That's what they offer, and in good faith—they cure you, or pay you, no matter how had your case, or of how long standing.

But—to it so much of a risk? They have a medicine that cures Catarrh, not far a time, but for all time. They've watched it for years, curring the most hopeless cases. They know that in your case there's every chance of success, almost no chance of failure.

Wouldn't any one take such a risk with such a medicine?

The only question is—are you willing to make the risk?

If so, the rest is easy. You pay your druggest fifty cents and the trial begins.

Can you ask more?
