

What is

CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrup, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhea and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."

Dr. C. C. Osgood,
Lowell, Mass.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves."

Dr. J. F. Kitchell,
Conway, Ark.

Castoria.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."

H. A. Archer, M. D.,
111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it."

UNITED HOSPITAL AND DISPENSARY,
Boston, Mass.

EXPOSITION

Portland, Oregon.

The largest and most complete display ever made of the Resources, Industries, Commerce, Business, Agriculture, Forests, Mines, Fruits, Fisheries, Manufactures and Transportation Facilities of the Great Pacific Northwest.

Fine Music. Special Attractions Every Day. Reduced Rates on all Transportation Lines.

ADMISSION. Single Admission 25c. Children under 10 years 10c. Season Tickets \$1.00. For Exhibit Space apply at the Exposition Building.

E. C. MASTEN, Secretary. C. H. HUNT, Superintendent.

UNIVERSITY OF OREGON, 1895-1896.

THE UNIVERSITY OF OREGON, Eugene, Oregon, offers free tuition to students. Young men can obtain board, lodging, heat and light in the dormitory for \$2.50 per week. Roomers furnish their own linen. Young women are provided with board in private families at \$3.00 per week. Young women desiring board should address Prof. John Strapp, Eugene, Oregon; or Secretary Young Women's Christian Association, Eugene. The University offers three baccalaureate degrees: Bachelor of Arts, Bachelor of Science and Bachelor of Letters, with corresponding courses of study. The following shorter courses are also offered: An English course leading in two years to a business diploma and in three years to the title graduate in English; an advanced course for graduates of normal schools leading to the degree master of pedagogy; a three years' course in civil engineering leading to the degree civil engineer; a course of two years for teachers of physical education leading to a diploma and the title director of physical education. The University charges an incidental fee of ten dollars, which is payable in advance by all students. Students holding diplomas from the public schools and those having teachers' certificates are admitted to the preparatory department without examination. Those desiring information regarding the preparatory department should address the dean, N. L. Narrengan, Eugene.

For catalogues and information address C. H. Chapman, President, or J. J. Walton, Secretary, Eugene, Oregon.

BLUNDERS

Individual, Social and National As Seen

FROM A HUMORIST'S STANDPOINT

Prof. N. N. Riddell Ph. D. Entertains

a Large Audience at the Methodist Church.

The M. E. Church was crowded last night to hear what Prof. N. N. Riddell, Ph. D., the celebrated lecturer and entertainer, had to say on "Blunders of Life, as Seen from the Humorous Standpoint." The lecture was full of telling truths, that were interspersed with a great deal of mirth and humor that kept his audience in almost continuous laughter. He took up the blunders as made by the individuals, those in the social world and the blunders of the individual.

Among the blunders made by the individual dwelt on were: The idea that a person can succeed in life without a proper preparation. There may be such a thing as luck but most of luck is born of pluck. Another mistake is made by waiting "for a pull" and looking for an easy position. There are girls who are in getting a wrong start. When a boy gets beat in a footrace he always says it is because he did not get a good start. Concentration of force is what is needed for success. Mind is a limited quantity and the more you spread it the thinner it gets until after a while it becomes as thin as church fair soap or a kias over a telephone. Did you ever try this friend, it is very thin.

Among the social blunders taken up were those of the artificiality of the age. If young ladies would only take on the time in decorating the inside of the head as they now do in the outside, they would be far more attractive than they are nowadays. There are girls who are so homely that they have to get up three times a night to let their faces rest and yet they make beautiful minds and sweet pure souls that make them attractive and interesting. Some of the absurdities in ladies' dress were dwelt on, that result from the incongruities of women of all sizes and appearances confining to the one style. These give us creatures that resemble a turtle just trying to draw his head into his shell, or a half dressed turkey. The ladies in courtship are to part his hair in the middle because doubtless his brains are so light that his head would tip over if he didn't, was pictured forth, and the inability of the male to secure a woman of high intellectuality and character. The mistakes made after marriage were taken up. Too many neglect the little acts after marriage and make them attractive before and we see a couple who by their actions cause the crude, crusty old, bachelor to say, "They're married and of their own accord they're courting." Again fathers do not keep close enough to their boys' hearts. Too many a boy's father is simply "The man that stays here Sunday."

