THE WIRES STILL DOWN. The break in the telegraph line which occurred on Friday night was not repaired yesterday, or at least the wires were not working at all yesterday or last night, consequently THE ASTORIAN did not receive a single dispatch. The paper this morning, however, will be found to contain a large amount of original matter and a careful selection of very interesting articles and general news.

THE FIELD OF HONOR. A Duel to Be Fought on the Hill To-Day. It was whispered about in certain select circles last evening, that at an early hour this morning blood would be spilled on the other side of the main street hill. In other words that a duel was to be fought between a gentleman from Portland and a well known resident of this city.

The Rev. Father Power will say mass at St. Mary's Catholic church and preach at 8 o'clock this morning. There will be preaching in the Baptist church this morning and evening by Rev. E. C. M. Barnham, of Portland.

The Rev. Wm. S. Short will hold service at the Skippam school house, Monday evening, the 27th, at half past seven. The new M. E. church at Willapa City is not yet ready for dedication; Rev. G. W. Gramis has not been notified, and he is to officiate at the dedication.

Miss Hulda Carlson, daughter of August Carlson, of Bear Creek, died yesterday of consumption and will be buried at Knappa on Monday. Her age was 14 years.

To-day will see the tenth anniversary of the marriage of Mr. and Mrs. August Danielson. A reception had been arranged by Mr. Danielson, but about fifty or sixty of his friends, headed by Martin Olsen, J. L. Carlson and Charles Johnson, forestalled the event, and last evening they gathered together, and securing an assortment of fancy and plain tin ware, descended on the Danielson residence, taking Mr. Danielson and his good wife by surprise.

A game of football will be played at the Smith point baseball grounds this afternoon by members of the Astoria Football club. The ball will be kicked off at 3 o'clock sharp.

At Mr. Rockefeller's splendid estate, on the Hudson river, a system of electric lighting, costing over \$150,000, has been installed. He can now, by moving a small button in his library, illuminate acres of his beautiful grounds at midnight if he pleases. The wires are all carried under the ground and not on poles, and the lights are arranged in a wonderfully artistic fashion in the trees and foliage.

Warm weather often causes extreme tired feeling and debility, and in the weakened condition of the system, diseases arising from impure blood are liable to spring up. To gain strength, to overcome disease, and to purify, vitalize and enrich the blood, take Hood's Sarsaparilla. points out of reach of guns from hostile ships of war, where they are not liable to be destroyed by a sudden incursion of an unexpected enemy. Facilities for shipment both by land and water are desirable, and excellent railway facilities are imperative. Since the weight of a 12-inch gun is about 52 gross tons, and the car upon which it must be transported to tide water, is of exceptional strength and weight, the permanent way, bridges and restles of the railway lines over which it must pass must be free from all doubts as to their stability.

Since a large amount of steam power is required for both establishments a plentiful supply of good fuel for steam boilers at low prices is needed. This supply should not be liable to interruption by an enemy in time of war. Fuel for smelting or direct production of iron must always be of the best quality. Fuel for gas furnaces, on the other hand, may be of inferior quality if there is a compensation in respect to cheapness. A supply of good fresh water is needed for both establishments.

The above are some of the general points and wants enumerated in the official circular, and in addition thereof the board will also desire information as to a supply of iron, coal, wood, manganese, fire brick or material for making it, facilities of local shops to furnish castings or make repairs if needed, wages of mechanics and laborers, and various other points pertaining to the subject. Definite notice of their coming will be given in due time, that our citizens may have an opportunity of meeting with the board and giving such information as they may desire.

The gun factory will surely be established on the Pacific coast if a suitable location can be found, but it is possible that the foundry work may still continue to be done by private enterprise, and contracted for by the government.

A DOCTOR'S REBUKE. Immensely More Mischievous Than is Generally Suspected. Dr. King, the eminent medical writer, in a learned dissertation on our national complaint, constipation, says:— "The great quantity of cathartic pills, etc., which are taken by the people of this country are productive of immensely more mischief than is generally suspected. True, the physic relieves the bowels, but its action tends to diminish the tone of the intestines; so that, instead of removing constipation, it aggravates it, leaving the bowels in a more torpid condition. Joy's Vegetable Sarsaparilla was designed to fill just such a contingency as the doctor's argument anticipates, viz: instead of being a powerful mineral purgative, it is a mild vegetable laxative, that, owing to its solvent and gentle stimulating properties, it so certain a relief in constipation that it has been given away to hundreds, not to be paid for unless it was of positive benefit. It replaces constipation almost immediately with a natural easy habit, and is so mild that, unlike drastic purgatives, it can be taken indefinitely with perfect safety.
