### ALONG THE WATER FRONT.

The schooner Kate and Ann will leave out on Wednesday.

The State left out yesterday morning

Capt. John Pickernell's big scow has been fitted with a cabin. Capt. Intyens, of the Kate and Ann.

will be down from Portland tomorrow

The Mozambique is waiting for a tug and may leave up the river this after-noon in tow of the Hayward,

river yesterday afternoon with 8 passer gers and a small load of produce.

The ship Colony left down the river yes terday in tow of the Emma Hayward. She should be here this forenoon.

The launch Winn was on the gridiron at the Astoria Iron Works yesterday having repairs made to her stern,

One carload of salmon was shipped east by the O. R. and N. Co. yesterday. Ship-n'ents are still exceptionally slack.

The steamer Harrison leaves out this morning for Tillamook with 25 tons of general cargo and several passengers.

All the machinery for the Devlin cannery at Friday Harbor is now ready for shipment from the Astoria Iron Works,

The Alarm came down from Clifton for woman which yesterday morning. She will lay up here always in favor. today, and return tomorrow with a load

ing into disrepair for many months, was fixed up yesterday and is now compara-

Fish were running very slack yesterday everywher... At Clifton the returns from 70 boats and a large seining outfit, brought in only five tons of fish.

Although the blow early yesterday morning was severely felt in the vicinity of the mouth of the river, no serious results to fishermen have been reported.

The Sarah Dixon went to the buoy depot yesterday afternoon to unload 25,000 feet of lumber. The material is to be shipped to the Umpqua and Hecata Head, for government work at those stations.

The steamer Alice Blanchard was expected in from San Francisco yesterday afternoon, but did not arrive on time. She is looked for this morning. Her cargo contains 100 tons of Beaver Hill coal taken on at Coos Bay.

Captain Ellis, of the Ancona, well be down from Portland this morning but if is doubtful if his vessel will leave out today. She draws 23 feet of water, and the tides just now are "late and early," She will probably start on her homeward journey tomorrow morning early,

An epidemic of net and boat stealing see as to have sprung up in the last week, and a great deal of work has been done right along the local waterfront with boats that are tied up for the night alongside the various slips. It might be well for the police, more particularly those on the night beats, to keep a vigilant look out in the vicinity of the docks and be ready for the thieves when they put in an appearance. Judge Osburn will do the rest.

The Potter still continues to draw The Potter still continues to draw many visitors whenever she goes to her dock, and Mr. G. W. Lounsberry, the company's courseous agent, does not tire of doing the honors, and praising the qualities of the flagship. It may not be out of place to state that Mr. Lounsberry's presence, and his untiring efforts for the comfort of the excursionists on the trip last Thursday went very far to making the occasion the delightful experience that everybody found it to be.

The owners of the British ship Kirkhff are the Steels, famous as a family of crack cricketers, all over the world. The four sons are all prominent sports-men. The captain of the Kirkhill has entertained rival cricketing teams in nearly every large port he has ever touched at and on one occasion did the honors in Sydney Harbor to the All Eng-land Eleven and the Australian Eleven, the former team being captained at the time by one of the owners of the vessel.

Capt. Troutman, of the steamer Delta, is at Whatcom, from Seattle to answer to the charge of smuggling brought against him by Mesars. Henspeter and Myers, who were employed on the Delta when she was on the run between Whatcom and Victoria. He says there is "nothing in it" but spite work, and is confident of acquittal. He declares that he will have Capt. Henspeter, who is now mate on the Island Belle, arrested for perjury. Capt. Troutman, of the steamer Delta

Mr. Nelson Troyer's latest invention, the oval can soldering machine, was completed yesterday at the Astoria Iron Works, and will be shipped to Mr. Jl G. Megler at Brookfield tomorrow. The machine has been described in the Astorian on a previous occasion. It is to be fired with the Clark kerosene oil heating system, and will be able to account for thirty cans per minute, holding twenty simultaneously. A second machine is now under way and will be delivered to the Cutting Packing Company.

The schooners Confienza, Liszie Prien. Mayflower, and Joseph and Henry are in the harbor at the mouth of the Siusiaw river, with a rapidly shoaling bar fencing them off from the ocean. It will probably hold them there until the spring freshets clear a channel for them through the sandbank. The four schooners have been engaged in the lumber trade between the Susiaw and San Francisco, and about two weeks ago they all ran into the harbor together. Cargoes all ran into the harbor together. Cargoes were ready for them at the mills and

the crews began loading at once. Before they were ready to clear a heavy blow sprang up and made the entrance to the harbor a les shore. The heavy combers that rolled in on the beach, and piled sand upon the bar that stretched across the mouth of the river for a week, when the gale subsided a barrier been formed across the entrance to the harbor that prevented any vessel large enough to go to sea from entering or leaving the river. At low water the bar showed above the surface of the water in many places, and the four schooners were hemmed in by a wall of sand, with little chance of getting away until the winter freshets wash it away. The schooners have been carrying lumber for nearly two years at prices that hardly paid running expenses. Recently there was an advance in lumber charters, and thay hears to be seen to said the control of t

WHY CANADIANS DO NOT FAVOR ANNEXATION

Jno. George Bourinot, in May Forum. At present, assuredly, the people of Canada can see no reason for a "po-litical union" in the weaknesses and evils f the purely democratic system of their neighbors. When Canadians are invited even on the floor if Congress itself "to cast in their lot with their own continent," and are assured "that they shall have all that the continent can give," hey refuse to consider the offer serious iy, not because they have no interest in the progress of their American Cousins, who are the inheritors of English institutions, but because they know that they are working out those institutions on principles far more conducive to the pure and effective administration of public af-fairs—that in this respect, at all events, they are already in advance of a great and prosperous people who have been led in the course of years by reckless pol-The Mayflower came in from Young's iticians into methods of government which have lowered the standard of produce. public morality and created scandals of ner-reaching influence on the nation. Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its I recommend it as superior to any prescription good effect upon their children." DR. G. C. OSGOOD,

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other hurtful agents down their throats, thereby
