HEILBORN & SON.

ASTORIA IRON WORKS

General Machinists and Boiler Makers
Land and Marine Engines, Boiler work, Steamboat and Cannery Work a Specialty. Castings of all Descriptions Made to Order on Short Notice.
John Fox, President and Superintendent
A. L. Fox, Vice President
O. B. Prall, Secretary

They Lack Life

There are twines sold to fishermen on the Columbia river that stand in the same relationship to Marshall's Twine as a wooden image does to the human being—they lack strength—life—evenness—and lasting qualities. Don't fool yourself into the belief that other twines besides Marshall's will do "just as well." They won't. They cannot.

Parties desiring
Floral Designs and Choice
Cut Roses and Carnations
For Decoration Day, should
Call at Grunlund & Palmberg,
Cor. 8th and Exchange Sts.

Kopp's Beer Hall.

Choice Wines, Liquors and Cigars.
KENTUCKY WHISKEY
Only handled over the bar. The largest glass of N. P. Beer. Half-and-half's.
Free Lunch.
Chas. Wirkkala, Proprietor.
Cor. Cornwell and Lafayette Sts.

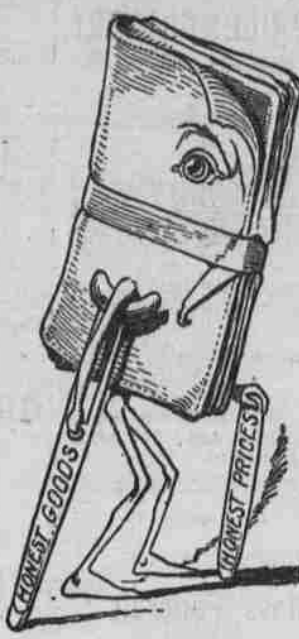

THOMAS MOKKO.

The Blacksmith whose shop is opposite Cutting's cannery, is now prepared to do such odd jobs as making new canneries, coolers, repairing old ones, making new fish boat irons, and repairing old ones, and all other blacksmithing that requires first-class workmanship.

Carpenter Shop.

Your mind is on repairing your house this spring; possibly on building a new one. If so, remember, we are carpenters and builders, with a shop full of tools always willing to do such jobs and want your work.
MILLER & GOSSETT,
Shop on Ilwaco Dock.

A THIN POCKETBOOK!

Marshals Instructed in Regard to Cuba.

PACIFIC MAIL COMPANY SUE D

Heavy Damages Claimed on Account of Colima Disaster—How Stock Speculation Ruined Him.

Washington, June 14.—Attorney-General Harmon has received the following letter from the secretary of state in relation to the filibustering expedition against Cuba: "It is a matter of current rumor and newspaper report that at various points in the United States attempts are being made by the enlistment of men, equipment and arms of vessels and by other illegal measures to aid in the insurrection now in progress in Cuba. While this department has not been furnished with tangible evidence confirmatory of such rumors and reports, it deems it of great importance that no possible opportunity shall be given for complaint that the government is neglecting its duty in any respect fallen short of its full duty to a friendly nation."

Complying with Mr. Oney's suggestion Attorney-General Harmon has directed all United States attorneys and marshals of the Atlantic coast line districts to act in conjunction and take all steps necessary and proper to prevent violations of the neutrality laws.

A FORGER CONFESSES

New York, June 14.—Albert S. Moore, whose forgeries were discussed yesterday, has made a confession. "I first forged three years ago," he told a reporter. "I was then book-keeper for Inman, Swan & Co., for whom I had worked for 14 years. I had been speculating on the market and was long on cotton. Late one evening my broker told me I would have to put up more margin at once. I was in deep water and my failure to keep the contract I had with him would have necessitated his failure. I had no money, but told him I would give him the needed amount. In an unfortunate moment I decided that I could raise money on bad paper. I expected to raise my fortune and buy back the note. I made a note with a forged endorsement and sold it to the bank. From that time things went bad with me. I was on the wrong side of the market and grew deeper and deeper. I had to keep on selling bad paper to raise money to keep myself up. But all the time things got worse and worse until I am here. I am positive that there was not over \$10,000 of the paper."
Moore was secretary of the Sunday school of the Collegiate Church R. formed church. He was arraigned in the police court this afternoon and placed under \$2,000 bail.

DUN'S WEEKLY REPORT.