Among the national blunders pointed out was the idea of looking upon woman as the inferior of man, intellectually. Some think her inferiority comes from her being born after man. Nonsense! True, she came after man, and has been after him ever since, and goodness knows what would have happened to him if she hadn't been. This idea of woman's inferiority causes us to deny to her the twentieth century will find the intelligent women of our land express their views by the ballot. Again we are mistaken to look back over our glorious past instead of turning about and facing the live issues and problems of the hours that must be settled or our nation totters to fall.

At the close of the lecture several public declarations of character were made by the professor, that were well given and the hits made much appreciated by the friends of the parties in the audience. Tonight the subject of the lecture is, "The Philosophy of Life."

AS HURDLETT PUTS IT.

Bob Hurdlett gives this simple recipe: "My homelike friend with the chromatic nose, while you are stirring up the sugar in a ten-cent glass of gin let me give you a fact to wash down with it. You may say you have longed for years for the free, independent life of a farmer, but you have never been able to get money enough to buy a farm. But this is where you are mistaken. For some years you have been drinking a good, improved farm at the rate of 100 square feet at a gulp. If you stop this statement, figure it out for yourself. An acre of land contains 43,560 feet, estimating for convenience, the land at \$43.56 an acre, you will see that it brings the land to just one mill per square foot. Now pour down the fiery dose and imagine you are swallowing a strawberry patch. Call in your friends and ask them to give you a gulp down the five hundred foot garden. Get on a prolonged spree some day and see how long it will take to swallow a pasture land to find a cow. Put down that glass of gin; there is dirt in it, 300 feet of good, rich dirt, worth \$43.56 per acre."—Ex.

PARIS SHOPLIFTERS.

A well dressed woman recently entered a Paris jewelry store and asked to see some valuable gold pins. While she was examining them a man began to play a barrel organ before the door. The music seemed to annoy the lady, and, stepping to the door, she threw a piece of money to the man and told him to go away, which he did at once.

On returning to the counter she said that none of the pins suited her, but that as some compensation for the trouble she would buy a brooch. She accordingly chose one, paid 10 francs for it, and was leaving the shop when the jeweler missed a diamond pin of great value from among those she had been examining.

He accordingly stopped his customer, who seemed highly indignant, and insisted on the jeweler's wife searching her, which was done, but no pin was found. The jeweler sent his sister to watch the woman, who was seen to enter another jeweler's shop, and was pretending to make a purchase when the organ grinder made his appearance.

As soon as he began playing she again threw him some money and ordered him to move on, but the person who was watching her perceived that with the money she had given the man a piece of jewelry.

This was at once made known to the police, who arrested both, and found on the man several articles of stolen jewelry.—Jeweler's Review.

LOOKED LIKE THE GENUINE.

Chicago Record. Police Justice—What's the charge against this man?

Policeman—Imprisoning an officer. "What did he do?"

"He walked up to a street vendor's stand and took a handful of peanuts."

ALONG THE WATER FRONT.

Nineteen sturgeon were brought into the city yesterday for shipment to Portland.

The tug was outside all day yesterday but the weather was so thick that nothing could be made out.

The libelling of the Pass of Lony, now in this harbor, will probably have the effect of keeping her here for several days. The captain of the vessel is now in Portland trying to straighten matters out with the boarding-house masters.

The Harvest Queen came down from Portland yesterday in place of the Potter, which is laid up at the bone yard with a cracked cylinder. All her crew have been transferred to the Queen, and it will take several weeks to get her ready to sail. It is extremely doubtful if the Potter will come on the run again this year.

