the Kalama Boom company, for the purpose of putting in a boom at the mouth of the Kalama river to catch the great quantity of logs that always come down during a freshet. This will be very advantageous to the log-ging industry on the Kalama river, as it is a known fact that the magnifent fir and cedar timber which is abundant along its banks has hereto-fore not been as properly worked as it might have been had these im-provements been added long since.

The sturgeon business is at its height. There is a great run in the river now, and the fishermen are going after them, as there is a good demand from the east, where the sturneedle-hook, without barbs, introduced by the Chinese, are going out of fashion. She experienced no more uneasiness immediately there-after than is usually the case, but in about an hour it commenced to bleed. She was taken home, and as the blood continued to flow, regardless of atatempts to stop it, her parents became alarmed, and brought her to St. Helens for treatment. The flow was finally stopped after having been con-tinual for twenty-four hours, Iby which time she was unable to walk. However, she has, we take pleasure in stating, nearly recovered from the

A. Atkins, for \$2,000 which together with the ad-\$2,000, which together with the adpoining quarter section owned by Mr. Parker will give them ample material for many years. Skid roads are already being put in and a chute to Perrine slough, above Major Rinear-son's landing, will soon be built. They are both experienced loggers, and their being so near the river and having access to so fine a body of timber ought to enable them to make a big output.-Oregon Mist.
