In its issue of November 9th last, th Oregonian, in predicting the result of the democratic success in the national campaign said: \* \* \* "Nevertheless It is sure that the result of the election of yesterday will be the begin ning of a period of industrial stagnation, resulting from the timidity of capital and uncertainty of business, and that the consequences will recoil with terrible force upon the labor classes, through whose vote chiefly the result has been brought about. They who know these things have but to wait regretfully for results to come about which they so plainly foresee."- The Oregonian is truly a wise prophet, although just a trifle inconsistent. At the time of the publication of the above another editorial on the same question was also published, in which an endeavor was made to show that no matter what the result of the election should prove to be the business of the country further, asserting that there was a general feeling in business circles that Mr. Cleveland could be trusted. There is nothing like being in a position to say, "We told you so."

It must be pleasant to the misguided wage-carner who voted the Democratic ticket last November, to think that in addition to lowering his wages by the superior service it accords to the traveling public in maintaining two daily through trains to Comaha, St. Paul, Chicago and points east, thoroughly equipped with all the latest appliances for the comfort and safety of its patrons besides shortening the distance materially with its fast trains. The present train schedule enables passengers to reach St. Paul seven hours quicker and Chicago twenty-four hours quicker. Omaha and Kansas City and intermediate points, forty hours quicker than any line from the Pacific Northwest. would be safe. The article went even

The republican party has been, and ever will be, the champion been, and ever will be, the champion of a legal tender currency, a dollar that can be spent for a dollar from the Atlantic to the Pacific.

The situation in the salmon business is daily growing more serious, and there is now no possibility of the lost ground being regained in the six weeks that remain before the close of the teason. At the present time the shortage is of so serious proportion that even were fish plentiful the deficiency could not be overcome. The approach of July without the run of fish usual about this time has dissipated the last hope the canners had for this season and the prospects are decidedly discouraging.

A New York policeman claims to be able to mesmerize a drunken mar without using his club. Truly science marches onward. Why not stop the consumption of intoxicating beverages by mesmerizing men who drink?

Before Senator Martin was given the distribution of administration ple in Kansas, he was compelled to promise that no populist should be allowed even the tiniest bits.

An exchange says that Lizzie Bor den is a lucky woman. Wonder what would have to happen before that edltor considered a woman unlucky?

Democratic office-seekers would willingly relieve Mr. Cleveland of his troublesome surplus flesh.