New York, June 14.—R. G. Dun & Co's Weekly Review of Trade will say: It is no longer a question whether business improves. Not a long time has elapsed since reports from all parts of the country have so uniformly favorable. The daily average of bank clearings in June is 248 per cent less than in May, though the weekly per cent less in 1892. The most potent influence has been the receipt of more favorable advices regarding growing crops. Labor is a long time keeping up near when the crop export will bring gold higher and though foreign operations in stocks have been insignificant this week, the effect of previous trade operations has not been exhausted. Diminished receipts of money from the interior indicate better employment in business and especially at the West, and the volume of commercial loans steadily rises, and is now fair, for this season, even in good years. The failure for 1894 that has been in the United States against 22 last year, and 21 in Canada against 40 last year.

SENATOR BLACKBURN SPEAKS.

Frankfort, Ky., June 14.—Senator Blackburn addressed a large audience here tonight. He said he hoped it would not be necessary for him to speak to his neighbors, as he had done himself, against slanders and slanders. Every newspaper wearing the collar of its master, every quack and stockholder, had combined with the administration and money power to cause his defeat. Senator Blackburn told last night that he (Blackburn) was preaching hereby. Carleton had sent here and he thought it would be more civil if the president would make the combine complete and lock the doors of the White House and keep himself. Carleton was taken to task for saying that he had never favored the free and unlimited coinage of silver. He sat by his side and though he heard him voice for the silver bill in November, 1873, and speak for the acts of 1890, he would give the best member of his body if Carleton had not been the ablest advocate of the free and unlimited coinage of silver. But Brutus tells you that he had not, and surely Brutus is an honorable man.

MISSOURI DEMOCRATS.

Lebanon, Mo., June 14.—Chairman Farley, of the Laclede county Democratic committee, today said: "I have now 52 signatures, or four short of a majority of the chairman of county Democratic committees in the state, to call for a mass convention for the consideration of silver. From the correspondence I have, I can reasonably expect favorable action from thirteen other counties." He said that during the week the four counties necessary to complete a quorum would be secured. If the state committee then refused to call the convention, prompt action will be taken to secure one otherwise.

SPOKANE BONANZA.

Spokane, June 14.—The War Eagle Mining Company is paying a dividend of \$20,000, or 10 cents a share. This mine is in the Trail Creek district north of Spokane. A year ago it was a prospect. The promoters had taken bonds on it, and tried in vain to sell the property for

THE SALMON TRADE

Another Week Nearer the Close of the Season.

QUALITY OF THE CHINOOKS

Reports From the Big Trade Centers Show an Increased Demand for Best Grades Everywhere.

Astoria, Ore., 10 p. m., 14th June, 1895.—Stocks continue to move away from the river in a fairly satisfactory manner and at all the larger canneries shipments are being made almost as fast as they are placed in readiness for orders. The feature of the week has been the lively demand from extreme Eastern markets which exceeds the orders from that section for any other year since 1887. Several Southern centers also are showing more than the usual interest in canned salmon, and it looks as if a short pack and slightly increased demands would hold prices up to a very satisfactory figure up to the end of the season. New York correspondents report a practically empty market in Columbia river spring fish, and very satisfactory inquiry from all the big grocery houses. Boston reports that Massachusetts buyers are pushing orders fast. Omaha correspondents all agree that the rise in canned meats has had a beneficial effect on the price of salmon in that center, and the demand is growing. In St. Paul salmon is firm and active, and four large orders have been placed in the twin cities during the last few days. There have been several cuts in freight rates of transcontinental lines which up the lakes. Some of the latest schedules are New York, 70c; Pittsburg, Buffalo, Cleveland and Detroit, 75c; Cincinnati, 80c; Boston, 90c; San Francisco, 100c; Columbia, 110c. Liverpool and London reports show that while the extraordinary demand for all varieties of salmon has perceptibly slackened up, the market is still a very active condition. Buyers of Columbia river fish are very busy and several big inquiries are being made for large lots and holding for many prices which it is believed can be obtained by reason of the increased desire among the western centers for good goods, particularly ovas. Though the ovas can seem to be showing more favorably toward the better grades of trade, at some points by the rate that can be being the local size of pack, river size, shape and contents. On the other side of the market, the price of ovas will be done all day. All the canneries are at a standing order, but the few that are still catching are used for good stock and shipped to Eastern Canada.

CROWDS GREET CARLISLE.

Louisville, June 14.—The large personal following of Secretary Carlisle in this city, and the keen interest felt by all classes in the currency question, filled Astoria Hall this evening with such a crowd as never before congregated on a similar occasion. Long before the hour at which the address was to begin (7:30) the hall was overflowing with the well-to-do and business men joining with the laboring mechanic and countryman. Carlisle was the meeting a gathering of Democrats to honor a party leader. The Republicans were out in force.

