There is a good deal of talk in certain quarters, mainly from people who think themselves wise above what is written and who take keen delight in their selfknowledge, adverse to the use of the bleycle for women. The charge that it is not modest for women to ride the bleycle is not deserving of serious at- fishing boat race to run over the same even if she wears what are collectively not as deserving of notice as the bath- lant. ing suits which women wear unchailenged at all our seaside resorts. The question whether bicycle riding is injurious to women's health is a most important one, the answer can only be given as the result of experience. Undoubtedly harm has been caused by excessive riding; but so it may be caused by too much rowing or walking. The general testimony seems to be that the use of the bicycle in moderation is beneficial to women, and in some cases the results have been found exceedingly good. Exercise on a wheel is so exhilarating that beginners are doubtless often tempted to ride too much. Assignet, this they should be supported assignee of I. W.