Maine has a licensed woman steamboat engineer, Mrs. Madge Truworthy. Her certificate entitles her to run the engine of any steamer in the waters of the state of Maine. At present she is assistant engineer on the M. E. Grove, a steamer on Lake Mattawamkeag. Her husband is head engineer and it was at his suggestion that she took the examination.

One of the chief reasons for the flooding of our state is the cheapness of the storage rates on the ocean liners, and it is, therefore, with considerable satisfaction learned that the several transatlantic steamship companies are about to consummate an agreement for the advance and maintenance of storage rates between Europe and the United States.

This afternoon the skins of the seized sealers B. R. Marvin, 37 in number, will be landed and packed with others belonging to the owners of the sealers for shipment to the London market. According to the order of Admiral Stephenson the skins were to be sold, but yesterday they were bought at their market value, a considerable valuation and the necessary formalities were entered into for their release from the custody of the customs—Colonist.

The American ship Henrietta, bound for Yokohama to Kobe, is ashore at the wharf of the Portland wharf in her hold. The Henrietta is a ship of 1200 tons net. She sailed from Yokohama on August 12, and made a good run to the mouth of the Columbia river. Rough weather occurred and she put about for the open sea. She sailed too close to the island of Shikoku, at the entrance of the strait, and ran aground. It is thought that the vessel may be a total loss, but no lives were lost.

Reports from the battleship Texas are that the vessel is being gradually put into shape for the official steam test. The machinery, which was damaged by the explosion of the Kii channel, has been repaired quite a general overhauling. It is believed at the department that no permanent damage was done. The experience which has been had with the ship shows that there will certainly be trouble with her ventilating apparatus, which was constructed upon the same plan as that of the Amphitrite and has been found to be very defective.

The ship Marion Fraser has cleared for England with a cargo of cotton, canned fruit and calumet, valued at \$72,331. The steamer Australia sailed for the islands with \$20,000 worth of cargo, the brig Cohasset for the same place with \$13,200, the ship City of Delhi for Queenstown with a \$22,000 load, the steamer City of Rio Janeiro with \$100,000 worth of freight for the Orient and the steamer Progress for Panama. The largest cargo of this port, the steamer Axter left for the south with \$1,000,000 worth of cargo, the largest shipload that ever went out of this port—Call.

A parliamentary return has been issued showing the progress of the British merchant shipping from 1890 to 1894. In the former year the tonnage of British and foreign vessels entered and cleared with cargo and in ballast at ports in the United Kingdom was 9,429,007 tons, of which 2,945,125 tons were foreign vessels. Last year the tonnage of the world's fleet was 10,000,000 tons, and the largest shipload that ever went out of this port—Call.

"It has for some time been a mystery to the fishermen where the mackerel that pass the Gulf of Maine would have gone. The whereabouts of mackerel may be solved, according to the statement of Captain Hyson, of the British schooner Energy, of Maine. Capt. N. S. Hyson, who recently arrived from Labrador, where he had been fishing this summer. He said at Roman harbor, on the Canadian shore, and Captain Hyson is of the opinion that if proper devices had been used the mystery surrounding the disappearance of these fish when they go into the St. Lawrence in June would have been solved. He had been told by the natives at many places along the coast that mackerel had been frequently taken in the last few years, but the fishermen were not prepared to catch them and they could not tell whether they were a large body of fish or not."—Fishing Gazette.

