all of the Business of the Northwest.

Thursday the news was flashed over the wires that Seattle had completed the subed that the St. Louis parties who are to do the work will commence opccupy five years and cost \$7,000,000.

What is the expenditure of this imnense sum of money for-what do the promoters hope to gain as profit on the capital invested?

There is but one reply to the queryfishing rods to increase the traffic through the port start in with of Seattle it is found necessary to have the common a fresh water harbor, or the large ocean carriers of the world's commerce will bamboo poles not go there. Hy means of a firstfor a class harbor it is hoped to attract the few cents wheat and flour of the Walla Walla and Palouse country to Seattle for shipment. and run up The most of this traffic is naturally tribinto the \$. \$. utary to the Columbia. It is also no for those that doubt believed that the canning of salmon are lots better. can be increased on the Sound with the So you see we creas all lines of business and bring new can suit every capital; and that new outlets for the timper of that region will be found, through

an increased ocean traffic. During the season 1894-95 up to date he Puget Sound grain fleet has embraced thirty ships. For the same period the number of vessels which left the Colum-

British Columbia, 494,371 cases. These figures speak for themselves and week, and than for the same week a alone give ample reason for the building of the Lake Washington canal.

What is the necessity for a railroad to

Astoria? The old residents state that they have existed for fifty years or more their natural lives in the same way. This is self evident and needs no proof residents alone establish such fact. For twenty years or more Astoria was but a village of 2,000 people. The establishment of the salmon canning business brought a few more people and enlarged the town. There has been no material growth of the town in five years, and there is nothing to further improve or enlarge it or better the condition of the mass of fis citizens. Those who are now making fortunes here, care little for the most part, about the growth and prosperity of the rest of the town or the people, and should the salmon be exterminated,

would leave Astoria and its interests far behind. But Astoria is destined for something different. Upon the broad plane of the world's commerce there is a place of equality for Astoria among the great ports. Naturally in a commanding position, with a magnificent fresh water harbor, but ten miles from the Pacific, and with a channel navigable for the largest ships without the construction of cannais, the possibilities open to her in the

near future are limitless. Seattle is about to spend \$7,000,000 in a canal to secure a fresh water harbor, while the city of Manchester, England, is completing a similar canal at a cost of \$40,000,0000. Capitalists and conservative business men would not invest their money in such enterprises were not the ends to be obtained commensurate with

Astoria only needs fifty miles of rallroad to connect it with the rest of the world, and make it possible to bring the products of the great empire in Eastern Oregon and Washington and the Wilamette Valley to its great port of shipment. The railroad will also provide adequate means for getting the immense body of timber in the Nehalem Valley to market, as well as quick and direct ommunication with all Eastern and in-

Astoria and the people of the Columbia river are only required to furnish the right of way and a land subsidy valued at about \$1,300,000.

It is a moral certainty that if the present opportunity to secure the railroad and the consequent control of the great traffic of the Northwest is not embraced, Scattle will have so firmly established its hold on this bustand will have so well laid out its lines in all directions that before another effort on the part of Astoria could be made to build a railroad, the business tributary to the Columbia will be for a large part lost-turned into other chan-

two-fold: Seattle is determined to have the traffic of the Northwest; and, delay will be fatal to Astoria. INSURGENT SUCCESS

They Are Said to have Gained New Strength.

Tampa, Fia., May 10.-Passengers ariving on the steamer Mascotte say the ondition of things is encouraging to the Juban insurgents. It is said Gamaguaya has been invaded by Gomes, who with 300 insurgents besieged Guayaro Monday, There were about 2,000 Spaniards in the city. After the fighting became disastrous for the besieged, a regiment from Cadiz numbering about 2,500, arrived and attacked the Cubans in the rear. Gomez quickly recovered from the first onslaught. While a small force kept up the conflict with the forces in the city, idy of \$500,000 which they had agreed to his main body faced the new enemy. The raise towards the building of the canal to fighting was very flerce but it is asserted nnect Lake Washington with tide wa- that the strategy of Gomez and the valor ter for the purpose of furnishing a fresh of the insurgents resulted in a victory water harbor for deep sea vessels. # DUN'S REPORT.

New York, May 10 .- R. G. Dun & Co.'s Weekly Review of Trade will say tomorrow: The event of the week is a demoralization of foreign exchange caused by the enormous sales of bonds abroad. Besides the sale of \$10,000,000 Manhattan and other railroad bonds through the syndicate, large purchases on foreign account have been recorded for some weeks, so that the aggregate probably exceeds \$50,-000,000 since the sale of the government's. Safety for the summer means much for all business and the syndicate deems it so fully assured that it distributes 40 per cent of the money advanced by associates which relieves a large amount to atimulate operations in securities and pro-The crop prospects also have greatly improved, and this is of still higher importance as it will do much to determine the character and volume of all business after the summer uncertainties are over. In addition business is reviving, although the gain in many findustries is retarded by the many strikes.

Associated Press.

Chicago, May 10 .- Yesterday the West ern lines in solemn concluve decided that after May 19th there would be and account of homeseekers' excursions or for any other reason. Now there is every probability that not only will regular mmer tourists' rates be slashed right and left, but that regular rates as well will become badly demoralized. The trou ble has arisen over a circular of the Burlington road which offers to agents a ommission of \$5 per ticket instead of \$2 per ticket as agreed upon by the Western lines. The hotel and stage companies which have a monopoly of the ousiness at the Yellowstone Park ansounced a material reduction in rates to pe charged visitors to the park. Hereofore it has cost \$65 to make a tour of the Park, but now the rate is put at \$4.50. This rate covers a stay of five and one-half days in the park, hotel expenses and a complete circuit of the park.

### BOLIVIA GETS TO THE OCEAN.

Washington, May 10 .- The conclusion of the Chill-Bolivia treaty is said to be of far-reaching importance, particularly to Bolivia, as it makes the latter a Pacific coast country after it has been inland for ten years. Officials here say that when Chili concluded her war against Peru and Bolivia, the victors took all the eaconst territory of Bolivia, leaving her landlocked. The new treaty will enable her to resume commerce by the Pacific without crossing Chillan soil and it will permit the re-establishment of her navy,

### GLOVE CONTEST IN LONDON.

London, May 19.-Jem Smith and Ted Pritchard fought tonight at Central Hall, Holburn, for the heavy weight championship and 200 pounds a side and the purse. The decision was to be given to the best man in 20 rounds. In the drat round Pritchard had the advantage, but in thes econd Smith got in a severe blow on Pritchard's body and soon knocked him out of the ring.
