State Fish and Game Protector Holl lister D. McGuire was in the city yesterday, having come down from Portland to interview the canners on the subject of providing him with the means of enforcing the law prohibiting the taking of fish on Sunday. Mr. McGuire, it seems, when appointed by the governor, had no definite idea of the unavoidable expenses connected with the duties of his office, but soon learned that if those duties were to be properly performed, some provision would have to be made in addition to the allowance from the state. Speaking to a representative of The Astorian, Mr. McGuire said: "Last year, and be fore the act was passed abolishing the commission, there were no difficulties encountered by the fish commissioners, those gentlemen having unlimited power to expend whatever was necessary in the discharge of their duties, but since my appointment as fish and game protector, I find that the allowance is barely sufficient for office expenses, much less to furnish a craft with which to patrol the river." "What step do you intend to take to

enforce the Sunday fish law? asked the

"Every step that is necessary," was the reply. "While I hold the office I shall certainly see that no violations of the law are allowed to pass unpunished "

"What encouragement have you met with from the cannerymen?" was asked.

To this Mr. McGuire replied that he had called upon nearly all the canners who reside in this city, and he found a willingness on the part of all to assist in every way in enforcing the law. "All I have seen so far have signified their willingness to help defray incidental expenses."

Mr. McGuire left for Portland last evening on the Telephone, but will be in this city again about Tuesday or Wednesday next. It is his intention to secure a fast little steamer and patrol the river from one end of the fishing. grounds to the other and make salutary examples of all who are caught fishing or with fish in their possession during.

The house was completely filled with patrons and Triends who were present to witness the exercises.

The pupils taking part in the program, acquitted themselves in a laudable manner and the recitations were well rendered, as were the songs.

After the completion of the program, Rev. L. Walby favored the audience with an interesting speech, in which he told of his school days, calling attention to the superior advantages enjoyed by scholars in modern days:

Uppertown has just cause to be proud of the talent contained in that part of effort successful, our city, especially among the pupils of

CLATSOP COUNTY'S INSTITUTE. A teachers' institute for Clatsop county will be held at Astoria, beginning at 9 o'clock, Wednesday mornoing, April 19th. There will be day sessions, especially intended for the discussion of practical themes, and evening sessions of a more popular character. It lasts over three days. The day sessions will be held at the Court street school house and the evening sessions at the Presbyterian church. The object of the institute is to have something useful and practical rather than ornamental; yet from present prospects, it will be interesting and lively. A full attendance of teachers from all parts of the county is expected. A good substantial program has been prepared, and will be ably carried out. State Superintendent McElroy has consented to be here, and this in itself will insure the success of the institute. School directors, clerks, and all interested in education, and the public generally will be most welcome at any and all the sessions, day or evening, and may find it a pleasant way to spend a few hours, as they will

PROGRESS OF THE WEST.

The figures which tell the truthful story of progress and developement in the Western states and territories for the decade between 1889 and 1890 point out the great future before this wide and resourceful region. Nothing could more amply illustrate the rapid and continuous growth of the great new country that the publication of the figures of comparative advancement in landed and personal wealth. Among them all Washington state stands prominently at the head of the col-

In 1880 the total assessed valuation of the then territory of Washington was but \$23,810,693. The increase of wealth during the ten years following was constant and rapid, the additions being at the rate of \$10,000,000 a year. In 1890 the aggregate worth of property in the new state was swollen to \$124,765,485, an increase of nearly 500 per

The adjoining neighbor, Oregon, was not so fortunate, barely doubling ber wealth in the ten years. The 1880 valuation here was \$52,522,084; in 1890 it had increased to \$106,025,781.

Idaho rose rapidly, piling up her wealth nearly 400 per cent. The increase was from \$6,440,876 to \$25,581,-

In Wyoming during the same period the valuation rose from \$13,621,829 to \$31,431,495.

In Utah it jumped from \$34,775,279 to \$104,759,750. In Arizona from \$9,270,214, to \$21,434,

In New Mexico from \$11,363,406 to \$46-641,010

In Colorado from \$74,417,693 to \$188,-In North Dakota Trom \$8,786,572 to \$78,394,500.

In South Dakota from \$11,534,250 to \$131,395,590. In Montana from \$18,609,802 to \$106,-

This is indeed, wonderful progress, When it is understood that this is but the development of infancy, one can but conjecture the vast possibilities in store for the boundless and golden West. The progress has been phenomenal, but it will not stop here. The land of magnificent distances and unfathomed resources has but fairly crossed the score on the great track of advancement. Strength is gathered at every bound. Unprecedented gains are

made cach year. One reason for this unparalleled increase in valuation is found in the increase of vaule in agricultural lands. Colonel Pat Donan left Hot Springs, The demand for them by practical farmers from all over the country has beeng great. They have grown to realize the enormity and quality of the products with which they are capable of unfailingly rewarding the toil of the husbandman. In no other great region can such varieties of products be taken from the soil. Nowhere else can the same amount of money be yearly derived from the acres. It is not "what can" be grown on these fertile farms, Mr. Arthur Perkins, of Portland, was but, rather, "what cannot," which renlers them so valuable and so highly susceptible to rapid increase in value.

THE OPEN SWITCH

AN ESTABLISHED SAFEGUARD, Anybody who travels by cars knows what is meant by "an open switch." It is the terror of railroad men, and the dread of the traveler. Its victims—killed, horribly mangled or mained for life-are numbered by

the score each year.
Yet even the dreaded "open switch" is not so widely fatal as is a certain disease, which, without ceasing its activity for an instant, is

daily filling hundreds of graves.

What is that terrible ailment? you ask It is Heart Disease! "But," you reply, con-

fidently, "I haven't any heart disease—my heart is all right." Are you SURE? Dr. Franklin Miles, of Elkhart, Ind., the distinguished specialist in diseases of the heart and nervous system, states that disorders of the heart are as common as those of the lungs, liver, stomach, bowels or kidneys, though often unsuspected. The reason people are not aware of this important fact is because symptoms of heart disease are not usually recognized as proceeding from this organ, but are attributed to some other source. If you have shortness of breath, fluttering or palpitation, pain or tenderness in left breast, shoulder or side, oppressed or choking sensation, fainting or smothering

spells, your heart is affected.
"I had been troubled with heart disease for years. My left pulse was very weak, could at times scarcely feel it, excitement would weaken my nerves and heart, and fear of impending death stared me in the face for hours. Dr. Miles' Nervine and New Heart Cure are the only medicines that have proved of any benefit and cured me."-L. M. DYER, Cloverdale, Md.

"My wife has been taking Dr. Miles' New Cure for the Heart. She thinks it wonderful. She has not been troubled with pain or smothering spells since using it. We have also used Dr. Miles' Pills, and we find them all they are claimed to be."—GEO. L. FINK,
