The San Francisco Call had the following mention of a former concert by Mrs. Ricord, who will sing here on Friday evening next: "Mrs. Ricord won the plaudits of the auditors for the brilliant style in which she sang Arditi's difficult selection, entitled 'Bolero.' Mrs. Ricord is the possessor of a sweet, sympathetic voice over which she has perfect control." Last evening at 5:30, there came near being a call for the fire depart-ment. Mrs. E. A. Weed had a hot fire in the kitchen stove at the residence on Third street over the Mikado candy store when suddenly the pipe slipped out of the chimney hole and fell down, leaving the blaze to come out of the upper end of the pipe which stood upright. Hastily calling for help, Fred Ferchen, who lives next door, was fortunately at home and with a step ladder was able to pick up the hot pipe and get it together enough so that the wall was not ignited though both wall and ceiling were badly scorched and blackened. Mr. Ferchen's hands also show the marks of contact with the hot pipe.

The suffering public has been so often deceived by local and advertising doctors that it is not to be won-dered at that its' confidence is justly and seriously injured, and to be safe from imposition, afflicted persons should make a personal investigation of reported cures before submitting to the treatment of any physician. Eleven miles from The Dalles at Boyd, Wasco county, Or., lives Lizzie Brizendine, the 12-year-old daughter of Catherine Rann. She has for the past year been having epileptic fits, as many as three a day. Epilepsy has been considered incurable. Dr. Prentice treated her in the presence of C. T. and T. A. Young and wife, of Bake-oven, Wasco county, all of whom have seen her since, and heard her and mother both say that she has not had a sign of a fit since Dr. Prentice treated her. Time has passed in which Lizzie would have had twenty fits and yet they have not shown the least indication of returning. This case will stand personal investigation. The doctor invites inquiry in all his cases. He will leave this week on Friday night's boat.

The articles of agreement stipplate that the contest is to last ten rounds, but if no winner can be declared within this time, the referee is empowered to order as many more rounds as may be necessary to determine the question of superiority. Gleason, who has been training in this city, is in the pink of condition, and he confidently expects a victory. He said last night that he never felt better, and as he has been under the weather for some time with a bad cold, he will no doubt make a good showing. Gannon has been training in Astoria, and he has many friends who are willing and ready to back him in large sums. Gannon is a larger man than Gleason, he has a longer reach, and is heavier, but it is not generally expected. reach, and is beavier, but it is not gen-erally conceded that he is as clever as

It was discovered in making the plat that it covered more ground than Shively owned, and an attempt was made in 1875 to correct it. It was prior to this date that Shively had office when the encounter referred to occurred. As stated some very hard words passed between Mr. and Mrs. Haven and Mr. Eckland; but that was Dr. Prentice has been so busy since his arrival that he has been obliged to turn people away. GOOD NEWS FOR FISHERMEN.

Splendid Prospects for an Abundance Of

The spawning season at the Clackamas hatchery, has come to a close, says the Oregonian, and the state fish commissioners, as well as Supt. Hubbard, are proud of the year's work. Contrary to all expectations, the number of salmon eggs taken this year, is even greater than the catch of last year. Last year, U. S. Fish Commissioner Stone, then in charge of the hatchery, took about 4,500,000 eggs. This year Supt. Hubbard has taken 5,859,000 eggs. This is a gratifying increase when it is considered that operations were not begun at the operations were not begun at the hatchery this year until the 16th of September. Owing to the late commencement, it was then estimated that this season's work would not rep-resent over 3,500,000 eggs.

The first eggs taken were put in the branch hatchery at Warrendale, and of this lot about 15,000 have already hatched. None of the young fish have yet been turned loose, nor will they be until they are large enough to probably be put in the river in about two weeks.

As about 90 per cent. of the eggs taken are hatched, the outlook for fishermen on the Columbia river is encouraging. The hatchery is prov-ing more of a success than even the most sanguine had reason to hope when it began operations.

A BUSINESS PROPOSITION. A City Lady Who Required Proof Before Believing.

There recently appeared in the San Francisco Call, Chronicle, and Examiner, a proposition hitherto unheard of. It was an advertisement in which the Edwin W. Joy Company, in proof of the curative properties of Joy's Vegetable Sarsaparilla, offered to submit it to the terrific test of "no cure no pay." Many accepted, and their experiences are so convincing as to be almost beyond belief. Here is another, written under date January 6, 1890: -

January 6, 1800:—

DEAR SIRS: I accepted your offer to test the merits of your vegetable remedy in sick headaches, and called for a bottle and got it. I had been troubled for a long time, and had tried nearly everything, with little or no effect; but Joy's Vegetable Sarsaparilla seted almost like mark, and the first bottle relieved we from one of the worst cases of sick headache one ever had.
