Salmon-buyers and salmon-packers are now busily engaged in figuring upon the fall pack, that they may be better able to judge the markets. The pack of the entire coast for the year is placed as high as 2,000,000 cases, but conservative packers think that it will fall 100,000 cases short of that mark. Some 250,000 cases, it is said, are still on hand from last year's pack, and if this is so, it is not probable that the market will be short. Mr. A. T. Dunn, of the firm of Ainsworth & Dunn, prominent fresh-fish shippers of Seattle, is now in the city. He reports that the pack on Puget Sound has been unusually large this year, and that the cannery have not been averse to taking every case of salmon they can get. Blaine & Drysdale, at Point Roberts, put up about 55,000 cases; Devlin, at Friday Harbor, 7,500, and George T. Myers between 20,000 and 25,000. This is a little better than last year.—Oregonian.

I. S. Richards, of North Beach, Wn., yesterday brought to this city a bottle that he picked up on the sands, and which had evidently been washed ashore at a recent date. In seven different languages printed thereon, the flunder is notified that the paper was thrown into the sea for the purpose of measuring ocean currents, and asking them to immediately forward same to the nearest American consul, or to the hydrographic office at Washington, U. S. A. This particular slip was tossed into the ocean from the N. P. S. S. Victoria, on the 4th of March, 1894, in latitude 50 degrees 49 minutes north, longitude 146 degrees 24 minutes west, and was signed by the master of the vessel. In raised letters on the bottle, are the following words: "Durkin Bros., Limited, of China."

Melon-shaped sections of chamolashin overlapped and feather-stitched together form an attractive tobacco pouch. This should be lined with brown taffeta silk, finished in a deep frill at the top, this frill being formed by the silk cord drawing string.