"Three more sealers anchored in James bay yesterday, having completed their season's cruise. They were the Diana, Captain Nelson, with 1164 skins; the Fortuna, Capt. J. Cousins, with 29 skins; and the Vera, Capt. Wm. Sheldra, with 1333 skins. The two first mentioned came direct from the Copper Island coast, not having been near Bering sea. Their passages were uneventful, though the Diana met with some pretty bad weather and was slightly damaged. She only brought 22 skins, her Copper Island catch, the remainder that were procured on the Japan coast having arrived here on the Northern Pacific steamer Emden's some months ago. Captain Nelson brings news regarding the sealers of the Canadian fleet, which are hunting on the Copper Island coast. They are as follows: the catches given including those obtained on the Japan coast: August 18—Mermaid, 1707; Emden, 1200; August 21—Geneva, 1453; Ocean Belle, 1231; reported—Umbria, 1380; August 23 or thereabouts—St.irling, 1300; Ida, 1200; Pioneer, 1200; and Mary Taylor, 700. The Geneva will not start or home until the middle of September, while the Ocean Belle will leave probably a week earlier. The Fortuna, which returned yesterday, is one of the Halifax sealers which left the eastern coast to join the Victoria fleet last winter. She headed direct for the Copper Island coast after leaving the Halifax coast, and consequently her present visit is her first appearance here. She is a fine schooner of 97 tons register, and is owned by a company of which Thomas Forham is managing director. The third of the trio to return, the Vera, brings 49 skins from the Bering sea. Her Copper Island catch was 15, while her Japan coast take was 88 skins. From Ounakaska to the time she dropped anchor in port she only occupied ten days on the homeward voyage."—Colonist.

FREE PILLS.

Send your address to H. E. Bucken & Co., Chicago, and get a free trial of Dr. King's New Life Pills. A trial will convince you of their merits. These pills are easy in action and are particularly effective in the cure of Constipation, Sick Headache, For Malaria and Liver Troubles they have been proved invaluable. They are guaranteed to be perfectly free from every deleterious element and to be purely vegetable. They do not weaken by their action, but by giving tone to stomach and bowels greatly invigorating the system. Regular size, 10c per box. Sold by Chas. Rogers, Druggist.

FOR EXPORTERS TO SPAIN.

The British Trade Journal says: "Exporters to Spain are being harassed by vexatious regulations with reference to certificates of origin. In a letter recently received from that country the correspondent of an English firm returns a certificate of origin sent with a bill of lading, and remarks: 'This certificate is defective in form, inasmuch as it does not state the name of the manufacturer of the goods, the town in which the works are situated, and the street and number. If you do not make out a certificate, the necessary additions must be in the same handwriting, without any alterations or erasures.'"

BUCKLEN'S ARNICA SALVE.

The best salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and All Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction in every case. Price, 25 cents per box. For sale by Chas. Rogers, Old Fellows' building.

There are many good reasons why you should use One Minute Cough Cure. There are no reasons why you should not, if in need of help. The only harmless remedy that produces immediate results. Chas. Rogers.

Indio

THE OASIS OF THE COLORADO DESERT

A New Health Resort

BELOW THE LEVEL OF THE SEA

Absolutely Dry and Pure Tropical Climate

Pronounced by Physicians the most Favorable in America for Sufferers from . . .

Lung Diseases and Rheumatism

Many Remarkable Cures

The objections urged against Indio in the past by the large number who otherwise would have been glad to take advantage of its beneficial climate, has been a lack of suitable accommodations. The Southern Pacific Company, takes pleasure in announcing that several

Commodious and Comfortable Cottages

have just been erected at Indio station, that will be rented to applicants at reasonable rates. They are furnished with modern conveniences, supplied with pure artesian water, and so situated as to give occupants all the advantages to be derived from a more or less protracted residence in this delightful climate.

(From the San Francisco Argonaut.) "In the heart of the great desert of the Colorado—where the Southern Pacific road traverses—there is an oasis called Indio, which, in our opinion, is the sanitarium of the earth. We believe, from personal investigation, that for certain invalids, there is no spot on this planet so favorable."

G. T. Stewart, M. D., writes: "The purity of the air, and the eternal sunshine, fill one with wonder and delight. . . . Nature has accomplished so much that there remains but little for man to do. As to its possibilities as a health resort,—here is the most perfect sunshine, with a temperature always pleasant, a perfectly dry soil for rain is an unknown factor; pure oxygen, denser atmosphere, and pure water. What more can be desired? It is the place, above all others, for lung troubles, and a paradise for rheumatism. Considering the number of sufferers who have been cured, I have no hesitancy in recommending this genial oasis as the haven of the afflicted."

INDIO

Is 612 miles from SAN FRANCISCO
