TILLIAMOOK CABLE. It comes from good authority that at ast Tillamook Rock is to be connected by cable with the rest of the world, and that, at a very early date. Next Tuesday, so it is said, one of the lighthous: tenders will commence and lay the cable from the rock to Indian town, directly inshore from the rock. From the beach the line will run to Elk Creek, thence over the toll roads to a connection with the government line, already built from Seaside to Fort Stevens. The line from Souside to Bald Hill will be abandoned. It is thought that by building a new line via Elk Creek it will be more easily kept in repair during the winter time, as the malicarrier goes over the road twice each day. Stations will probably be put in at Elk Creek and Seaside, both for the convenience of the public and for the purpose of testing the line. Hereto-fore a difficult problem for the engineers to solve, has been the manner in which to connect the cable with the rock so that it would withstand the violence of the heavy seas during the winter months. It has at last been decided to extend an arm from the rock a sufficient distance so that the cable will be free from its rough and ragged edge, and to hold it in its proper place it will be secured at a dis-tance from the rock by a heavy anchor. Telephone instead of telegraph as originally intended will be used, thus saving

Last year our regatta committee printed its own programs, every man, woman and child who witnessed the sports was sup-plied, and the expense didn't amount to en dollars. But even if this year's committee had decided to call for bids, why didn't they do it in a square and manly fashion, by letting people know that they were open for offers? Instead of this they went round privately and advised two or three "on the quiet" to put in applications. The result is that an imposition is about to be worked on our isitors. This is no private snap. It is a public regatta given by the citizens of Astoria and to which they have subscrib-ed Pherally. One of the pleas for drawing out those subscriptions was the "cost of programs." Shall our visitors be al-lowed to go back to their homes and tell their friends with sneers that the city of Astoria had to charge for its regatta
