They Lack Life. There are twins sold to fishermen on the Columbia river that stand in the same relationship to Marshall's Twine as a wooden image does to the human being—they lack strength—life—evenness—and lasting qualities. Don't fool yourself into the belief that other twines besides Marshall's will do "just as well." They won't. They cannot.

ADDITIONAL SHORTAGES. Denver, Sept. 14.—An additional shortage of \$2,000 has been found in the county treasurer's accounts which may increase the liability of the bondmen to nearly \$200,000.

FOR ROAD IMPROVEMENTS. Young's River People Want to See Repairs Made. Yesterday Messrs. Young, Christians and Bunker, of Young's River, were in the city in the interests of good roads. They will shortly take some steps before the county court in an effort to have the road just this side of the Weatland road so improved as to raise it out of the water. As it now stands there is about 500 feet of the approaches to the bridge which is covered with water during the high tide and this greatly interferes with travel from that section of the country. The people in that vicinity say they will raise a share of the money necessary to make the improvements and they think that the county court should also aid in the matter. It is also stated that a number of the merchants will also render some assistance in the matter, in order to keep the road open during the winter.

CONFLICT OF AUTHORITY. General Harmon Objects to the Whipping of U. S. Prisoners.

DEWEY AS A PROPHECY. Democrats Not Seeking the Nomination for the Presidency.

London, Sept. 14.—Chauncey M. Depew has returned to London. Mr. Depew sat in a room at the Savoy tonight and talked in a characteristic way of his experiences. "I came to Europe to see nobody," he said, "and consequently I see everyone. I saw Mr. Croker today, who told me that he is returning to New York to take an active part in the campaign. Mr. Croker is very confident that Tammany will elect its whole ticket, and he bases his confidence on the belief that the combination of 184 Mr. Croker's opinion is right. Tammany in that event, will elect all the judges, the county ticket, the senators and most of the assemblymen. I believe that the state will go Republican, and that we are pretty sure to elect the Republican presidential candidate."

Mr. Depew asked about an article which appeared in the London Times Tuesday on W. C. Whitney's presidential chances. Mr. Depew said on the subject: "I really do not believe that Mr. Whitney wants the Democratic nomination. The fact that the nomination is not being sought for shows the slim chances of the Democrats. Regarding his own trip, Mr. Depew said: "I had the usual good time at Hamburg, where I dined twice with the Prince of Wales. From there I went to Lourdes and saw a miracle—at least they called it a miracle. I made quite a long tour in Germany, France and Belgium. There is a great improvement in business manifest in all three of these countries, and likewise in England. The whole world will experience an era of prosperity in the next five or six years. The United States especially. Indeed, it has already started. We have just reaped the greatest crops in our history. Wages are voluntarily being increased, and our securities are increasing in value and are being sought for by foreign investors. I find that Europe is rapidly regaining confidence in American securities."

Mr. Depew was asked by his interviewer what his observations showed to be the highest of all in Leavening Power.—Latest U. S. Gov't Report

Various national debts were refunded last year to the extent of \$2,500,000,000, and the saving effected in interest was \$3,000,000,000.

From the East Is What the American Mechanic Will Fear Some Day. (New York Press). Congressman D. H. Morcoer, of Nebraska, has spent a few months in Japan studying Oriental affairs. He expects to be considered the best-informed man in the next congress on Japan and the East. He thinks that one of the evils that the United States will have to guard against within the next few years is the enormous supply of cheap labor in Japan and China.

"Labor is so cheap," said Congressman Morcoer to a San Francisco reporter soon after reaching this country, "that the Oriental countries will begin to compete before long with the world in manufactures. There is a Britisher in Japan who is showing the Japanese how to mix cotton with wool. They are rapidly learning that Yankee trick, and it won't be long before all their silk fabrics will be adulterated. At Hongkong a tramway has been built up the side of a mountain 1,400 feet high. It cost \$100,000. It would have cost \$1,000,000 in this country. There is a factory at Koto, Japan, where little children from 5 years of age are employed in making matches. We can't compete with that. Japan could supply the whole world with matches if she desired. Japan and China, though, offer great inducements to Americans as a direct result of the recent war. Both are going in for manufacturing, and entreprening men of means can go over and make barrels of money easier than at any other place in the world I know of at present."
