STATE NEWS. Interesting Items Cuiled from Oregon's Leading Newspapers.

The hop crop of Oregon is this year far ahead of the crop on the Sound, and an old dealer in hops says that, as he has always predicted, Oregon will become the banner state of the coast in the hop line. "Our climatic conditions and soil are such," he continued, "that they cannot be beaten. Some roots of the celebrated Bohemian hops have been procured and are now being cultivated here, and it is expected that in a short time Bohemian hops will be produced in Oregon superior to those produced in Bohemia. It is found that hops can be grown here on high ground as well as in low ground and of a better quality. Some year before long hops will fetch a high price again and Oregon hop growers will make money galore."—Salem Post.

He does the whole business, 'from the ground up,' so to say. He goes to the woods and peels his tan bark, then grinds it and extracts the tanning himself. We do not know but what he can also, if necessary, shughter a steer and prepare the hide for tanning, thus keeping the business all in the family. A ninety-nine year leave of the Manito by line was made to the Great Northern line in 1890. By its terms there was a guaranty to the stockholders and owners of bonds.
