Among the ones noted on our way C. H.
Cooper, Geo. Bartley, Ford & Stokes,
and R. L. Boyle & Co. The street cars
were also in gala attire and people on
the streets had on their Sunday clothes.
A festive air is everywhere and it is
hard to hear the remarks made on the streets
and on the grand stand was quite amu-
sing. Evidently a number of Astorians,
as well as some of the visitors, were not
well up in sporting terms.

A jolly crowd of Germans left on the

engaged orchestra. The return trip was
made at 8 o'clock, the entire party feel-

A TENNIS GAME.

The Kinzie Brothers, of Iwaco, Again
Victorious.

Another very interesting tennis contest
took place yesterday on the local grounds
between the Kinzie brothers, of Iwaco
and Messrs. Wilkinson and Astbury, of
Astoria. A large number of people were
present and were greatly interested in the
exciting game.

The Kinzie brothers have high reputa-
tions as experts in the game and played
last year in a contest for the Pacific
coast championship. The home team put
up a very stiff game and very nearly
were winners in the first set. All through
the games the contest was quite even and
good playing was exhibited on both sides.
The score stands 6-2, 6-5 and 6-1.

Senator John H. Mitchell passed
through Astoria Sunday night on his
way to Portland. The senator had spent
a few days with his son at Seaside and
expressed himself as most refreshed by
the visit.

The senator was not very talkative on
the subject of politics and as to business
in the East, thought that relatively it
was more quiet there than on the Pa-
cific coast. He is looking well and hearty
and is very much enjoying his visit in
Oregon.

BALL TIRING.

Another New Invention for the Bicycle
Philadelphia Times.

This device has just been patented in
England. It substitutes for the contin-
uous tubular tire a series of rubber balls
set in cups at the outer ends of the
spokes. The balls are so connected that
they may be simultaneously inflated.

Several advantages are claimed for the
device, one of them being that no serious
inconvenience will follow the accidental
puncturing of the tire. It is also claimed
that there is a great saving of ground
oblation or friction, and that this will
increase the ease and speed of propul-
sion.

DANGER IN PARASOLS.

Nowadays children sometimes suffer
with inflammation of the eyes and more
serious defects of vision. The mother is
at a great loss to account for the pre-
valence of these troubles, but she has
not far to look for at least one cause
for them. Very often the innocent look-
ing parasol upon the baby's carriage is
responsible for all this suffering. This
parasol is made of either white lace and
silk or some shade of red, pink or blue.
The poor baby, who is not able to pro-
tect or intelligently state his grievance,
is placed behind this parasol and wheeled
and wheeled in his carriage upon the

plaza or sidewalk for a sun bath. For
hours he winks and blinks in helpless
misery in the dazzling reflection that
pours into his poor eyes. A disfiguring
frown or squint is the natural result,
and too often serious defects of vision
develop in later life. The carriage para-
sol, if white, should be lined either with
dark green or black, the preference be-
ing given to the former color, and be so
tilted that the baby can look out upon
the world with level direct gaze. Bright
silk should never be used for the pur-
pose, no matter how attractive they may
be in themselves.—Exchange.

A BOTTLE CANNON.

How to Make and Discharge This Harm-
less Piece of Artillery.

Take a thick empty bottle, a cham-
paigne quart bottle will do, and pour
water into it until it is one-third full.
In the water dissolve one of the powders
—bicarbonate of soda—that druggists sell
to make seltzer water.

Put the contents of the other package,
tannic acid, in a playing card rolled up
into a tube and tied around with a
thread, one end of the tube being sealed
or plugged, with two pieces of blotting
paper.

Suspend this ridiculous cartridge from
the cork by means of a piece of thread
attached by a stick. The open end of the
cartridge must be uppermost, and when
all is ready, you cork the bottle tightly,
having allowed enough thread to swing
the cartridge clear of the water.

To explode the cartridge and discharge
your novel cannon, you lay the bottle
horizontally upon two pencils upon the
table, they will act as your gun car-
riage.

Pretty soon the water will penetrate
the blotting paper plugs and reach the
tannic acid. Effervescence will at once
take place and the carbonic acid gas thus
generated will throw the cork from the
bottle with a loud report, the cartridge
tumbling into the air like a rocket.

And you will have a still further imi-
tation of field artillery in the recoil of the
bottle, which will roll back several
inches.

Makes the little experiment. It is both
playful and harmless.

AT A FUNERAL.

The Floor Given Way Under the Corpses
and Mourners.

Northtown special to Philadelphia Rec-
ord.

The citizens of Undertaker Monday
alone prevented a catastrophe at the
funeral of Marks Beer, a retired bridge-
port packer, who was buried today.
As it was three o'clock, faintly, it rolled
at the prospect of being dumped into
the cellar with the corpses.

The parlor in which the dead man was
lying in his coffin was crowded with
friends, when a joke supporting the floor
started to give way. This, under other
heard the warning came in time to quick-
ly pass word to move out, and most
of the people had taken advantage of
the admonition to get out of danger. The
joke gave way as the last of the moun-
tains got clear of the room, but the wreck
was slight to what it would have been
had the people remained.