LONG SENTENCES.

San Francisco, June 14.—This 27th sentence in Judge Wallace's court and the punishment of wrong doers who had been convicted was announced. Charles Hennessy and Thomas Hutchinson had robbed a sailor of \$120 and nearly killed their victim while doing it. Hutchinson was convicted of a prior offense and sentenced to life imprisonment under the habitual criminal act, and Hennessy was given 20 years at Solano, the usual sentence for robbery and perjury.

CHANCE FOR OUR BOYS.

Washington, June 14.—Owing to the unusually large number of appointments in the line of army and engineer's corps (the past year) the department has issued in two annual examinations were now more vacancies than can be filled from the classes just graduated. Some of the vacancies are in the engineer's corps, and some in the army. The vacancies in the engineer's corps are in the line of army and engineer's corps.

AGAINST THE PACIFIC MAIL.

San Francisco, June 14.—Geo. D. Ross, for many years a seaman in the U. S. S. Albatross, was the principal witness at today's investigation by the federal inspectors into the case of the Colima. He said the disaster was due to improper stowage of the cargo, of the steamer being too heavy, by reason of over-loading, and to incompetent officers.

MILITARY APPOINTMENTS.

Olympia, June 14.—The governor today made the first appointments under his new military law, by which all commissioned officers are declared vacant. He appointed Col. E. M. Carr, of Seattle, brigadier general to succeed J. M. Mitchell, Portland; vice-president, F. X. Mitchell, Marion county; secretary, George H. Himes, Portland; corresponding secretary, Wm. Kappas, Portland; directors, T. T. Geer, Marion county; Wm. Galloway, Yamhill county; T. H. Humphrey, Washington county.

CORNELL WINS.

Ithaca, N. Y., June 14.—The first annual race between the freshmen eight, of Cornell and of the University of Pennsylvania, was rowed this afternoon at Cayuga Lake over a two-mile course, and Cornell won by nine lengths in 11 minutes and 3-4 seconds.

AID FOR SUFFERERS.

Denver, June 14.—The Rev. Geo. Secord, a clergyman of Grant county, Oklahoma, is in Denver seeking aid for the drought sufferers. All the inhabitants of the western part of the Cherokee strip, he states, are on the verge of starvation.

THE NORMA LOST.

San Francisco, June 14.—Private advice received by the insurance company in this city and by the Merchants' Exchange, report that the San Francisco schooner Norma is lost forty miles north of Astoria. No further particulars are given.

FIGHT POSTPONED.

New York, June 14.—The Dixon-Erns fight has been indefinitely postponed on account of the refusal of the mayor to grant a license to the Saasde Athletic Club.

FLAG DAY IN CHICAGO.

Chicago, June 14.—Flag Day, inaugurated one year ago by the American Flag Day Association as a holiday, was observed today by the public schools.

'LIGHT OF THE WEST' DEAD.

Macon, Ill., June 14.—"Light of the West," an imposing monument, valued at \$10,000, died today. He took first premium at the World's Fair.

THE PRESIDENT TO MOVE.

Washington, June 14.—It is expected that President Cleveland will leave for Buzzard's Bay early next week for the summer.

FLAG DAY IN DENVER.

Denver, June 14.—Over 5,000 children marched today in the Flag Day parade.

The Astorian has the largest LOCAL circulation; the largest GENERAL circulation, and the largest TOTAL circulation of all papers published in Astoria.

STATE NEWS.

Interesting Items Gathered From Oregon Newspapers.
Not long ago the secretary of a Young Men's Christian association was in doubt as to the best method to get the public to turn out to their Sunday afternoon meetings. He had circulars printed and generously distributed on the streets, announcing their meetings, and at the same time published the fact in the town paper. On the next Sunday the association rooms were filled. It is the value of the two schemes he asked all those who had seen the announcement by circular and had been impelled to attend thereby to rise. Only ten or a dozen stood up. He then requested all those who had been drawn there by the announcement in the paper to rise, when almost the entire body of the crowd got up. A well worded advertisement judiciously placed in your home paper is the best possible way to reach the public.—Oregon Monitor.

