LEARN TO SWIM.

The crowds of holiday makers now thronging our beaches excite peculiar Gearhart, and at Ilwaco beaches during the last few weeks that and children who go into the water are ignorant in this respect. Why the art is not more generaly included in the instruction of children is beyond comprehension. Every one, sooner or later, is liable to get into the water for pleasure or be precipitated into it as

Residents of this city have special reason for learning to swim. We are almost surrounded by water, Many are and to make steamboat excursions to various points, Nothing can be more absurd than for people to attempt to do any of these things without knowing how to swim. Being almost sur very doors, the opportunities for learning to swim are numerous, and therefore the neglect of such opportunities becomes more unpardonable.

It is unquestionably true that persons sometimes lose their lives in the also true that people drop dead while alking in the street. Byeryone must admit that the vast majority of drowning accidents happen to persons who be said that persons who have studied the subject find out that in many cases swimmers are attacked with cramps the difficulty often comes from not having been properly instructed.

It will probably be of little avail to admonish people to learn to swim as a protection when accidents occur, be indulges in the thought that he or she will be the lucky individual to escape. The most fetching argument that can be presented probably is that a vast amount of pleasure can be enjoyed by persons who know how to swim that the exercise is healthful, the viger imparted to the body is valuable as well as agreeable, and, in fact, the list of advantages of knowing how to swim lengthens as the subject is dwelt upon. Very few are too old to acquire this accomplishment, and, when once acquired, it can never be forgotten. As previously stated, it is a means of affording no end of pleasure; it may also enable a man to save his life in disaster, and, better still, i may give him the power of rescuing others.

crank platform at Chicago, we read:

"We suggest for the consideration of our fellow citizens that the refusal of the opponents of bimetallism to propose any substitute for the present law or to elaborate any plan for the future indicates either an ignorance of our financial needs or an unwilling-

Exactly that which is proposed as a substitute for the present law, is that the government shall not be coerced to interfere in the metal market by constant purchases of sliver when we have already monetized a great deal more of It than the people are willing to accept as circulation. The only way to get silver into circulation has been to issue certificates on the coin, and the treasury notes on the bullion, We now have silver bullion by the thousand pretations of the law. This is an absurdity beyond precedent-a very airocity of folly. If we adopt free coinage of silver, we know that we at once go to the silver basis, 50 per cent, repudiation. All nations but ours have been taught that lesson. We have to know it sooner or later, and the soon-

er the better. When we stop the purchase of silver, we simply follow the example of France, the great bimetal-lic country. We shall do it in the interest of bimetallism. The Colorado statesmen and financiers are not bimetallism for the cause it is impossible they should be followed by permanent good effects. No specific which weakens and constants are not bimetallism. 'arrogant, malicious, ungenerous and vindictive," and the reason is their sliver mines have been gold mines for them. They have tumbled into the treasury vaults sliver pigs, and they have scooped from those vaults gold three times a day is about the dose. Local weather for the twenty-four coin in exchange.
