for the Astoria markets. Miss Maude Granger and her eminent company will appear at Ross' opera house Monday, August 25th, in the great emotional comedy drama entitled "Inherited."

The power will be ample for all present requirements, and will be furnished by three boilers capable of supplying over 200 horsepower. The dynamo for the incandescent circuit of 600 lights will be run by two fine, new, high speed Russell engines coupled on the quarter on the same shaft, like a locomotive, this arrangement together with heavy fly wheels and a speed of about 250 revolution per minute will give a very steady motion which is an important consideration and essential to the production of a good light.

Other information of a confidential nature was conveyed which was more inspiring than new wine, and more encouraging than if the old mill outfit had all been hung. PERSONAL MENTION. Rev. G. C. Hall took a trip to Portland, last evening.