The government tug General Wright arrived several days ago and is making the survey of the bay. The survey of the interior of the bay is almost completed and shows but little change, if any, as to the best method to get the river in a fairly satisfactory manner and at all the larger canneries shipments are being made almost as fast as they are placed in readiness for orders. The feature of the week has been the lively demand from extreme Eastern markets which exceeds the orders from that section for any other year since 1887. Several Southern centers also are showing more than the usual interest in canned salmon, and it looks as if a short pack and slightly increased demands would hold prices up to a very satisfactory figure up to the end of the season. New York correspondents report a practically empty market in Columbia river spring fish, and very satisfactory inquiry from all the big grocery houses. Boston reports that Massachusetts buyers are pushing orders fast. Omaha correspondents all agree that the rise in canned meats has had a beneficial effect on the price of salmon in that center, and the demand is growing. In St. Paul salmon is firm and active, and four large orders have been placed in the twin cities during the last few days. There have been several cuts in freight rates of transcontinental lines which up the lakes. Some of the latest schedules are New York, 70c; Pittsburg, Buffalo, Cleveland and Detroit, 75c; Cincinnati, 80c; Boston, 90c; San Francisco, 100c; Columbia, 110c. Liverpool and London reports show that while the extraordinary demand for all varieties of salmon has perceptibly slackened up, the market is still a very active condition. Buyers of Columbia river fish are very busy and several big inquiries are being made for large lots and holding for many prices which it is believed can be obtained by reason of the increased desire among the western centers for good goods, particularly ovas. Though the ovas can seem to be showing more favorably toward the better grades of trade, at some points by the rate that can be being the local size of pack, river size, shape and contents. On the other side of the market, the price of ovas will be done all day. All the canneries are at a standing order, but the few that are still catching are used for good stock and shipped to Eastern Canada.

What is 84 cents in New York. The manner in which it keeps up gives it a permanent appearance. The price in San Francisco is 65 cents. The price in Oregon ought to be nearly as high as that in San Francisco, and the difference between San Francisco and the east is too much. Give us a Near Guano canal and this will not be thus.—Bany Democrat.

There was never better prospects for a fruit crop than at present. All orchards are very thrifty, and peaches, plums and cherries show good growth. The east has been very favorable to all crops and the yield of fruit from all indications at present, will be unprecedented in the history of this city and valley.—Times-Mountaineer.

W. S. Byers of the Pendleton roller mill sent out a trainload of 10 flour in ten cars, or 200 tons, to get dirt on "China. Mr. Myers is said by the East Oregonian to be building up a very large trade in the Orient, and already has difficulty in supplying all called for by the orders placed with him.

The water is so high at the Clatskanie, that little work can be done until the river recedes to the normal stage. One section of the second gate is placed in position and as soon as the water falls down the other gates will be erected, the remaining work built and the upper bulkhead taken out.

They are holding mass meetings in Arlington, Ore., to discuss ways and means for holding the trade which Dalles City promises to get away by means of a new road which is projected. One measure thought favorably of is a bonus for telephone connection with Forest.

J. J. Bohn has taken the trouble to put a quantity of Yaquina bay oysters on floats and is feeding them for the summer trade. These oysters are taken from their artificial beds and placed on floats to keep them from spoiling.

The treasurer of Multnomah county received \$2,000 a year of Marion, \$1,200 of Clackamas, Douglas and Linn, \$1,000 of all others under \$1,000 to \$250 paid in Gilliam and Willows counties.

MELLOID, A NEW ALLOY.

The London Engineer, May 8, describes a new alloy which has been brought out by the Phosphor Bronze company, and it is said to justify its right to be called new, by possessing qualities not previously found in any of the bronzes. It is the invention of the company's inventor, Mr. Bull, already known as the inventor of Bull's metal. Melloid may be described as a malleable bronze; it is a mixture of copper and tin, which is entirely free from zinc, aluminum or iron, and it differs from phosphor bronze, manganese bronze or Bull's metal, in being tough and ductile at all temperatures. Many descriptions of brass and bronze can be forged or welded, but Mr. Bull states that with all of them there is a temperature at which they become brittle. This may vary from 400 to 600 degrees Fahr., and when it is heated they become tenacious and malleable, if their temperature be raised still higher.

MAKES THE POOR POORER.

Minneapolis Journal.
They call silver "the poor man's money." Well, maybe it is. It is the money of Mexico and India, and China, and other unprogressive countries, where the common people are certainly about as poor as they can be.

Black silk muslin and chiffon flowered in soft colors and large patterns make lovely summer gowns for matrons. They are made up over black tulle and require very little trimming.

Highest of all in Leavening Power.—Latest U. S. Gov't Report

Royal Baking Powder
ABSOLUTELY PURE
